PREFACE

THE following Compilation has been prepared as an introduction to the Study of Geography, for the use of the Younger Classes in the Institution with which the Author is connected; but it is hoped that it may also serve to supply the place of larger and more expensive works in schools where only a limited portion of time can be devoted to this branch of education. The larger Text-books to which chiefly it is meant to be introductory, are Ewing's System of Geography, Stewart's Compendium of Modern Geography, and the Outlines of Geography for the Use of the Edinburgh Academy. In imitation of the last of these, the names of places in the text have been accompanied with short able event, by which the labour of the Pupil in preparing his lesson is much diminished, and greater interest is excited during the examination upon it in the class, than could be effected by the repetition of a mere list of names. Following the method adopted in the works of Ewing and Stewart, there have been appended to the several countries notices of the physical geography, cessarily very brief; but the Author has endeavoured to make them embrace as much as possible of that kind of information which is interesting to the minds of the young, and to which a skilful teacher will readily add by oral instruction. To guide to the correct pronunciation of names of places, they have been accented according to the best authorities which the Compiler

In the Appendix will be found an Outline of Ancient or rather of Comparative Geography, designed to assist younger classes in the study of Ancient History. The Outline of Sacred Geography is meant to facilitate their understanding of Scripture History. As many problems on the Globes have been given as appear to be really useful in elementary schools. The Directions for the construction of Maps have been added, to enable Pupils to perform with greater accuracy an exercise, which at once increases their acquaintance with Geography, and fixes it in their minds; namely, the delineation, on a board or on paper, of the outlines and principal features of those countries, the places and description of which they are studying. To these Directions is appended a Table, showing the length of a degree of longitude on any parallel of latitude between the equator and the poles-The heights of the principal mountains, the lengths of the rivers, and the population of the chief cities, have also been arranged in Tables, to which reference can easily be made when they occur in the lessons.

It remains to be observed that, except for the Problems on the Globes, no Questions or Exercises have been given. The Author is of opinion that, in an elementary work of this kind, it is better to leave these to the judgment of the Teacher, who can more efficiently exercise the intellectual powers of his Pupils and promote their progress, by examinations of his own adapted to their various capacities and proficiency, than could be accomplished by their merely seeking out answers to printed questions. On this subject he would only take the liberty to suggest, that he is in the practice, in his own class, of varying the examinations upon the lessons in the following manner, -by pointing to the places on the map, and asking their names, their situation as described in the Text-Book, and for what they are remarkable, -by naming the places, and causing the Pupils to point them out on the map, -and by describing the situation of the places, and for what they are remarkable, and then asking their names,

RUDIMENTS

OF

MODERN GEOGRAPHY.

INTRODUCTION.

GEOGRAPHY is a description of the earth.

Geography, as a science, treats of the form, magnitude, and motions of the earth, and of its artificial, natural, and political divisions.

The form of the earth is nearly that of a sphere or globe.

The earth is somewhat flattened at the poles, the measure through the centre from north to south being about 26 miles shorter than that from east to west.

The circumference of the earth, or its measure round about, is 24,897 miles.

The diameter of the earth, or its measure from side

to side through the centre, is 7924 miles.

The earth has two motions, the one round the sun, and the other round its own axis.

The motion of the earth round the sun produces the seasons, and measures the length of the year; the motion round its own axis produces day and night. The course

or path of the earth round the sun is called its orbit.

The axis of the earth is an imaginary line passing through the centre from north to south.

The extreme points of the earth's axis are called the north and south poles.

The equator is a circle passing round the middle of the earth, at an equal distance from the two poles.

The equator, and all other geographical circles, are, for the convenience of fixing the position of places and measuring their distances, divided into 360 equal parts called degrees (**); each degree is subdivided into 60 minutes (**); and each minute into 60 seconds (**).

The equator divides the globe into the northern and southern hemispheres.

Latitude is the distance of a place north or south from the equator.

Circles drawn parallel to the equator are called parallels of latitude.

The four remarkable parallels of latitude are the arctic circle, the antarctic circle, the tropic of Cancer, and the tropic of Capricorn.

The arctic and antarctic circles and the tropics divide the globe into five zones; the torrid zone, two temperate zones, and two frigid zones.

The torrid zone is between the tropics; the temperate zones are between the tropics and the polar circles; and the frigid zones are between the polar circles and the poles.

The lines drawn from pole to pole are called meri-

dians.

