## ECLIPSES OF THE SUN AND MOON IN 1853.

*June 6.* An annular eclipse of the Sun, invisible at Edinburgh.  
—Begins on the earth generally at 5h. 7m. A., in long. 156 deg. 48 min. W. of Greenwich, and lat. 23 deg. 23 min. S., and ends on the earth generally at 11h. 7.1m. A., in long. 77 deg. 52 min. W. of Greenwich, and lat. 1 deg. 42 min. S.

*June 21.* A partial eclipse of the Moon, invisible at Edinburgh. First contact with the shadow, 5h. 13m. M.; middle of the eclipse, 6h. 1.3m. M.; last contact with the shadow, 6h. 49.6m. Magnitude of the eclipse, (Moon's diameter being 1) 0.204 on the northern limb.

*November 30.* A total eclipse of the Sun, invisible at Edinburgh.—Begins on the earth generally at 4h. 37.6 m. A., in long. 153 deg. 56 min. W. of Greenwich, and lat. 19 deg. 47 min. N. Ends on the earth generally at 9h. 52.5m. A., in long. 57 deg. 49 min. W. of Greenwich, and lat. 7 deg. 35 min. S.

## CHRONOLOGICAL CYCLES.

Dominical Letter...B	Epact.....20	Roman Indiction...11
Golden Number...11	Solar Cycle.....14	Julian Period...6566

## QUARTERS OF THE YEAR.

Spring begins March 20,	at 4h. 25m. A.
Summer.....June 21,	at 1h. 23m. A.
Autumn.....Sept. 23,	at 3h. 36m. M.
Winter .....Dec. 21,	at 9h. 12m. A.

The year 5614 of the Jewish era commences October 3, 1853.

The year 1270 of the Mohammedan era commences Oct. 4, 1853.

Ramadan, or the Month of Abstinence, commences June 8, 1853.

## BANK HOLIDAYS.

New Year's Day.....Jan. 1	Restoration of Chas. II. May 29
Martyrdom of Charles I. Jan. 30	Queen's Accession.....June 20
Queen's Marriage.....Feb. 10	Queen's Coronation,....June 28
Good Friday.....Mar. 25	Gunpowder Plot.....Nov. 5
Queen's Birthday.....May 24	Christmas Day.....Dec. 25

## TERMS IN SCOTLAND.

Candlemas.....Feb. 2
Whitsunday.....May 15
Lammas.....Aug. 1
Martinmas.....Nov. 11

## TERMS IN ENGLAND.

Lady Day.....March 24
Midsummer.. .....June 24
Michaelmas Day.....Sept. 29
Christmas.....Dec. 25

These terms are all in New Style, and to find the Old Style 12 days must be added. The terms in Scotland are not everywhere

the same. Thus, in Peterhead the 26th May is the Whitsunday, and the 22d November the Martinmas term. When the term day falls on a Sunday, the following Monday is considered as the term.

In using this Table, take from the Kalendar the time of High Water at Leith; add to it the time opposite the place required when the sign \* is prefixed; subtract it when the mark — occurs. Thus the time of High Water at Leith in the morning of 1st January is 6h. 17m.; the time in this Table opposite Liverpool is — 2h. 55m.; and by subtracting this from the former there is obtained 3h. 22m. for the morning tide at Liverpool on the day required.

*All the calculations in the Kalendar are made in Greenwich Mean Time.*

*Farmer's and Grazier's Kalendar.*—In fresh weather, where the soil is moderately dry, the plough may be kept in motion.—To make the feeding of cattle remunerative, it is necessary that the most unremitting attention be paid to the animals. Whether they are fed in courts, byres, or boxes, they ought to be kept warm and comfortably littered, whilst their food, of whatever description, ought to be regularly supplied at stated hours. Crushed grains, and artificial food given in addition to stored roots, will be found a profitable mode of feeding, and chopped straw may also be given as a healthy and economical addition to their diet. Cows require succulent roots, or food prepared by steam or hot water, to yield milk copiously. Shelter new-dropt lambs, and give their dams roots, hay, and bruised grain, or linseed cake.

*Gardener's Kalendar.*—When the frost is not severe, trench, manure, and turn up in ridges all vacant ground, and prepare hotbeds. In open and dry weather, sow in mild exposures, for a succession, a few early-frame pease, common beans, short-topped radishes, lettuces, carrots, onions, spinach, and curled parsley, protecting them from the frost by mats or straw; and, in hotbeds, sow cauliflowers, melons, cucumbers, small salad, early cabbages, and kidney-beans. Plant, prune, and train standard and wall fruit-trees, gooseberry, raspberry, and currant bushes. Edge beds, form new flower-gardens, and shelter from frost tender evergreens, tulips, ranunculuses, &c. Pot choice dahlias, placing them in a stove or hotbed. Air and keep dry carnations and stage auriculas. Plant snowdrops, crocuses, gladioluses, irises, &c.

Bank-Holidays are marked †. When they fall on a Sunday, they are held on the following day.

*Farmer's and Grazier's Kalendar.*—Frost being a powerful agent in obtaining mould for covering seeds, plough grass and other lands intended to produce a crop. Whether turnip be folded or carried from the field, plough the land as the crop is removed, and wheat-sowing may follow. Beans and oats may be sown; but it is only rich dry soils which can be seeded so early with prospect of success. In mild weather thorn hedges may be dressed, and new ones planted. Lay up stores of seed-corn, put implements into working trim, and execute many little jobs, that no interruption may be experienced in sowing-time.—Animals about to bring forth merit particular attention,—the supply of milk and strength of offspring being affected by the dam's treatment previous to birth. Keep calves warm, clean, and dry; give hay and sliced roots in addition to liquid food to such as are rearing.

*Gardener's Kalendar.*—Make ready all the ground intended for early crops; and, when the weather is favourable, continue to sow every fortnight pease, beans, onions, spinach, savoy, lettuces, celery, cauliflowers, carrots, parsnips, and radishes, as directed in the kalendar for the preceding month. Cut early kidney potatoes for seed, and put them into the stove or hotbed in order to start them for planting out. Clean shrub-beries, roll walks and lawns, and plant out evergreens and shrubs of all kinds, particularly roses. Put cuttings into rich light soil in well-sheltered borders, and plant stocks of the common wild rose for standards on which to bud the Chinese and other fine varieties. Protect all tender plants from the effects of frost, and air greenhouse and stage auriculas and polyanthus frames. Top-dress all fine auriculas and polyanthus in pots or boxes. Strike dahlias from roots in hotbeds, and sow balsams, cockscombs, tricolors, amaranths, sensitive and ice plants, as well as other tender annuals. Plant carnation-lavers, ranunculuses, anemones, and bulbous roots, and divide the roots of herbaceous plants.

*Farmer's and Grazier's Kalendar.*—Finish wheat-sowing about the middle of the month. Sow beans, oats, and barley as soon as the weather and soil admit,—reserving cold wet lands till the season advances. The seeds of clover and ryegrass will succeed amongst autumnal-sown wheats, without harrowing or rolling, unless the surface be peculiarly dry. Particular fields intended for barley or potatoes may receive a second ploughing. Prepare composts and manures for turnip. This is the best time for planting hedges.—In entering the diet of fattening animals, always let the change be to one more nutritious. Fattening cattle may be allowed bruised grain or linseed cake. If there be a scarcity of turnip for cattle intended for grass, give a small allowance of bruised grain, cake, or hay. Should the weather be favourable, potatoes may be planted after the middle of this month.

*Gardener's Kalendar.*—The principal crops of vegetables should be put into the ground this month. Sow asparagus, celery, cauliflower, Brussels sprouts, beets, brocoli, spinach, onions, Dutch turnips, carrots, pease and beans, savoys, parsnips, and turnip-rooted radishes. Plant red cabbage, sea-kale, kidney-beans, and cauliflowers from frames; and sow cucumbers and melons in hotbeds. Finish pruning, dress borders and strawberry beds. This is the best time to graft fruit-trees, and the China, perpetual, moss, and rosette roses, on the common brier or blush China rose, and to propagate them by layers. Pot dahlias that have pushed, and also cuttings from the offsets, placing them in a moderate heat. Protect tender plants and blossoms, and sow polyanthus, auricula, and almost every kind of perennial, biennial, and annual seeds.

