## Licuienant GEORGE KPEARING.

ON Hedrosdny laet, betwcen the hours of $\%$ sind $40^{\circ}$ clock afternoon, I weit into a littlo wool, called Northwoodside, situated betweese 9 and $\%$ miles to the south-west of Glasyow, witt a defign to cabler a few hazel nuts-1 had wot been in the woudrabove 15 minties, nor gatliered more than ten buis, before I unfortunately foll into an old coalpit, exactly of feet deep. which had been made through a solid rock. On secorering my recollection, 1 found myself sitting :enciy yas a tailor does at his work, the blocit towing very fast fiom my moith. I thought 1 bad broken a blood vesael, and consequeitly, flad not long to live; but, to my great cumfort. I soon discovered that the brodypocected froun a wound in uy tongue, which I suppozed I had bitten in say fall. Looking at my watch, is wax ton minates fast four; and gettingup, f surneyet iny imbs, and, to my inexprescible joy, fodut that no one of then was broken. I was soon r. emented to my situation, having from my chiin.Thwod theught that somechiag very extracrdizury

Night appraached, when it boran to rainh, not in gente showers but in torrents, such as at the autunamh equinox. The pis was about 5 feet in diameter, but not haviag besu worked for several years, the subterraneous pasages were chower up, with sioall intermissions, till the day of wy release, and in a very short time I was ath oper wet.
In this comfortess contition 1 endervonsh io the some repose. of forked nt ak which I fourd in the pit, I place! diturad!ly to the side ot it, which served altemately to sheport my head is a bilow, or my bodyoccasionally, which was much. wruised; but; in the whole time 1 remanel heme, I do met think that ever I sle; : an hom together. Having passed a very disagreeable and tculut.a night, I vas somewhat cheored with the aphearance of day lighte. and the melody of a velin" ameast, that had perched dircetly over the mout? of the pit and this pretty lithle wablergoninued So risit my quartery every moming during may confinement; mhich I constmet intor hapy drien of my delivatace. 2I luamot-say I sbiftered suich from hanger; sifor two or three deys my appetite ceased, bit' iny itrirst was intolerable; and though it whost constantly rained yet I coule not, till the third or Forrth day preserve a drop of it; as the eantlatio the bottoin of the pit sucked it up as fase as it ram durken. In this distress I sucked my clothes ; but ion them I couth ext:act bat littie meisture. Lhe shock I reeeiveri in the fall together with the disfucation of one of my ribs, kept me, I hingine na a continual fever; I cannot otherwise account lor my suffering so much more from thirst tban 1 diid from hanger: At last I discovered the thigh thene of a bull almost covered with earth, which 1 was afterwards informed, fell into the pit is yeuts before me. I dug it ap, and the large end ifit left a eavity that, 1 suppose, might centain a quart. This the water gradually dran io, Wint so very slowly, that it was a ennsiderablo dine wefore I could dip a nutshell fall at a tiow which Hernutied into the palm of nay hand, and sodrand it 'Une water now began to increase protty fan. -o that I was very glad to enlarge my reservoif, Gamech, that out the 4thor 5 th day, il had a suffi. aent supply; and this water was cettrimy the - preservation of my hif.

These nox ouscientives * mal frequently crawl about me, and oftorot inte my reservort; nevertheless, I thought it whe sweefest water I had ever tasted; end, at th in dras: tunce of time, the remembrance of it is so swet, thaf, were it now pasible to oltain any of it, I am sure I could swallow it with gwithey. ; have requently taken both fregs and topds out of isy neck, where, I suppose they took shater inhite ir selet. The touds I always destroyed; but the fegn I eurefully preserved, as I tidi net know fotitil might he inder the necossity of eating them, shonld thot have scrupled to have dotio, tiad I geen very hangry.

Sunday the 7 fth was my birth ilayo-when I eospleted my 4 list yeary and 1 thinh it was the nest day that soric of my aequaintances, harizu acwidertally heard that I had gone the way I did, seat two or three porters out purpossoly to seareh the pits for me. 'These men verat to the milles?'s hysse, ard made enquiry for ate; but:, on ed count of the great ran at the time, they never - etered the wood, but aruelly retwineal to theic

Gay afiernonis, and when I had been six nights in the pit, I very composedly, by way of amusewent, fell to combing my wig upon my knee, fuming a thine, att thinking on Archer ia the play called tie Dent St metage.

At hath the mowing, Spender eth, the haply mormon for my deliverance came! a day, that while my feretory lasts, 1 will always coleirate with gratitude to heave a. Through the brambles an thales that covered the mouth of the pit, I could deco er the sun shining bright, and my prewar wailer was chanting his melodion us stratus, when my attention was roused by $a_{s}$ confused mons of human voices, which seemed. to be approanhof fist towards the pit. Immediatty I called out, and most agreeably surprise d many, of my acquizintance, were in search of roe n Asiacon as they heard my rote, they all rus towards the pit, and li could distinguish a wo l horn voice exam, 'Good God! he is still living s A mother of ulm? a very honest North Briton, betaine histsuraiec and joy, could ines. help asking lac, in tat lifjemian style, it 1 was still living?