The circle formed by two meridians divides the globe into eastern and western hemispheres.

Longitude is the distance of a place east or west from the first meridian.

The first meridian is that which passes through the Royal Observatory at Greenwich.

The ecliptic is a circle round the middle region of the globe, corresponding to the sun's path in the heavens.

The cellptic marks the line along which the sun's rays are vertical in the course of the year. It is divided into 12 parts called aigna; which are thus named and represented by characters: Aries, the Ram ??; Taurus, the Bull S; Geminit to Twins II; 'Cancer, the Crab ZF; Leo, the Lion §1, ;

Virgo, the Virgin mg; Libra, the Balance △ ; Scorpio, the Scorpion M; Sagittarius, the Archer ‡; Capricornus, the Goat 18; Aquarius, the Water-bearer ﷺ; Pisces, the Fishes ∺

The zenith is that point in the heavens which is directly over our heads,

The nadir is the point exactly opposite to the zenith.

The circle equally distant from the zenith and the nadir is called the rational horizon.

The sensible horizon is the circle which bounds the view, where the earth and the sky appear to meet.

The figure of the earth, with its divisions, is represented by the artificial terrestrial globe.

On the artificial globe, latitude is marked on the brazen meridian, and longitude on the equator.

A map is a representation of the whole earth, or of a part of it, on a flat suaface.

The top of a map is the north; the bottom, the south; the right-hand side, the cast; and the left-hand side, the west. In a map of the world, longitude is marked on the equator, and latitude on the circles that contain the two hemispheres. In maps of particular countries, longitude is marked at the top and the bostom, and latitude at the sides.

The surface of the earth consists of land and water.

The water occupies more than two-thirds of the surface

of the earth.

The principal divisions of the land are continents.

islands, peninsulas, isthmuses, and capes.

A continent is a very large portion of land.

An island is a smaller portion of land altogether surrounded by water.

A peninsula is a portion of land almost surrounded by water.

An isthmus is a narrow neck of land joining two

continents, or a peninsula and a continent.

A cape is a portion of land stretching into the sea.

A portion of land stretching into the sea is also called a promontory, head, point, or ness.

The principal divisions of the water are oceans, seas, lakes, gulfs, bays, straits, and rivers.

An ocean is a very large portion of salt water.

A sea is a smaller portion of salt water.

A lake is a body of water altogether surrounded by

land.

A gulf is a portion of water almost surrounded by land.

A bay is a portion of water running into the land, with a wider opening than a gulf.

Small portions of the sea running into the land, or sheltered by it, are also called ports, havens, harbours, crecks, and roads.

A strait is a narrow passage joining two seas.

When a strait is so shallow that it may be fathomed, it is called a *sound*. A longer and broader passage between two seas is called a *channel*.

A river is a stream of fresh water falling into a sea or lake.

The mouth of a river, when it widens into an arm of the sea, is called an estuary or frith.

The land on the surface of the earth is divided into five continents; namely, Europe, Asia, Africa, North America, and South America.

The land is also divided into four unequal parts called quarters; namely, Europe, Asia, Africa, and America. According to another division, it is formed into six parts, Europe, Asia, Africa, North America, South America, and Austradasia; the last comprehending Australia and the adjacent islands. The islands in the Pacific Ocean are recknord as eventh part, called Polymeria.

Europe, Asia, and Africa are sometimes called the Eastern Continent or Old World; and North America and South America, the Western Continent or New World.

Asia lies to the east of Europe. Africa lies to the south of Europe, and is separated from it by the Mediterranean

Sea. America lies to the west of Europe and Africa, and is separated from them by the Atlantic Ocean. Australiasia, as its name implies, lies to the south-east of Asia. Polynesia signifies many islands.

Europe, Asia, North America, more than the half of Africa, and a small part of South America, are to the north of the equator; the remainder of Africa and the greater part of South America, are to the south of it. Australasia is to the south, and Polymesia on both sides of the equator.

The water on the surface of the earth is divided into five oceans; viz. the Northern Ocean, the Southern Ocean, the Atlantic Ocean, the Pacific Ocean, and the Indian Ocean.

Properly speaking, there is only one ocean, which is naturally divided into two parts: the great Eastern Basin, comprehending the Southern, Pacific, and Indian Oceans; and the great Western Basin, comprehending the Northern and Atlantic Oceans.