*Farmer's and Grazier's Kalender.*—No favourable opportunity should be lost to sow grain crops. Harrow and roll clover and ryegrass sown amongst wheat, to ensure the seed germinating. Store the residue of the turnip crop, to preserve the bulbs and prevent the exhaustion of soil. Drain lands intended for green crop where previously neglected. Potatoes may be planted in favourable situations. Finish planting thorn hedges.—On store farms, this is the chief lambing season, and the shepherd's utmost attention is necessary. Cease folding turnip, and either feed sheep on stored roots, or restrict them to grass. Should the pastures be late, give sheep grains or prepared cakes. Fattening lamb-hogs require good pasture, being unable to eat turnip freely, from shedding teeth. When there is a scarcity of keep at the homestead, lean cattle may be allowed to roam over permanent pastures. Seedling grasses will seldom admit of being depastured with cattle.

*Gardener's Kalender.*—Sow whatever was omitted last month, and plant out such of the pot-herbs as are ready for that purpose. Continue to sow and plant out rhubarb, artichokes, asparagus, nasturtiums, sea-kale, Dutch turnips, German greens, and small salading. Earth up pease, tie up lettuces, and in very dry weather water seedling beds. Finish the grafting of fruit-trees, and train and clean walks and edgings. Sow annuals, biennials, and perennials. Plant evergreens, and propagate by cuttings jasmine, lavender, sage, rosemary, rue, &c., and all the woody kitchen shrubs. Sow dahlias, carnations, pinks, hollyhocks, Cape, Brompton, and German stocks, China asters, and all kinds of hardy annuals. Destroy the green fly on roses, and preserve the bloom of stage auriculas from sun and rain. Top-dress all flowers in pots by removing withered leaves, and put in fresh earth. Hoe and rake gravel walks, cut box-edgings, and mow grass plots.

Those marked † are not despatched on SUNDAYS, and there are only three despatches from Leith, at 5-30 and 9-30 A.M., and 7-30 P.M.

LATE LETTERS are received at the General Post-Office, Edinburgh, for about 15 minutes after the closing of the Box, on payment of 6d.

PAID LETTER OFFICE, Edinburgh, open from 6-45 A.M. till 9 P.M., and on Sundays from 8 till 10 morning.

MONEY ORDER OFFICE open from 10 A.M. till 4 P.M., Sundays excepted.—Orders not exceeding £2, Threepence; above £2 and not above £5, Sixpence.

SUNDAY DELIVERY, at the windows of the Edinburgh and Leith Offices only, from 8 till 9 morning.

## INLAND RATES OF POSTAGE.

LETTERS, if prepaid, under  $\frac{1}{2}$  oz. 1d.—Above  $\frac{1}{2}$  oz. and under 1 oz. 2d.—Above 1 oz. and under 2 oz. 4d.—Above 2 oz. and under 3 oz. 6d.—Above 3 oz. and under 4 oz. 8d., and so on, increasing 2d. for every oz. or part of an oz. Unpaid letters are charged double these rates, but cannot be forwarded if above 4 oz. The payment of all inland letters must be made by affixing postage stamps on them. There is no limitation of weight in paid letters, but in size they must not exceed 2 feet square. When a letter is redirected, a new rate of postage is charged, but the rate is not doubled though it be not prepaid.

PRINTED BOOKS and other Publications, also Proof-sheets with MS., are conveyed at 6d. per lb. or part of a lb., but the covers must be open at the sides or ends, and no written communication is allowed on them besides the address of the sender and receiver.

NEWSPAPERS, when addressed to a person residing within the delivery of the post town where they are posted, are charged one penny each; and when sent out of the kingdom, must be posted within seven days after publication.

\* Steam-boats with goods and passengers sail from the Broomielaw to Dumbarton, Greenock, Helensburgh, Largs, Millport, Ardrossan, Arran, and Rothesay, and generally to all parts of the Clyde, almost every hour.

## FERRIES ON THE FORTH AND TAY. FIFE AND MID-LOTHIAN.

BURNTISLAND AND GRANTON, *as at October 1852.*

From Granton.—Passenger Boats at 6-50 and 10 M.; 12-35, 3-20, and 6-15, A.—Passenger and Goods Boats about 6-15 and 11-20 M.; and 4 A.  
On Sundays at 7-50 M.: 1 and 4-50 A.

FARES.—Cabin, 1s.—Steerage, 6d.

### QUEENSFERRY.

From Nov. 1 to March 1, a steam-boat leaves the north side at 7½, 8½, 10 M., 12½ noon, 2, 3½, 4½, A.; and the south side at 8, 9, 11 M., 1, 3, 4, 5 A.

March 1 to May 1.—From north side at 7½, 8½, 10 M., 12½, 2, 3½, 4½, 5½ A.  
From the south side at 8, 9, 11 M., 1, 3, 4, 5, 6 A.

May 1 to Sept. 1.—From north side at 6, 7½, 9½, 10 M., 12½, 2, 3½, 4½, 6, 7½ A.—From the south side at 7, 8, 9, 11 M., 1, 3, 4, 5, 7, 8 A.

Sept. 1 to Nov. 1.—From north side at 7½, 8½, 10 M., 12½, 2, 3½, 4½, 5½ A.  
—From south side at 8, 9, 11 M., 1, 3, 4, 5, 6 A.

On Sundays a Sailing Boat will ply as follows:—

From Burntisland.—Passenger Boats at 8-35 and 11-5 M.; 2-25, 5-10, and 8-5 A.—Passenger and Goods Boats about 7-45 M.; and 2 and 8 A.  
On Sundays at 9-40 M.; 1-40 and 6-50 A.

FARES.—Cabin, 1s.—Steerage, 6d.

### QUEENSFERRY.

Nov. 1 to March 1.—From north side at 8½ M., 1½, 4½ A.—From south side at 9 M., 2, 5 A.

March 1 to Sept. 15.—From north side at 7½ M., 1½, 5½ A.—From south side at 8 M., 2, 6 A.

Sept. 15 to Nov. 1, same as Nov. 1 to March 1.

The steam-boat may be freighted during the intermediate periods, when this can be done without interfering with her stated times of sailing.—Freight, 10s.

Sailing-boats may be freighted only on Sundays betwixt the stated hours of sailing.—Freight of large boat, 4s.; pinnace, 2s.

### KINCARDINE.

The freights of coaches, chaises, and bestial, &c. are levied according to a table of rates kept at the ferry.

Pinnaces for passengers, carriages, and bestial are constantly on the ferry, sailing according to the regulations.

From 1st April to 31st August, fares double from 9 o'clock P.M. till 6 o'clock A.M.; and from 31st August to 1st April, from half an hour after sunset till half an hour before sunrise.

### ALLOA.

A steam-boat leaves the north pier every morning (except Sunday), at 7 o'clock, and makes a passage every hour until 7 o'clock in the evening; but from the 21st March to the 21st September 8 o'clock.

The small boat makes a passage every half hour the steamer does not sail.

The steamer or the small boat may be

freighted at any time, provided the passage and return do not interfere with the regular sailing.

On Sundays the small boat will leave every hour, from each side, from 8 o'clock morn. till 8 o'clock even.

Boats wait the arrival and departure of the Scottish Central Railway trains at the hours advertised.

### DUNDEE.

A steam-boat sails from Dundee to Newport every lawful day, at the following hours in the morning, and continues to ply hourly until the under-mentioned hours in the evening:—

From 1st Oct. to 15th March inclusive, 7 morn. to 5 afternoon, and 8½ evening.  
16th Mar. to 15th April, 7 M. to 6 A., and at 8 A.

16th April to 10th Sept., 7 M. to 8 A.

11th Sept. to 30th Sept. 7 M. to 6 A., and at 8 A.

The boat leaves Newport for Dundee at each ½ hour after sailing from Dundee.

A cutter sails for Newport an hour before the steam-boat each morning, from the 15th Feb. to the 15th Oct.

On Sundays the steam-boat sails from Dundee and Newport as follows:—

From 1st Oct. to 28th Feb. from Dundee at 8 and 10 morning, and 1½ and 4½ after.; and from Newport at ½ past 8 and ½ past 10 morning, ½ past 1 and ½ past 4 afternoon.

From 1st March to 23d April, and from 26th Aug. to 30th Sept., from Dundee at 7, 9, and 10 morning, and 1, 4, and 6 afternoon; and from Newport at ½ past 7, ½ past 9, and ½ past 10 morning, and ½ past 1, ½ past 4, and ½ past 6 afternoon.

From 24th April to 25th Aug. from Dundee at 7, 9, and 10 morning, and 1½, 4½, 6, and 8 afternoon; and from Newport at ½ past 7, ½ past 9, and ½ past 10 morning, and ½ past 1, ½ past 4, ½ past 6, and ½ past 8 afternoon.