The Northern Ocean lies round the north pole; the Southern Ocean, round the south pole; the Atlantic between Europe and Africa on the one side, and North and South America on the other; the Pacific, between America and Asia; and the Indian Ocean, to the south of Asia, and between Africa and Australia.

The Pacific Ocean is the largest, occupying nearly half the globe.

The political divisions of the earth are empires, kingdoms, and republics.

An empire consists of several countries united under one sovereign, who is usually styled an emperor.

A kingdom is a country governed by a king.

Church, and 60 or 70 millions are Protestants.

A republic is a country which is governed by rulers chosen by their fellow-citizens.

The population of the earth is supposed to be above 890 millions. Of these a third part are Christians, about a sixth Mohammedans, four or five millions Jews, and the remainder Pagans. Of the Christians, about 139 millions are Roman Catholies, 62 millions are of the Greek

EUROPE.

BOUNDARIUS.—North, the Northern Ocean; West, the Atlantic Ocean; South, the Mediterranean Sea, the Archipelago, the Sea of Marmora, the Black Sea, the Sea of Azoph, and Mount Caucasus; East, the Caspian Sea, the river Ural, and the Ural Mountains.

Peninsulas.—Jut'land, in Denmark; More'a, in Greece; Crim'ea, in the south of Russia.

ISTHMUSES.—Isthmus of Cor'inth, joining the Morea to the north of Greece; Isthmus of Per'ekop, joining the Crimea to Russia.

Cares.—North Caps, in Lapland; Naze, in the: south of Norway; Slaze, in the north of Denmark; Dunicantisys-hood, in the north of Scotland; Cape Clour, in the south of Ireland; Land's End, in the south-west of England; Caps to Hoyae, in the north-west of: France; Caps Ortogad, and Caps Finiterry, in the north-west of Spain; Caps & Vies cent, in the southwest of Portugal; Caps Spartisen to; in the south of: Italy; Caps Matapan, in the south of Green

MOUNTAINS.—Alps, separating Italy from Germany, Switzerland, and France; Pyroness, between France and Spain; Ap'enwines, in Italy; Hae'mus or the Bal'kan Mountains, in Turkey; Carpa'thian-Mountains, in Austria; Dof'rine or Dov'refield Mountains, in Norway; the Ko'len Mountains, between Norway and Sweden; U'ral Mountains, between Europe and Asia.

SEAS AND GULFS .- White Sea, in the north of Russia; Ska'ger Rack, between Denmark and Norway; Cat'tegat, between Denmark and Sweden ; Bal'tic, between Sweden on the northern side, and Germany, Prussia, and Russia, on the southern; Gulf of Ri'ga, and Gulf of Fin'land, in the west of Russia; Gulf of Both'nia, between Sweden and Russia; North Sea or German Ocean, between Great Britain and the Continent : St George's Channel and Irish Sea, between Great Britain and Ireland; English Channel, between England and France: Bay of Bis'cay, on the west of France and north of Spain; Mediterra'nean Sea, between Europe and Africa; Gulf of Ly'ons, in the south of France ; Gulf of Gen'oa, in the north-west of Italy ; Gulf of Tar'anto, in the south of Italy ; Adriat'ic Sea, between Italy and Turkey; Archipel'ago, between Greece and Turkey in Asia; Sea of Mar'mora, between Turkey in Europe and Turkey in Asia; Black Sea, between Russia and Turkey in Asia; Sea of Az'oph, in the south of Russia.

STRATTS.—Straits of Waigast, between Russia and Nova Zemblas, Sound, between Sweden and Zealand; Great Belt, between Zealand and Funen; Little Belt, between Funen and Jutland; Straits of Deer, joining the German Ocean and the English Channel; Straits of Gibratlars, joining the Alaninic and the Mediterranean; Straits of Bonifecio, between Corsica and Sardinia; Straits of Measina, between Italy and Sicily; Heltergoni or Dardmeller, joining the Archipeland and the Sec of Turmons; Straits of Constantino ple, and the Sec of Turmons; Straits of Constantino ple, of English Straits of Constantino ple, of English Straits of Constantino ple, and the Sec of Straits of Constantino ple, of English Straits of Constantino ple, and the Sec of Azoob.

Lakes.—Lake La'doga, and Lake One'ga, in Russia; Lake Wen'er, and Lake We't'er, in Sweden; Lake of Gene'va, in Switzerland; Lake of Con'stance, between Switzerland and Germany.

RIVERS .- The Ta'gus, in Spain and Portugal, falls into the Atlantic Ocean; the Ebro, in the north-east of Spain, falls into the Mediterranean Sea : the Rhone, in the south of France, falls into the Gulf of Lyons : the Loire', in the west of France, falls into the Bay of Biscay; the Seine, in the north of France, falls into the English Channel: the Thames, in the south of England, falls into the German Ocean; the Rhine, in Switzerland, Germany, and Holland, falls into the German Ocean; the Elbe, in Germany, falls into the German Ocean; the O'der, in Prussia, and the Vistula, in Poland and Prussia, fall into the Baltic Sea; the Dnie per, in Russia, falls into the Black Sea; the Don, in Russia, falls into the Sea of Azoph; the Volga, in Russia, falls into the Caspian Sea; the Dan'ube, in Germany, Austria, and Turkey, falls into the Black Sea: the Po, in the north of Italy, falls into the Gulf of Venice.

CAPITALS.—I. London; 2. Eddinburgh; 3. Dub'. Iln; 4. Par'is; 5. Madrid'; 6. Lis'bon; 7. Brus'sels; 8. Am'sterdam; 9. Frank'fort; 10. Copenhagen; 11. Christia'nia; 12. Stock'holm; 13. St Pe'tersburg; 14. War'saw; 15. Berlin'; 16. Vier'na; 17. Berne; 18. Rome; 19. Constantino'ple;: 20. Ath'eus.

Europe extends from 36° of to 71° 10° N. Int.; and from 9° 30′ W. to 68° of E. long. Length, from Cape Phisterer in Spain to the eastern termination of Mount Caucaus on the shores of the Caspian Sea, 5000 miles; breadth, from Cape Matapan in Greece to the North Cape it Laphand, 2400 miles. Extent, 3,000,000 square miles. Population, about 240 millions, 800,000 square miles.

Europe is the smallest but the most important of the grand divisions of the earth, its inhabitants being superior to those of every other part of the world in civilisation, arts, manufactures, commerce, literature, and science. The form of government in most of the leading states is limited monarchy; and the Christian Tedgion prevails in every country, except Tuzkey, which is Mohammedan. The following are the political divisions of Europe 3.

BRITISH EMPIRE, comprehending England, Scotland, and Ireland: FRANCE: SPAIN: PORTUGAL: BEL-GIUM; HOLLAND; GERMANY, comprehending Saxony, Bayaria, Hanover, Wurtemberg, and a number of small principalities; DENMARK; SWEDEN, including Norway: Russia, including the modern kingdom of Poland; PRUSSIA, comprehending Prussia Proper, part of Germany, and part of Poland; Austria, comprehending Hungary, part of Germany, part of Poland, and part of Italy: SWITZERLAND: ITALIAN STATES, comprehending the States of the Church, the Grand Duchy of Tuscany, and several smaller principalities; Two Sici-LIES, comprehending the kingdom of Naples and the island of Sicily; SARDINIA, comprehending the northwest of Italy and the island of Sardinia: TURKEY in Europe; GREECE.

ASIA.

BOUNDARIES.—North, the Northern Ocean; West, the river Ural, the Ural Mountains, the Caspian Sea, Mount Caucasus, the Black Sea, the Sea of Marmora, the Archipelago, the Mediterranean Sea, the Isthmus of Suez, and the Red Sea; South, the Indian Ocean; East, the Pacific Ocean.

COUNTRIES.—1. TUE'KEV IN ASIA; 2. ARA'MIA; 3. Pen'sia; 4. Afghan'istan; 5. Hindostan'; 6. Eastern Penin'sula; 7. Chi'na; 8. Thin'er; 9. Eastern or Chinese Tar'tary; 10. Western or Indefenpent Tar'tary; 11. Russia in Asia; 12. Japan'.

Islands—In the Levant, Cyprus; southward from Hindestan, Ceylow; southward from the Eastern Peninsula, Sumatra; eastward, Java, Borneo, Celeba, the Molucosa or Spice Islands, New Guinea; southward from New Guinea, Australia and Van Dielemes; Land; north-east from Borneo, Philippine Islands; northward, Formous; eastward from Chinese Tartary, Japan Islands; south-east from Australia, New Zeviland; northward, the Friendly Islands; eastward, the Society Islands; northward, the Sandwich Islands. PENINSULAS.—Kamtschat'ka, in the east of Siberia; Core'a, in the south-east of Chinese Tartary; Malac'ca or Malay'a, in the south of the Eastern Peninsula.