*Farmer's and Grazier's Kalendar.*—Conclude the sowing of grain crops; and, with the advance of the season, use early varieties. From necessity, barley and pease may be sown up to the end of the month; but full crops cannot be counted upon from such late sowing. Prepare soils for turnip, and use every means to produce a fine tilth. Finish potato planting. Give a second ploughing to summer fallow, and never allow vegetation to make progress at this season on its surface.—Fattening cattle may be continued on well-kept Swedish turnip and potatoes. When there is a sufficiency of grass, and the soil becomes dry, stock pastures with all descriptions of cattle. In cold and wet evenings, shelter milch cows and fat cattle in courts. Wean early calves, and turn late ones out to pasture. Swedish turnips may be sown from the middle of this month to the end of it.

*Gardener's Kalendar.*—Sow capsicums, cauliflowers, carrots, lettuces, spinach, Knight's marrow-fat pease, cucumbers, red beet for pickling, and a full crop of kidney and French beans. Transplant cabbages, winter-greens, lettuces, cauliflowers, and celery. Hoe and stake pease, water newly planted crops, and propagate aromatic plants by slips or cuttings. Plant out dahlias if there be no appearance of frost, and protect from wind and rain choice tulips, ranunculuses, and anemones. Propagate herbaceous plants by dividing the roots; wallflowers, sweet-williams, lychnis, and rockets, by slips; and China roses, calceolarias, mimuluses, &c. by cuttings. Put out into the open border calceolarias, pelargoniums, fuchsias, salvias, the verbena melindris, with other greenhouse plants. Sow biennials and perennials if formerly omitted.

*Farmer's and Grazier's Kalender.*—This is the month for sowing turnips. Where Swedes could not be sown during May, they may still be planted during the first days of June. All other varieties may be sown in course of the month. Drilled crops require attention. Weeds are most easily destroyed when young; and as a general rule, use hand and horse hoes as soon as the crops admit of the operations. Earth up early-planted potatoes. Haymaking commences in early situations. Mow grasses before the plants seed; remove the crop quickly from the ground, and soon afterwards carry it to the stack.—Sheep-shearing becomes general. Fleeces are proportionate to the treatment of animals; and every progression or falling off in condition may be traced in the quantity and quality of wool. Cattle may be best soiled this month; and this mode of feeding has many advantages.

*Gardener's Kalender.*—Continue sowing the vegetables directed last month, and also turnips for autumn use. Plant out brocoli, cabbages, savoys, celery, cauliflowers in shady borders, leeks, lettuces, cucumbers for pickling, and kidney-beans. Watering is requisite in dry weather both evening and morning; and also the hoeing of potatoes, cabbages, and pease. Thin out onions, leeks, carrots, parsnips, and early turnips. Gather and preserve kitchen-herbs. Shade and air melon-plants, and strike by cuttings double wallflowers, rockets, scarlet lychnis, and stocks. Transplant annuals, biennials, and perennials, and seedling pinks into a bed. Lift all hyacinths, tulips, and other bulbs that have ceased flowering; cut off the foliage an inch above the stem, and before putting by lay them in sand a fortnight. Re-pot auriculas, polyantheses, &c. Mow and roll grass walks and plots once a-fortnight during this and the other summer months.

**Farmer's and Grazier's Kalendar.**—Conclude haymaking from artificial grasses. Single out turnip, and let hand and horse hoes be in constant requisition, with a view to improving the crops and benefiting succeeding ones. Work fallows thoroughly with plough, harrow, and roller, carefully removing root-weeds by the hand. Execute draining and apply lime and lime-composts when such operations are necessary. Hand-weed grain crops.—In warm weather fattening cattle and milch cows are the better of sheds, to shelter them from the sun. Throughout summer examine flocks daily, to preserve them from the attack of flies, and use the common remedies for the prevention and destruction of maggots.

**Gardener's Kalendar.**—In this month prepare all unoccupied plots of ground for autumn and winter crops. Sow turnips, French beans, lettuces, and black Spanish radishes. Plant out brocoli, cauliflower, savoys, leeks, and winter cabbages, and earth up celery. Lift full-grown winter onions, and prepare mushroom spawn. In fine weather, gather medicinal flowers and sweet herbs when in bloom, dressing them in the shade for winter use. Divest wall-trees, espaliers, and standards, of all superfluous shoots. Continue to water in dry weather, and gather all kinds of seeds as they advance to maturity. Propagate evergreens, roses, and other shrubs, by laying the young wood. Inoculate flowering and other shrubs, bud roses in cloudy weather, and divide the roots of double primroses, polyanthus, and auriculas. Lay or pipe carnations and pinks, take up anemones and ranunculuses, and put in cuttings of pansies, calceolarias, dahlias, Chinese chrysanthemums, geraniums, &c.

*Farmer's and Grazier's Kalender.*—Conclude hand and horse hoeing turnip. Apply manure to the fallows, and immediately plough it into the soil, putting the ridges into proper form, and clearing out water-courses, to guard against wet weather. In mountain districts haymaking from natural grasses engages the attention of store-farmers. In low situations corn-harvest will occupy all hands.—Lambs not separated from their dams last month must be weaned and put on the best pastures. On lowly-situated arable farms get in ewes for early lambing. In high districts, select and prepare the stock which is to be sent to market in the course of autumn. Prepare ropes, thatch, and every description of store necessary for the harvest, and see that the requisite implements are in proper order.

*Gardener's Kalender.*—Sow onions, early cabbages, and parsley, for the succeeding year; and lettuces, spinach, brocoli, and cauliflowers, to stand the winter. Earth celery; hoe and thin turnips; transplant brocoli, savoy, and cauliflowers, and the principal crop of celery into trenches for blanching. Cut those herbs which are adapted for distillation, or for winter use. Make mushroom-beds, propagate kitchen-herbs by slips, and take up all onions, garlic, and shalots that are withered in the stem. Continue to bud on fruit-trees, roses, and bushes, so long as the bark rises freely and the weather is cloudy. To obtain new varieties, sow auricula, polyanthus, and anemone seeds, and mignonette to blow in winter; as also the seeds of tulips, hyacinths, irises, and all the other bulbous-rooted flowers. Support and thin dahlias to improve their bloom. Shift tender exotics and hardy greenhouse plants into fresh pots. Keep the ground clear of weeds, and continue to water plentifully.

*Farmer's and Grazier's Kalender.*—This may be considered the harvest month. Engage plenty of assisting hands for this important season. Guard against shaking winds by reaping before the juices have left the straw; and to avoid sprouting, keep cut crops always standing in an upright position. When the crop is fit for stacking, carry it by day and by night, and cover the stacks as soon as they are built. Prudent farmers provide stores of ropes and thatch before harvest commences. Hand-weed turnip where necessary. Finish fallows; and such as are wet and coldly situated may be sown with wheat.—On arable farms, weaned lambs and ewes for early lambing may be allowed to depasture stubbles and seedling grass. The breeders, rearers, and feeders of stock will meet at the different markets, and make arrangements for their customary changes of animals.

*Gardener's Kalender.*—The operations of this month are not very numerous. Sow vegetable seeds for a spring-crop, and plant broccoli, cauliflowers, savoys, German greens, leeks, lettuces, celery, and perennial aromatic and pot herbs. Hoe winter spinach and turnips, earth up celery and cardoons, weed cauliflowers and young onions, prick out cabbage-plants, gather ripe seeds, and make mushroom-beds. Plant cuttings of gooseberries, currants, and raspberries, and also strawberries, taking out all the old stools which have twice produced fruit. Continue to divide and transplant biennial and perennial flower-roots; lay almost every kind of shrubs; and put in cuttings of evergreens, China roses, and flowering shrubs. Crocuses, snowdrops, Persian irises, dog's-tooth violets, fritillarias, crown imperials, narcissuses, and most of the other bulbous roots, may now be planted. All the rooted pinks and carnations may be planted out. Sow hardy annuals to stand the winter, and trench up ground in which to plant tulips and hyacinths during October or November.

*Farmer's and Grazier's Kalendar.*—Harvest being finished, this month may be considered the first in the agricultural year, as on the carrying of one crop preparations for the next should be begun. The plough should now be set in motion. Commence wheat sowing in later situations, and defer only such fields as are very dry, and situated in an early climate. Use the preventatives for smut immediately before scattering the seed, and never sow unless there be moisture in the soil to effect germination. Gather potatoes, and carefully secure them from frost.—Unless there is abundance of grass, sheep should get turnip on the pastures. In the beginning of the month remove fattening cattle to the courts, and shelter milch cows during night. Keep weakly calves warm, and allow them nourishing food.