CAPEX.—Cape See'ero, or North-east Cape, in the north of Siberia; East Cape, at Behring's Straits; Cape Lopat'ka, in the south of Kamtschatka; Cape Cambo'dita, and Cape Roma'nia, in the south of the Eastern Peninsula; Cape No'grais, in the south of the Birman Empire; Cape Com'orin, in the south of Hindostan.

MOUNTAINS.—Himbaleh or Himalay'a Mountains, in the north of Hindostan; Altai'an Mountains, in the south of Siberin; Mount Cau'casus, between the Black Sea and the Caspian; Mount Tau'rus, and Mount Led'anon, in Turkey in Asia; Mount Ar'arat, in Armenia; Mount Si nat, in Arabia.

STRAITS—Straits of Babelmandch, joining the Red Sea and the Indian Ocean; Straits of Ormus, joining the Persian Gulf and the Indian Ocean; Palk's Channel and the Gulf of Manaer', between Hindostan and Ceylon; Straits of Malac'ca, between the Eastern Peninsula and Sumatra; Straits of Sun'da, between Sumatra and Java; Straits of Macas'an, between Borneo and Celebes; To'res' Straits, between New Guinea and Australia; Bas's Straits, between Australia and Van Diemen's Land; Belvring's Straits, between Asia and North America. LAKES.—Cas'pian Sea, on the north of Persia; Sea of A'ral, in Independent Tartary; Lake Bai'kal, in the south of Siberia; the Dead Sea, in Tarkey in Asia.

RIVERS.—The Euphra'tes, uniting with the Ti'gris, in Turkey in Asia, falls into the Persian Gulf; the In'dus, in the north-west of Hindostan, falls into the Indian Ocean; the Gan'ges, and the Brahmapoo'tra, in the north-east of Hindostan, fall into the Bay of Bengal; the Irrawa'dy, in the Eastern Peninsula, falls into the Bay of Bengal; the Maykiand or Cambo'dia, in the Eastern Peninsula, falls into the Chinese Sea; the Yang-tse-kiang or Kianku, and the Hoangho, in China, fall into the Pacific; the Amoor' or Sagha'lien, in Chinese Tartary, falls into the Sea of Ochotsk; the Le'na, the Yen'isei, and the O'bi, in Siberia, fall into the Northern Ocean; the U'ral, in the south-west of Siberia, falls into the Caspian Sea; the Jihon or Ox'us, and the Si'hon or Jaxar'tes, in Independent Tartary, fall into the Sea of Aral.

Capitals.—1. Smyr'na; 2. Mec'ca; 3. Teheran'; 4. Cabul'; 5. Calcut'ta; 6. A'va; 7. Pekin'; 8. Las'sa; 9. Cash'gar; 10. Bokha'ra; 11. Tobolsk'; 12. Jed'do.

Asia extends from 1° 20′ to 78° N. lat., and from 26° to 190° E. long. Length, from the mouth of the Darda-nelles to the Islands of Japan, 6000 miles; breadth, from the south of Malacca to Cape Severo in Siberia, 5300 miles. Extent, including the islands, 20,000,000 square miles. Population estimated at 460 millions.

Asia is the largest and most interesting of the great divisions of the globe. In this quarter of the world, man was created, the chosen people of God were settled, and the Redecemer suffered and died: here also flourished three of the great empires of antiquity. At present, the governments of Asia are generally despotic; and the prevailing forms of religions are idolary and Mehammedation are

ISTEMUS.—Su'ez, joining Africa and Asia, and separating the Red Sea from the Mediterranean.

Capes.—Cape Bon, and Cape Spartel, in the north; Cape Blanco, and Cape Verde, in the west; Cape of Good Hope, and Cape Agulhas, in the south; Cape Guardafui, in the east.

MOUNTAINS—Mount Atlas, in the west of Barbary; Mourerons, of Mong, in the south of Nigritia; the Cameroons, opposite Fernando Po; Mountains of the Moon, south-west from Abyssinia; Mountains of Lupot'as, on the west of Mozambique and Zanguebar; Peak of Teneriffe, in the Canaries.

Gulfes and Bars.—Gulf of Sidra, and Gulf of Cabes, on the north; Gulf of Guin va, on the west; Saldanha Bay, Table Bay, and False Bay, on the south; Delago'a, on the east; Channel of Movambique, between the mainland and Madagasca.

LAKES .- Lake Tchad, in Nigritia; Lake Dembea,

in Abyssinia; Lake Mara'vi, near the mountains of Lupata.

Rivers.—The Nile flows through Abyssinia, Nubia, and Egypt, into the Mediterranean; the Sweigad, in the north, and the Gam'sia, in the south of Senegambia fall into the Atlantic Ocean; the Nilger or Quor'ra flows through the west of Nigritia and the cest of Upper Guines into the Gulf of Guines; the Zaire or Conjo, and the Comaza, flow through Lower Guines into the Atlantic; the Orange, flows through the north of the country of the Hottentos, into the Atlantic; the Eamber's Cudéma, flows through the south of Mozambique into the Indian Ocean.

CAPITALS.—1. Cai'm; 2. Trip'oli; 3. Tu'nis; 4. Algiers'; 5. Moroeco; 8. St. Sal'wador; 9. Cape Town; 12. Mozambique'; 16. Gon'dar; 17. Sennaar'; 19. Mour'zouk; 20. Se'go, Timbuc'too, Sack'atoo, Kou'ka, Cob'be.

Africa extends from 37° 20′ N. to 34° 50′ S. lat.; and from 17° 30′ W. to 51° 20′ E. long. Length, from the Cape of Good Hope to the Mediterranean, nearly 5000 miles; breadth, from Cape Verde to Cape Guardafui, about 4800 miles. Extent, 12,000,000 square miles. Population estimated at 70 millions.

Africa is the least known of the great divisions of the Egypt, and some of the other countries in the north, attained a high degree of refinement in ancient times: but the civilized world was scarcely acquainted with the west, south, and south-east coasts, till the fifteenth century; and it was not till very lately that travellers were able to make their way into Central Africa. The greater part of the southern interior still remains unexplored. Although large tracts of the African continent are occupied by deserts of sand, the soil, wherever there is sufficient moisture, is fertile, and vegetation very luxuriant, Africa is inhabited by several distinct races of people: the Moors in the north, the Negroes in the middle, and the Caffres and Hottentots in the south. Nearly the whole of them are in a state of barbarism : they are totally unacquainted with civil liberty, and are either Mohammedans or idolaters.

NORTH AMERICA.

BOUNDARIES.—North, the Northern Ocean; West, the Pacific Ocean; South, the Pacific Ocean, the Isthmus of Darien, and the Gulf of Mexico; East, the Atlantic Ocean.

COUNTRIES.—1. BRITISH AMER'ICA; 2. INDIAN COUNTRIES; 3. RUSSIAN AMER'ICA; 4. UNITED STATES; 5. MEX'ICO; 6. GUATEMA'LA OF CENTRAL AMER'ICA.

Islands.—In the Atlantic, West Indies, Bermudas, Cape Breton, Prince Edward Island, Newfound land; north-cast from British America, Greenland; in the Northern Ocean, the North Georgian Islands; in the North Pacific, the Aleutian Islands.

PENINBLIAS.—No'ea Scotia, in the south-east of British America; Florida, in the south-east of the United States; Yu'catan, in the south-east of Mexico; California, in the west of Mexico; Alas'ka, in the south-west of Russian America.

Scotland extends from 54° 26' to 58' 40' N. lat; and from 1° 46' to 6' 5' W. long. Length, from Cape Wrath to the Mull of Galloway, 276 miles; breadth, from Buchan Ness to the most westerly point in Ross-shire, 150 miles. Extent, including the islands, 32,16' ayaare miles. Popu-

lation, in 1841, 2,620,184.

The climate of Scotland is colder than that of England. The country is in general mountainous, especially in the north; but there are some extensive level districts of considerable fertility, where agriculture is in a very advanced state. In Scotland immense numbers of cattle and sheep are reared: they are of small size, and much valued for the delicacy of their flesh. Scotland abounds in minerals, especially iron, lead, and coal. The commerce of Scotland is very extensive; the chief manufactures are cotton goods, linens, woollens, and iron-ware. Education is very generally diffused among all classes of the people, one school, at least, being established by law in every parish. The Scots are distinguished for habits of industry, steadiness, and prudence. Since the accession of James VI. to the throne of England, in 1603, England and Scotland have been ruled by one sovereign; and their parliaments were also united in 1707, during the reign of Queen Anne, The established religion is Presbyterianism; and this form of church-government is also professed by a large proportion of the dissenters.