*Gardener's Kalendar.*—Sow radish, lettuce, and carrot seeds; also early pease and beans in a warm exposure. Plant horse-radishes, lettuces, early cabbages, and other greens neglected last month, in sheltered situations; also cauliflowers, mint, and tarragon in frames, for winter use. Earth up savoys and cabbages as high as the leaves. Take up carrots and parsnips, cut off their tops, and bury them in dry sand. Crop the tops of parsley, to make fresh leaves for winter. Plant all deciduous trees and shrubs. Commence pruning, taking the vertical branches in fruit-trees, and cutting obliquely to prevent rain from lodging; also roses, honeysuckle, and other flowering shrubs. Protect dahlias, young carnations, and layers, from sudden frost; and, about the end of the month, begin to plant hyacinths, tulips, ranunculuses, and anemones. In favourable weather, transplant hardy fibrous-rooted plants, intermixing them in the borders, to keep up a succession in the flowering season.

*Farmer's and Grazier's Kalender.*—Conclude potato harvest. Finish wheat sowing, although this grain may be sown any time on rich dry soils up to the middle of March. At this season, sow wheat from day to day as the soil is turned over. Begin to store turnips for winter use; and wheat may be sown where the crop is removed. Form lime-composts for applying in spring and summer. This is the best time for draining soils intended for green crop and fallow. Dress hedges and ditches.—Sheep intended to be fattened should be folded on turnip, and allowed dry fodder. Lamb-hogs will thrive best with an allowance of turnip on pastures. To all flocks apply the salves and lotions in common use. Cattle of all descriptions should receive fodder and shelter during night, and such as are fattening be carefully attended to in the courts or boxes.

*Gardener's Kalender.*—Although hazardous, early pease and beans may be sown in a warm border; if neglected, most vegetables recommended in the last two months may still be planted, earthed up, &c., taking care to protect them from frost. Force sea-kale, rhubarb, and asparagus. Prune and plant fruit trees and bushes; and finish flowering shrubs and trees. Transplant seedling stocks, and suckers taken from the roots of the pear, codling, plum, and quince trees, to prepare them for budding or grafting different fruits upon; also stocks of the tree-rose, for budding upon them the garden and Chinese varieties. Shelter choice flowers. To make the colours of the tulip distinct, the compost ought to be changed every alternate year; an operation which should be performed this month. Tulip-soil should be one-third of fresh, light, turfy loam; one-third of fine sand; and one-third of sandy peat, or leaf-mould. Take up dahlia roots whenever the bloom is nipped by frost, and keep them in sand free from damp.

**Farmer's and Grazier's Kalendar.**—Continue to plough stubbles. Store turnip in mild weather. Regulate thrashing, so that there may be straw to last through the season. In mild weather dress ditches and repair fences, drain and add by every means to the stores of compost and manure. During frosty weather bring forward materials for drains and composts, and remove heavy commodities which require a firm surface for transport.—Cattle of every description should now be in winter quarters, and receive winter fare. Separate the weak from the strong. Have a constant supply of water to store cattle, and apportion their litter and food so that they may last until the arrival of the grass season. Give fattening cattle at all times as much as they can eat, commencing with globe turnip, and proceeding with food of increasing richness.

**Gardener's Kalendar.**—Prepare for future operations, by digging, manuring, or trenching vacant ground, and collecting dung, leaves, and turf, to make compost. In mild weather, a few early pease and radishes may be sown in a warm border, and small salads and cucumbers in hotbeds. Cover with fern, straw, litter, or mats, all such plants as are likely to be injured by the frost, either in the open ground or in frames, admitting free supplies of air when the weather is favourable. Plant and prune all kinds of trees and bushes, taking care to stake the trees that are newly planted. In pruning roses, remove the old wood, curtail the young straggling branches, adding good store of decayed manure. Fine auriculas, polyanthuses, and carnations must now be treated with great care.

## FAIRS, CATTLE-MARKETS, &amp; TRYSTS IN SCOTLAND.

WHEN the appointed day happens to fall on Saturday, Sunday, or Monday, the fair is generally deferred till the Tuesday following. Fairs which are held according to the Old Style are distinguished by the letters *o s* placed after the day indicated. In some parts of the country the difference between the Old and New Styles is computed to be *eleven*, in others *twelve* days,—the *Old* being reckoned to be so much later than the *New* Style.

## STATE OF THE FIARS-PRICES

OF THE DIFFERENT COUNTIES IN SCOTLAND FOR CROP AND YEAR 1851.

The following Tables have been prepared from authentic documents in the Teind-Office, and their accuracy may be entirely relied on. The average is that of the seven years, from 1845 to 1851 inclusive; but in a few cases, distinguished by an asterisk, that of six years only. Where blanks occur, no average could be given, the Fiars not having been regularly struck.

The Grain is computed by the Imperial Quarter,—the Meal by the Boll of 140 Imperial Pounds.

## ABERDEENSHIRE.

	1851.		Average.	
	s.	d.	s.	d.
Wheat with fodder....	..	..	..	..
.. without fodder....	37	0	44	8 $\frac{3}{4}$

**WEATHER TABLE.**

THE following Table, exhibiting the results of many years' observations, will be found peculiarly useful in furnishing a knowledge of the sort of Weather which will most probably attend the Moon's entrance into any of her quarters.

Moon.	Time of Change.	In Summer.		In Winter.	
				[s. or s. w.]	
If New Moon, First Quarter, Full Moon, or Last Quarter, happen	Between midnight and 2 in the morning.....	Fair.....	Hard Frost, unless wind		
	.... 2 and 4 do.	Cold, with showers..	Snow and Stormy.		
	.... 4 and 6 ..	Rain.....	Stormy, with Snow.		
	.... 6 and 8 ..	Wind and Rain....	Stormy. [if E.		
	.... 8 and 10 ..	Variable.....	Rain, if wind w.; snow,		
	.... 10 and 12 ..	Showery.....	Cold, and high wind.		
	At 12 noon, & 2 afternoon	Very Rainy.....	Snow or Rain.		
	Between 2 and 4 aftern.	Variable.....	Fair and mild.		
	.... 4 and 6 ..	Fair.....	Fair.		
	.... 6 and 8 ..	Fair, if wind N. w.;	Frosty, if N. or N. E.;		
	.... 8 and 10 ..	Rainy, if s. or s. w.	Snow, if s. or s. w.		
	.... 10 and 12 ..	Ditto.....	Ditto.		
		Fair.....	Fair, with Frost.		

## DUTIES ON ALL CORN ENTERED FOR HOME CONSUMPTION.

*Wheat, Barley, Bear or Bigg,  
Oats, Rye, Pease, and Beans,  
per qr. 1s.\**

*Wheat Meal and Flour, Barley Meal,  
Oatmeal, Rye Meal and Flour, Pea  
Meal, and Bean Meal, per cwt. 4½d.\**

\* And so in proportion for a less quantity.

TABLE for converting SCOTTISH ACRES into IMPERIAL.

9	11	1	16 3	90	113	2 1 1		900	1135	0 10 13		9	7	2	8½

5760 sq. ells = 160 falls = 4 roods = 1 Scottish acre = 1.261183 imperial acre.

## IMPERIAL STANDARD MEASURES.

## I. MEASURE OF LENGTH.

- 12 inches = 1 foot  
3 feet = 1 yard  
5½ yards = 1 pole  
40 poles = 1 furlong  
8 furlongs = 1 mile or 1760 yards

*Special Measures of Length.*

- Hand = 4 inches; fathom = 6 feet;  
69.121 miles = 1 geographical degree;  
100 links = 1 chain, or 66 feet.

## II. MEASURE OF SURFACE.

- 144 square inches = 1 square foot  
9 square feet = 1 square yard  
30½ square yards = 1 square pole  
40 square poles = 1 rood  
4 roods = 1 acre  
640 acres = 1 square mile

*Special Measures of Surface.*

- 10 square chains make 1 acre; 36 square yards of stone, brick, or slate work are termed a rood; and 100 square feet of flooring a square.

## III. MEASURES OF CAPACITY.

## 1. General Measure of Solidity.

- 1728 cubic inches = 1 cubic foot  
27 cubic feet = 1 cubic yard  
5 cubic feet = 1 barrel bulk

## 2. Measure for Liquids, Corn, &amp;c.

- 5 oz. avoird. water = 1 gill  
4 gills = 1 pint  
2 pints = 1 quart  
4 quarts = 1 gallon  
2 gallons = 1 peck  
4 pecks = 1 bushel  
8 bushels = 1 quarter  
10 quarters = 1 last

dry  
goods  
only.