Ireland extends from 51° 26' to 55° 23' N. lat.; and from 5° 24' to 10° 30' W. long. Length, from the north Donegal to the mouth of Cork Harbour, 243 miles; breadth, from Howth Head to Slyne Head, 170 miles,

Extent, 31,874 square miles. Population in 1841, 8,175,124.

The climate of Ireland is milder and more humid than that of Great Britain. Although the country is generally level, and the soil remarkably fertile, apriculture is in a very backward state. The principal minerals found in Ireland are iron, copper, lead, and marble; gold has also been found in small quantities in the county of Wicklow. The principal manufacture of Ireland is linen. The country possesses great natural advantages for trade, which, however, is very limited compared with that of England. The Irish are a shrewd, lively people; yet, till lately, the education of the lower classes has been greatly neglected. Ireland was annexed to the English crown by Henry II. in 1172. The Irish parliament was united to that of Great Britain in the year 1801. The established religion is Episcopacy; but the great majority of the people are Roman Catholics, except in the province of Ulster, where the Presbyterian form of worship prevails.

FREE CITIES OF HANGE TOWNS.—On the Elbe, Ham'burg, the largest commercial city in Germany; on the Mayn, Fronk'fort, the seat of the Germanic Diet, with a great inland trade; on the Weser, Bromen; on the Trave. about 19 miles from the Baltic, Lubeck.

Germany (exclusive of the territories belonging to Austria, Pressia, Denmark, and Holland) extends from 47° 20′ to 54° 15′ N. lat.; and from 7° to 15° E. long. Length, from the Lake of Constance to the mouth of the Elbe, 450

miles; breadth, from Rhenish Prussia to the east of Saxony, 290 miles. Extent, 92,000 sq. miles. Population, 15,841,169.

In the middle and south of Germany, the climate is good, and the soil productive: but in the north, and in the mountainous districts, the former is colder, and the latter less fertile. The principal agricultural produce consists of timber, wine, and various kinds of grain. The Mering breed of sheep is reared with great success in Saxony. The wolf, the lynx, and the wild-boar, are found in the forests and among the mountains. Germany is rich in minerals : mines of iron, copper, lead, tin, silver, cobalt, and bismuth, are wrought in the Hartz and Erzgebirge mountains, Though commerce is comparatively limited, manufactures. especially of broadcloth, linen, thread, lace, paper, porcelain, and curious inventions, have made great progress. The Germans are distinguished for the cultivation of literature, science, and music. They are an honest, open, and brave people, more given to thinking than speaking. Germany, including the portions belonging to Austria, Prussia, Denmark, and Holland, is divided into thirty-eight different states,* each of which has its own constitution and laws; but the general affairs of the country are regulated by a Federative Diet. The prevailing forms of religion are Roman Catholic, Lutheran, and Calvinistic.

The climate of Denmark is temperate and moist; in the south, and in the Islands, the soil is fertile and well cultivated; but the north of Jutland is a large plain, with tracts of red sand almost destitute of vegetation. The principal crops are oats, barley, beams, peass, and potatoes; and Holstein is famous for its horses and horned cattle. Although Denmark has few manufactures, the commerce is considerable. The fisheries on the coast furnish employment to a great part of the people. This country has two universities and a number of schools; and the inhabitants are quite, frugal, and industrious. The government is an absolute monarchy, but it is mildly administered. The established religion is Luthers.

Iceland, which belongs to Denmark, is celebrated for the volcanic mountain Hecla, and for its hot springs, the

most remarkable of which are the Geysers,

Population, 37,415,373.

The Austrian empire comprehends several countries differing as much in climate and soil as their inhabitants differ in language, manners, and character. Agriculture and commerce are not in an advanced state; and the manufactures are neither numerous nor extensive. But few parts of the world are so rich in minerals. Gold and silver mines are wrought at Kremnitz and Schemnitz in Hungary : while the surrounding districts abound in copper, antimony, coal, salt, and alum. Carinthia and Styria are famous for their iron: and the most productive quicksilver mines in Europe are at Idria in Carniola, The tract of Galicia, which lies along the foot of the Carpathian Mountains, yields copper, iron, and lead. Wieliczka, near Cracow, is celebrated for its extensive mines of rock-salt, The Austrian government is absolute. The established religion is Roman Catholic,

Switzerland extends from 45° 50' to 47° 50' N. lat., and from 6° to 10° 30' E. long. Length, from Mount Jura to the Tyrol, 200 miles; breadth, from Como to the Rhine at Schaffhausen, 130 miles. Extent, 15,250 souare miles. Population, 2,188,000.