## IV. MEASURES OF WEIGHT.

## 1. AVOIRDUPOIS WEIGHT.

- 27.344 troy grains = 1 dram  
16 drams = 1 ounce  
16 ounces = 1 pound  
14 pounds = 1 stone  
2 stones = 1 quarter  
4 quarters = 1 hundredwt.  
20 hundredwt. = 1 ton

Used generally in commerce.

*Special Divisions of Avoird. Weight.**Wool Weight.*

- 2 stones = 1 tod  
6½ tods = 1 wey  
2 weys = 1 sack  
12 sacks = 1 last

The pack is 240 lbs.

*Hay and Straw Weight.*

- 36 lbs. straw = 1 truss  
60 .. new hay  
(till 1st Sept.) = 1 truss  
56 .. old hay = 1 truss  
36 trusses = 1 load

*Flour Weight.*

- 1 stone = 14 pounds  
1 bushel = 56 pounds  
1 boll = 140 pounds  
1 sack = 2½ cwt.

## 2. TROY WEIGHT.

- 24 grains = 1 pennyweight  
20 pennyweights = 1 ounce  
12 ounces = 1 pound

Used for weighing gold, silver, &c.

APOTHECARIES' WEIGHT.—20 troy grains = 1 scruple; 3 scruples = 1 dram; 8 drams = 1 ounce.—This weight is used in medical prescriptions only.

## RULE FOR ASCERTAINING THE WEIGHT OF HAY.

Measure the length and breadth of the stack; then take its height from the ground to the eaves, and add to this last one-half of the height from the eaves to the top: Multiply the length by the breadth, and the product by the height, all expressed in feet; divide the amount by 27, to find the cubic yards, which multiply by the number of stones supposed to be in a cubic yard (viz. in a stack

of new hay, 6 stones of 22 lbs. avoird. each; if the stack has stood some time, 8 stones; and if old hay, 9 stones), and you have the weight in stones. For example, if a stack be 60 feet in length, 30 in breadth, 12 in height from the ground to the eaves, and 9 (the half of which is  $4\frac{1}{2}$ ) from the eaves to the top; then  $60 \times 30 \times 16\frac{1}{2} = 29700$ , and  $29700 \div 27 = 1100$ , and  $1100 \times 9 = 9900$  stones of old hay.

## RULE FOR ASCERTAINING THE WEIGHT OF CATTLE.

Measure the girt close behind the shoulder, and the length from the fore-part of the shoulder-blade along the back to the bone at the tail, which is in a vertical line with the buttock, both in feet. Multiply the square of the girt, expressed in feet, by five times the length, and divide the product by 21; the quotient is the weight, nearly, of the four quarters, in imperial stones of 14 lbs. avoirdupois. For example, if the girt be 6 $\frac{1}{2}$  feet, and the length 5 $\frac{1}{2}$  feet, we shall have  $6\frac{1}{2} \times 6\frac{1}{2} = 42\frac{1}{4}$ , and  $5\frac{1}{2} \times 5 = 26\frac{1}{2}$ ;

then  $42\frac{1}{4} \times 26\frac{1}{2} = 1109\frac{1}{8}$ , and this, divided by 21, gives 52 $\frac{1}{2}$  stones nearly, or 52 stones 11 lbs. It is to be observed, however, that in very fat cattle the four quarters will be about one-twentieth more, while in those in a very lean state they will be one-twentieth less, than the weight obtained by the rule. The four quarters are little more than half the weight of the living animal; the skin weighing about the eighteenth part, and the tallow about the twelfth part of the whole.

## EXCISE DUTIES.

N. B.—By Act 3 and 4 Vict. c. 17, 5 per cent. falls to be added to all the Excise Duties except those on Spirits.

Hops.....	lb.	£0	0	2
Malt from barley.....	bush.	0	2	7
.... bear or bigg.....	bush.	0	2	0
Paper and pasteboard.....	lb.	0	0	1 $\frac{1}{2}$
Soap, hard.....	lb.	0	0	1 $\frac{1}{2}$
.... soft.....	lb.	0	0	1
Spirits, in England.....	gall.	0	7	10
.... Scotland.....	gall.	0	3	8
.... Ireland.....	gall.	0	2	8
For all sugar used by brewers of beer for sale, 1s. 4d. per cwt., over and above all other duties.				

For every 112 lbs. of sugar used in the distillation of spirits an allowance made of 8s. 10 $\frac{1}{2}$ d.; and for every 112 lbs. of molasses, an allowance of 3s.

Passage vessels in which liquors & tobacco are sold..	1	0	0

**EXCISEDRAWBACKSONEXPORTATION.**

The excise duties are repaid or *drawn back* to the shipper on the goods being

exported. The drawback on beer (the malt of which is excised) is computed at the rate of 5s. per barrel of 36 gallons when made from wort of not less than 1·054 specific gravity before fermentation, and 7s. 6d. when made from wort of not less specific gravity before fermentation than 1·081.—Allowance of spirits distilled from malt only, 8d. on every gallon at proof, with 5 per cent. On every gallon of spirits at proof, distilled from malt only, when exported or shipped as stores, a drawback of 7½ a-gallon at proof, and 5 per cent. Spirits distilled from other materials than malt only, when exported or shipped as stores, a drawback of 1½d. a-gallon at proof, without 5 per cent.

## A BRIEF

# HISTORY OF PETERHEAD.

THE TOWN or BURGH of PETERHEAD is situated in latitude 57 deg. 30 min. 14. sec. North ; and longitude 1 deg. 46. min. 30. sec. West from Greenwich, being the easternmost promontory of the east coast of Scotland. It is the seat of a Sheriff-Court—it is one of the Reform Burghs constituted by the Act in 1832, and returns, with Elgin, Banff, Cullen, Inverury, and Kintore, a member to Parliament. The town is governed by a Provost, 3 Baillies, a Treasurer, and 7 Councillors. There are 13 Commissioners of Police, and 19 Trustees of the Harbour. The number of Electors by last roll is 263. The population of the town and burgh proper by last census is 7242, and including the parish 9370, exclusive of seamen belonging to the town, the number of whom may be estimated at 1000, making the population of the burgh 8242, and the town and parish 10130.

Our space will not admit of a lengthened History of Peterhead, but we shall give a concise account of its rise and progress from an early period.

“In 1593 Peterhead was formed into a Burgh of Barony by George Keith, Earl Marischall. It was then called *Keith Inch*. The peninsula on which it is situated belonged originally to the Abbey of Deer. In 1560 Queen Mary appointed Robert Keith, son of William, fourth Earl Marischal of Scotland, Commendator of Deer, and in 1587 James VI. created this Robert a Peer, under the title of Lord Aintree, and converted the Abbey lands into a temporary lordship in his favour. The peerage becoming extinct, the Abbey lands devolved to Earl Marischall. In the year 1637, William, sixth Earl Marischall, obtained a new charter from the Crown of the Abbey lands, besides the tithes, great and small, of the Parish of Peterhead, the patronage of the Church, salmon and white fishing, &c. After the forfeiture of Earl Marischall in 1715, the town, with the lands belonging to that family in the parish, were bought by the York Building's Company, which, failing in 1726, sold the town and those lands to the Governors of the Merchant Maiden Hospital of Edinburgh for £3000 sterling. The rental at that time amounted to 191 bolls of bear, 199 bolls of meal, 2 bolls of oats, and £80 sterling of money, besides the Feu Duty for Property in Peterhead. The Governors let these lands for £245 yearly, at which rent they continued for 64 years. About 1774 the Governors offered their property in Peterhead parish for sale, when it was purchased by Mr. Garden of Troup, M.P., for £10,000, who, thinking the price high, had some time to consider of it, with an option to relinquish the bargain, if he thought proper, which he did at the end of the period agreed on, to the great sa-

tisfaction of one of the governors, who had never approved of the bargain, and who, on putting the resignation into the charter chest, marked on the back of it '*a miraculous escape,*' and so it fortunately turned out, for in 1775 the rents rose to £870, in 1794 to £1040, in 1815 to £2000," and at present the rents of the Hospital lands in Peterhead are upwards of £2,500 exclusive of Feu Duty, which amounts to a considerable sum.

In 1593, George Keith, Earl Marischall, Baron of the Burgh of *Keith Inch, alias Peterhead*, entered into a contract of Feu with the then residents, which may be said to be the origin of the Town of Peterhead. The derivation of its name is doubtful, and etymologists are not at one on the subject; some seem to think the name Peterhead (*Petri Promontorium*) is derived from a promontory upon which that part of the town called Keith Inch, sometimes called the Quenzie, (from the French word *coin*, which signifies a corner) at present stands, which is supposed had been dedicated to the Apostle Peter; others are of opinion that the Greek word *Petros* and the French word *Pierre*, each signifying a rock, and the town having that for its foundation, may have given rise to the name; while a third class of etymologists suppose the name to be derived from a Highland Chieftain of the name of Peter, who is said to have lost his head in an attempt to rob and plunder the parish. To substantiate this last opinion there is a farm near Peterhead called *Auchtygall*, which, in the Gaelic language, signifies the place where the Highlanders made a stand; and *Cairngall*, in Longside parish, is said in the same language to signify the place of an encampment. The town in old charters is called *Peterugie*, and in more recent times Keith Inch, but that name is now given only to a small portion of it.

In 1593 it obtained a charter as a Burgh of Barony by the name and title of *Peterhead*, which it has since retained.

The number of Feuars to whom the original charter was granted in 1593, was only 14. "The original feus were laid off from Fish Lane towards Brook Lane; again from Fish Lane towards Port Henry Lane, and from Port Henry Lane towards Crooked Lane and Park Lane; from Park Lane towards Flyingig's Wynd, and from Flyingig's Wynd towards Union Street. The rest appear to have been on the *Quinzie*, or *Keith Inch*." The earliest feus after the original, were laid off and built upon in 1616 on the south side of Broad Street.

In 1593 it would appear that the population of *Keith Inch*, alias *Peterhead*, was 56. At that time no shipping belonged to the town or village beyond some fishing boats, and the only harbour or haven was that called Port Henry, as at present in the north shore, to the north of the present North Harbour. The population increased progressively as follows:—

In 1593 the number of inhabitants was	56
In 1727, town, ...	900
In 1764, town and parish, ...	2420
In 1769, town and parish, ...	2706
In 1790, town, ...	2550
In 1801, town and parish, ...	4491
In 1811, town and parish, ..	4707
In 1821, town and parish, ...	6313
In 1831, town and parish, ...	6695
In 1841, town and parish, ...	7617
In 1851, town and parish, ...	9370
including seamen, probably	10130

With regard to the shipping, the tonnage seems to have increased with the growth of the population and the enterprising spirit of the inhabitants. About the year 1650 there was only one vessel of 20 tons burthen belonging to the port; in 1720 there were

three vessels ; in 1793 there were 26 from 40 to 200 tons burthen ; in 1815 there were 80, from 40 to 400 tons, and upwards. At one time the amount of tonnage was greater than at present, reaching, it is said, to about 12,000 tons. Again, and at present the enterprise of the inhabitants, in this branch of commerce, is decidedly on the increase, especially in the Seal and Whale Fishings, which seem particularly active and lively, as will be shown by the table of Shipping annexed, from which it appears that the total tonnage belonging to the port now amounts to 9,555, of which 27 vessels, with a tonnage of 7356 are fitted out, and will sail for the Greenland Fisheries in 1853. Reckoning these 27 vessels employed in the Greenland Fisheries, including the value of their boilyards and home stores, at £5,500 per ship—a moderate computation—a capital of £148,500 is thus embarked in that trade. What a contrast is thus presented between the state of Peterhead in 1792, when Dr. Laing wrote his “Account of Peterhead and its Mineral Wells,” and the present. Dr. Laing states that in 1793 the shipping belonging to the port amounted to about 2600 tons and employed from 300 to 400 seamen. “One ship,” he says, “belonging to some gentlemen in Peterhead, is employed in the Greenland Whale Fishing, and has 36 men. Of five voyages made by this vessel two have been tolerably successful.” Last year twenty-two ships were fitted out, two of which were wrecked at the fisheries. For the ensuing season 7 additional are being fitted out, and reckoning that each ship on an average carries 50 men (within the mark) employment is thus given to 1350 seamen in the Seal and Whale Fisheries.

There is another branch of industry in Peterhead, which, next to the Seal and Whale Fisheries, forms

an important part of the staple trade of the town, and deserves special notice, viz., the *Herring Fishing*. The inhabitants have been for years largely engaged in this trade for which Peterhead, with its now spacious harbours, is peculiarly adapted. In this trade, for some time back, there have been employed from 300 to 400 boats, and during two or three months of the fishing season there is an influx of strangers connected with the Fishing, numbering from four to five thousand.

The present prosperous state of Peterhead, and its advancement all along as an important sea port and commercial town is almost entirely owing to the public spirit and enterprise of the inhabitants, who from the earliest period having been brought up with their attention exclusively directed to seafaring matters, seized every opportunity and every means in their power from time to time to form, improve, and enlarge their Harbours, upon which the prosperity of the town depends.

In carrying out the good work of improvement, the Governors of the Merchant Maiden Hospital—the superiors—have, at different times, willingly lent a helping hand, and their liberality in this respect, will, no doubt, turn out to their pecuniary advantage.

The boat haven, called Port Henry, was guaranteed to the community by the contract of 1593, which was the only harboar at the time, and which doubtless must fall to the charge of the Harbour Trustees, whether comprehended in the Harbour acts or not, as being public property, and may at a future period be rendered available for extending the harbours in that direction. Besides the haven called Port Henry, which remains *statu quo*, there are now two spacious and commodious harbours, called the South and North Harbours, connected by a canal or

cut, in and from either of which vessels may arrive and depart with any wind. The basin of the South Harbour contains 5 acres ; its depth is 12 feet at high water, spring tides ; the bottom is nearly level, there being only 1 foot of difference between the channel and the other parts of the harbour. The new North Harbour consists of three basins, surrounded by most substantial, complete, and commodious quays. The three basins together cover a space of 9 acres. A contract has just been completed for deepening the two inner basins—a work of the greatest importance and utility—which has been executed in a highly satisfactory manner by the contractors, Messrs. Stuart and Simpson, and which does them infinite credit. The depth of water in spring tides at the entrance will be  $14\frac{1}{2}$  feet, and in the lately excavated basins  $15\frac{1}{2}$  feet, so that large whalers and other heavy vessels can now enter the harbours and sail from them with the greatest ease and safety at neap tides. The amount lately expended by the Trustees of the harbours on the contract with Messrs. Stuart and Simpson, including alterations and new erections of quays will not be less than eleven thousand pounds. There is an excellent Graving Dock off the outer basin of the north harbour, and as additional accommodation is required for repairing vessels the Harbour Trustees have resolved to erect another Graving Dock off one of the lately excavated inner basins, which will be of great utility. To encourage the Harbour Trustees to erect this Dock, and in order to prevent too great a draw on their funds after their recent large expenditure, the owners of the Seal and Whale Fishing ships—for which such accommodation is required—have voluntarily agreed to tax the ships to the amount of £1500 to assist in meeting the expense ; an act on the part of the ship-

owners, while it may reflect prudence and wisdom for their own interest, displays a spirit of liberality and good feeling for the welfare of the port, highly creditable to them. But these public spirited ship-owners are only following in the footsteps of their predecessors, who did similar patriotic acts for the improvement of the harbours from time to time ; and but for such liberal and enterprising deeds old *Port Henry* might have been the sole harbour of a few inhabitants of a very insignificant fishing village to this day. The inhabitants, however, of former years, in procuring grants from Government and other contributions for the formation, erection, and enlargement of the harbours, not only contributed in various ways, but pledged their personal security and that of their feus for the credit of the harbour to carry on the works, relying on the success to follow, from which they came out scaithless—and the present generation have the happiness to reap the benefits of the enterprising spirit of their forefathers and predecessors, which from all appearance bids fair for great future prosperity. It is earnestly to be hoped that such success will attend the shipping of the port as the Harbour Trustees shall speedily be enabled, from an accumulation of funds, to deepen and improve the South Harbour in such a manner as to render the Harbours of Peterhead, already the best on the east coast of Scotland, the admiration of the world. The South Bay is a great resort for windbound ships, and a safe retreat for vessels on any occasion except an easterly gale, is almost universally allowed to be the best situation for a Harbour of Refuge on the East coast of Scotland, and it is astonishing, amidst all the lavish expenditure of public money for numerous purposes constantly taking place, not to be spoken of in point of utility, compared with such an ob-

ject as a Harbour of Refuge, that a work of such magnificence and inestimable value should not at once be set about. Let us hope that at no distant period the powers that be will take into consideration this most desirable national object.

It is astonishing from what little beginnings great benefits occasionally flow, especially in works of public interest, when judiciously persevered in for the good of the community. In 1701 the Shore Dues of Peterhead were let to Peter Coutts and his Father at "ane huner an sevn marks," or L5 18s. 10<sup>2</sup>/<sub>3</sub>d. st. The Shore Dues of Peterhead now yield nearly £4000 yearly. If a Harbour of Refuge, taking in our beautiful South Bay, extending about a mile in length and 3 qrs. of a mile in breadth, so completely suited for the purpose, had been commenced 50 years ago, and only a few thousand pounds a-year been expended in the formation and necessary erections, it might have been the wonder of the world at this day.

As to the state of religion and education in Peterhead, we may offer a few remarks. The people are in the main of a church-going and religious cast. There is no want of churches or preachers. We have the Established Church, the Free Church, the Scottish Episcopal Church, the Roman Catholic Church, the United Presbyterian Church, the Congregational Church, the Independent (not in connection with the Union) Church, the Wesleyan Methodists' Church, besides itinerants of sundry denominations and orders.

With regard to Education, it is in a state of mediocrity, but far from what it ought to be. Had our ancestors shown the same interest and paid the same attention to forward Education as they did to promote the success of the harbours and the shipping

interest, the cause of education and the training of youth, might have been in quite a different position at this day; but it was not their taste. As it is, we have plenty of good teachers and schools, but the teachers being inadequately paid, and from want of method, classification, and arrangement, arising from one person having to teach numerous and discordant branches of knowledge, being driven to it from the inadequacy of the funds of the institution and the low rate of the fees payable by the scholars, it is impossible under such circumstances that education in any branch can be thoroughly imparted, or that the masters however capable or qualified, can acquire credit for their labours. Until the fees are raised and the teachers suitably requited and confined to particular departments, as in the most approved seminaries in other places, we can never look for a finished education in Peterhead, or the grade of our present scale to rise. The schools at present consist of the Parish School, the Academy, the Scottish Episcopal School, the Free Church School, and various seminaries for Young Ladies, at which the usual branches of a liberal education—comprising French, Drawing, and Music—are well taught, Besides several others, including Ragged and other Charitable Schools.

With regard to Markets, Peterhead has long and still is a great grain market, being the principal shipping port for the produce of the district of Buchan. We have two weekly markets, Tuesday and Friday, on which days, but particularly Friday, fish, fowl, and vegetables and other commodities are offered in abundance. Our butcher market has become first-rate, and there is always a plentiful supply at the different shops.

Peterhead is in the vicinity of numerous quarries,

the granite from which is famed for its beauty and durability, and resembles, more than any other rock in this country, the Egyptian granite or syenite. It admits of being highly polished, and great quantities of it used for ornamental purposes, now undergo that process. For many years there has been an extensive traffic carried on with the quarries, for we find that, from 1817 till 1822, there were no less than 34,583 tons of granite exported.

Of Public Buildings Peterhead has nothing to boast of as extraordinary. The principal building is the Town House, containing the Sheriff-court-room, and other apartments for public business. It is a fine building, 60 feet long by 40 broad, with a spire 125 feet in height. It contains a bell with an exquisite tone, and an excellent clock. The Established Church is a substantial building, with a spire 118 feet high. It will contain about 2000 persons. Some time ago subscriptions were taken up for placing a bell and clock in the spire. The subscriptions, however, were inadequate to the whole undertaking, and although furnished with an excellent bell, the spire is still without a clock. The Scots Episcopal Chapel is a very fine looking building, with a handsomely ornamented window of stained glass. The Free Church and the Roman Catholic Church are also fine buildings. The houses in general are handsome and substantial edifices, and being all built of granite, and some, of very superior workmanship, must be considered in the class of elegant and substantial structures.

Peterhead, as will appear from the preceding statement is in a state of rapid progress towards wealth and importance as a commercial town, and a few successful years of the Greenland and Herring Fisheries would produce a wonderful effect upon its future

destiny. As already said, there is a lack of taste to promote the cause of education and literature, and while we wish all success to the enterprise of the inhabitants in their trading concerns, we would earnestly entreat them to bestow a little more attention to the most important subject of education and the efficiency of their seminaries. It is contemplated to establish a weekly newspaper in the town. This will be of vast consequence, and undoubtedly lead to many improvements, and none more surely than to diffuse a taste for knowledge and literature.

## GREENLAND FISHERIES.

THE origin of the Whale Fisheries in the Arctic Seas must be ascribed to Pool, who went out in 1610 with the view of capturing the Walrus; and as he saw a great abundance of Whales, his employers next year sent out another vessel equipped for the Whale Fishing with Biscayan Harpooners,\* and

---

\* From the voyage of Othere in 890 we find that a species of the Whale was captured on the coast of Norway with considerable success, and it is quite natural to suppose that this formed a lucrative employment to the daring inhabitants at an earlier date. These northerners in their conquests on the coast of France, introduced the hunting of the Whale, which to the hardy natives formed at once a trade and a sport—there being in the Bay of Biscay an inferior specimen of the Whale attracted thither by the shoals of Herrings on which it feeds. These, however, were not captured for the value of the oil, which, in this species, is not very abundant, but for the flesh, which pleased the palates of our rude ancestors. The Biscayan Harpooners were therefore best qualified for the undertaking.

every thing thought requisite. They accordingly succeeded in taking a small whale that yielded 12 tons of oil, which is supposed to be the first that was ever caught in these seas. At that time the Whales were to be seen lolling on the face of the deep without any dread, and presenting themselves, as it were, to the stroke of the harpoon, so much so, that in 1697, 188 vessels fishing in one bay had on board the produce of 1959 fish. They soon, however, experienced a reverse of fortune. The Whales, pursued and killed in such vast numbers, learned to dread, and shortly after relinquished part after part of their native seas, and were every where compelled to give way before a power they could not otherwise escape. Followed thither by their pursuers, into the heart of the frozen fields, it then became so hazardous an undertaking, that the number of ships began to decrease, and comparatively few now attempt them, and with but indifferent success. In 1730, 25 vessels went out, and returned with only 12 fish; in 1775, 105 were sent out, and in consequence of their ill success, in 1781, the number had fallen to 39.

The Peterhead Greenland Fishing commenced in 1788, and for 14 years the "Robert" of 169 tons was the only vessel employed. The first ten years were very unsuccessful, owing, it is supposed, to the master and greater part of the crew who were Englishmen being bribed not to exert themselves, in case Peterhead should enter farther into the fisheries, which they had all along attempted to monopolise. They were, therefore on the point of giving it entirely up, when two gentlemen, Mr. James Arbuthnot and Mr. John Hutchison, suggested the propriety of manning the vessel with seamen and fishermen belonging to this place, which was done, and Mr. Geary, a native of Peterhead, received the command. The experiment more than exceeded the most sanguine expectations of the company,

and every succeeding year proved more successful than the former; the number of vessels rapidly increased, and have since been more successful than any other port.

We have, in accordance with our Prospectus, subjoined a list of the fishing ships, with their respective success for every year, and the average for each ship. It will be seen that of late their success has almost entirely depended on the Seals, which are caught in almost incredible numbers. The first that we have any correct account of being brought to Peterhead, was in 1803, when Captain Geary of the "Robert" brought 180, which were most likely killed for sport in leisure hours; they now form the principal part of our fisheries, some of late years being fitted out for them alone.

The following table shows the list of ships, with the master's names, and their respective successes every year from the commencement of the fisheries at this port:—

1788.

In the foregoing lists, the tonnage of the ships is inserted only on their first appearance, but their omission in other cases, it is hoped, will not prove any great inconvenience to the reader. In some cases, owing to the length of time that has elapsed, we had great difficulty in collecting the earlier years, and nothing certain in many cases, could be found, so that we cannot vouch for its being entirely correct.

# DIRECTORY.

---

## Town Council.

Roderick Gray, Esq., *Provost*.  
Alexander Anderson,  
Alexander Robertson, } *Baillies*.  
John Young.

Andrew Boyd, *Town-Treasurer*.

*Ladies' Private Schools*, Miss Anderson, Maiden Street ; Mrs. Engledow, Miss Hardie, and Miss Seller, Jamaica Street ; Miss Fraser, Charlotte Street.

*Dancing*, (two months a-year) William Balfour and William Scott.

## Mortifications.

### MR. WILLIAM RHIND'S.

The late Mr. William Rhind by his Deed of Settlement, placed £300 in the hands of the Bailies and Town Council of Peterhead ; and he ordained that they should apply £100 for the common good of the Town, and to vest the remaining £200 in the Common Funds, and to pay the Interest thereof at the rate of five per cent. perpetually to such Schoolmaster as they should think fit for the purpose of Education as specified in the Deed of Settlement.

### MR. THOMAS LAWRENCE'S.

An Annuity of £10, to be applied perpetually for the benefit of the Poor's School connected with the Academy in Peterhead, in terms of the Deceased's Settlement, and of a relative Deed executed by the Trustees, by which the Fund is vested in the Corporation, with power to superintend the application of the Annuity.

## MR. ADAM ARBUTHNOT'S.

Interest of £200 invested by Mr. Arbuthnot's Trustees in the Funds of the Harbours of Peterhead, in name of the Provost, Magistrates, and Council, as directed in his Settlement, for the Maintenance and Education of Orphans, and the Maintenance of Lunatics in the Town and Parish of Peterhead.

## THE ARBUTHNOT MUSEUM.

This very valuable collection of antiquities, curiosities, relics, &c., was bequeathed, *pro bono publico*, by the late owner, Adam Arbuthnot, Esq., who, at considerable labour and expense, gathered and classified the numerous articles therein included. It was placed in charge of the Provost, Magistrates, and Council soon after the death of the benevolent and public-spirited donor, and under their fostering care, bids fair to increase in value. Open every lawful day from 10 A.M., till 4 P.M., in the Corner Buildings, Union Street.

*Keeper*, William Elrick.

---

## Legal Department.

*Solicitors and Notaries Public*, Roderick Gray, Alexander and Anderson, Keith Forbes, Andrew Boyd, Alexander Robertson, T. J. Bremner, William Spence, William Gamack, John Anderson, William Boyd.

*Distributor of Stamps*, Thomas Knox.

# ADVERTISEMENTS.

## The Northern ASSURANCE COMPANY.

ESTABLISHED 1836.

Incorporated by Act of Parliament.

---

### HEAD OFFICES :—

ABERDEEN: 3, King Street.

EDINBURGH: 20, St. Andrew Square.

GLASGOW: 19, St. Vincent Place. LONDON: 1, Moorgate St.

---

**T**HIS Institution was established in 1836, since which period its business has been extensively prosecuted throughout Scotland, England, and Ireland, with marked success.

In 1848, the Act of Parliament 11 and 12 Vic. cap. 46, was granted for the Incorporation and Constitution of the Company, and to regulate its affairs.

The CAPITAL of the Company is ONE MILLION STERLING, and the number of proprietors is nearly ONE THOUSAND, for the most part individuals of standing and influence in Scotland. The protection and security thus afforded to the Assured are therefore *absolute*.

The number of Life Policies issued exceeds FOUR THOUSAND, covering Assurances to the extent of **One Million and a Half** STERLING.

## THE BUSINESS OF THE COMPANY

Embraces every description of risk contingent upon life, more especially—The granting Assurances for fixed or increasing sums from £20 upwards, on single and joint lives of all ages, either for the whole term of life, immediate and deferred, or for short periods, and with or without participation in profits; the sale of ANNUITIES, Immediate, Deferred, or Survivorship; and the granting of ENDOWMENTS.

---

*The following are a few of the advantages offered by this Company :—*

**PERFECT SECURITY.**—The engagements of the Company being guaranteed by a large PAID UP Capital and Accumulated Fund, and Proprietary of about ONE THOUSAND Partners of influence and respectability.

**MODERATE RATES OF PREMIUM.**—The varied and comprehensive Tables of the Company being so framed as to suit the convenience and circumstances of every class of persons assuring, whether as a provision for their families, or as a collateral security in pecuniary transactions; on comparison with those of other offices they will be found particularly favourable to the assured.

**THE NON-PARTICIPATION SCHEME** which is founded on the lowest rates consistent with perfect safety, and is calculated to meet the views of those who prefer the present advantages of reduced Premiums to a prospective Bonus, or as a collateral security in pecuniary transactions.

**THE PARTICIPATION SCHEME**, in which the profits *wholly belong to the Assured*, who are moreover guaranteed by the Proprietors of the Company against all risk of loss, while the expenses of management are restricted to TEN PER CENT. upon the Premiums paid, without any other charge whatever. It is conceived that this is the only perfect mode of combining the advantages of a Mutual Assurance Society with the stability and economy of a Proprietary Company; and, judging from the large return of Profits made to the holders of Policies in this branch at the first and second investigations, the Assured may look forward to increased advantages at succeeding periods of division.

The Second Investigation was made on 30th April, 1851, when a Bonus was declared which averaged from 26 to 68 per cent. on the premiums paid by middle-aged lives.

NO ENTRY MONEY charged beyond the Policy Stamp.

MEDICAL REPORTS paid for by the Company.

POLICIES INDISPUTABLE unless obtained by fraudulent or intentional misrepresentation, or concealment.

CLAIMS paid Three Months after proof of death.

---

### RATES OF PREMIUM.

Premiums can be made payable in any of the following modes, or otherwise to suit the convenience of the Assured:—

By uniform *Annual Payments* during life.

By *Single Payment*.

By *Payments to cease on the party attaining a given age*,

By *increasing or decreasing Payments*.

All Premiums may be paid yearly, half-yearly, or quarterly.

---

### Fire Department.

The Company insures Dwelling Houses, Manufactories, Rents, Furniture, Goods, and Merchandize ; Shipping in Port or in Dock, and while building or repairing ; and other property from loss or damage by Fire.

---

FARM STOCK and CROP insured *in cumulo*, in Scotland, on one Farm, without the average clause, at 3s. per cent. per annum.

---

N.B.—No charge is made for Policy stamp when the Sum insured amounts to £200—or on Transfers from other Offices.

---

*Losses by Fire from Lightning made Good, and all Claims Settled with promptitude and liberality.*

---

Forms of Proposal, full tables of Rates, and all requisite Information will be furnished at the Head Offices and Agencies throughout the Country.

---

AGENTS IN PETERHEAD :—

MESSRS.

AND

**James Hutchison, Auctioneer.**

# THE HOPE MUTUAL

## Life Assurance & Honesty Guarantee Society.

---

**L**EGALLY Incorporated. Guarantee Fund, £100,000.  
Principal department, 4, Princes Street, Bank, London.

---

### BOARD OF MANAGEMENT.

#### Chairman.

Henry Morgan Vane, Esq., Jermyn Street, St. James.

#### Vice-Chairman.

Rev. James Wm. Massie, D.D. LL.D. Upper Clapton.

---

Mr. Serjeant Allen, Serjeants' Inn, and "The Elms," Crawley, Sussex.

Charles De Bergue, Esq. Dowgate-hill, and Blackheath.

R. Douglass, Esq. Carey Lane, and Stoke Newington.

Lewis Glenton, Esq., Glenmour Terrace, Blackheath.

Henry Philip Hope, Esq., Official Assignee, District Bankruptcy Court, Leeds, and Osmond Thorpe Hall.

Charles Geo. Knox, Esq., LL.D., Stone-buildings, Lincoln's-inn, and Consistorial Court, Arthur Street, Belfast.

Walter F. Robinson, Esq., F.R.G.S., Air Street, Piccadily.

Robert Theobald, Esq., Paternoster Row, and Kentish Town

William White, Esq., (Messrs. White and Son,) Cheapside.

Thomas Wheelwright, Esq. M.D., Philimore Place, Kensington.

*General Manager*—Henri Christopher Eiffe, Esq.

#### Auditors.

Rice Hopkins, Esq., C.E., Parliament Street, Westminster.

Wm. Kent, Esq., Paternoster Row, and Norwood.

Arthur Mee, Esq., F.I.B.A., Pall Mall.

**Medical Officers.**

Campbell De Morgan, Esq., Upper Seymour Street.  
 Nicolas Parker, Esq., M.D., Finsbury Square.  
 Prior Purvis, Esq., M.D. Greenwich.  
 Edw. Johnson, Esq., Regent St. and Clapham.

**Bankers.**

Messrs. Barclay, Bevan, Tritton, & Co., Lombard Street.

**Solicitors.**

Messrs. Terrel & Chamberlain, Basinghall Street.

The Directors, being well aware of the benefit arising from Insurance, deem it unnecessary to offer any comment on its expediency and immense utility; and the great support rendered to their Establishment has given a flattering earnest that the public are not unmindful of the broad basis on which, from its starting, their Society has founded its claims to support and encouragement, namely, of being intimately allied with the provident interests of the country, and aiming to give back to the assurers, in bonuses, the vast sums hitherto passed into the hands of shareholders and proprietors.

Policies can be effected in any *one* day at the HEAD Office; and with considerable promptness and facility, through any of the branches of the Society's operations.

N.B.—The distinguishing features of the "Hope Mutual" are LIBERALITY in all its operations, WITH THE MOST AMPLE SECURITY.

*By order,*

**HENRI CHRISTOPHER EIFFE,**

GENERAL MANAGER.

Loans made to Policy Holders.

Prospectuses, Forms for Proposal—in Life, Guarantee, Endowments and Loan, may be had of the Manager's Correspondent at PETERHEAD:—