Switzerland is the most mountainous country in Europe. The summits of the mountains are covered with perpetual snow, and in winter the frost is intense; but in the valleys the heat is great in summer, and, in general, the air is pure and wholesome. The soil is various, some places being entirely barren, and others extremely fertile. The Swiss rear great numbers of cattle. The principal wild animals found among the Alps are the ibex or rock-goat, the chamois, and the marmot. Switzerland does not abound in the useful minerals. The chief manufactures are linens, cottons, woollens, silks, and watches; of the last, 250,000 are annually sent abroad for sale. The people of all ranks are well educated and intelligent, and remarkable for sobriety and simplicity of manners. The government is a federal republic, each canton being governed by its own laws, and bound to assist in protecting the others in case of need. In some of the cantons the Roman Catholic religion is established; in others, the Protestant; and in a few both forms of worship exist together; but of the whole population the majority are Protestants.

Italy extends from 37° 56′ to 46° 40′ N. lat; and from 5° 30′ to 18° 30′ E. long. Length, from Mount Blanc to Cape Leuce, 750 miles; breadth, from the Rhone in Savoy to the Adriatic, 370 miles; and from Leghorn to Rimini, 120 miles. Extent, 120,000 square miles. Population, 22,726,000.

The climate of Italy is genial and healthy, except when the malaria, a kind of noxious vapour, prevails during the hot months. The soil is very fertile, especially in the north; and the country presents every variety of beautiful landscape. Various kinds of grain and fruit, cotton, silk, vines, and olives, are the principal productions of Italy. Naples is famous for its horses and sheep; and Lombardy and Parma for their dairy produce. Marble of uncommon beauty abounds in the northern parts of the country; but scarcely any other minerals are wrought. The manufactures are not extensive: wine, oil, fruits, and silk, are the chief exports. The commerce of Venice and Genoa was once the most flourishing in the world : but it has been long in a declining state. Italy is the chief seat of the fine arts ; painting, music, sculpture, and architecture being here carried to great perfection. It is, moreover, one of the most interesting countries in the world, from historical associations and the remains of ancient grandeur. The modern Italians are a polite, lively people, with fine natural taste; but they are, at the same time, superstitious and revengeful. The established religion in all the states is Roman Catholic; and the government is absolute, except in the small republic of San Marino, which is protected by the Pope.

Greece, though of comparatively small extent, is capable of great improvement, and is admirably situated for commerce. Almost every part of the country is rendered interesting by magnificent monuments of antiquity. The modern Greeks are a very acute, but a very deceiful people. After centuries of opperation by the Turks, the Greeks rose in arms in 1821, and maintained the struggle with great bravery for several years, till Britain, France, and Russia interfered in their behalt. They now enjoy an independent monarchy, under the protection of these three powers. The national religion is the Greek Church, so called from its having been established by the Greek Emperors, after the time of Constantine the Great.

Another small state has been recently established in the Islands which lie along the west consts of Turkeyand Greece, namely, $Co_T w_i$, $Pax \phi$, $San'(a Mau'ra, 1h'aca or The'ais), <math>Co_T w_i$, $Pax \phi$, San'(a Mau'ra, 1h'aca or The'ais), of the Seven Ionian Islands, and is under the protection of Great Britain. The principal products of these Islands are wine, oil, honey, and dried fruits. In 1824, a university was opened at Corfu, which is at present the cluel seat of Greek Itierature. The population of the Ionian Islands is 292,888.

In the north of Hindostan, the climate is temperate; but it is very hot towards the south. As in other tropical countries, there are only two seasons, the rainy and the dry. The soil is exceedingly fertile, in some places yielding two harvests in the year. The chief productions are rice, maize, sugar-cane, cotton, opium, indigo, pepper, and various kinds of delicious fruit. Among the domestic animals are the elephant, camel, and buffalo; and among the wild, the rhinoceros, leopard, lion, and tiger. The most valuable of the minerals of Hindostan is the diamond, which is found in several of the provinces. The principal manufactures are muslins, calicoes, and silks. The Hindoos are divided into four castes,-the Brahmins or priests, the soldiers, the merchants, and the labourers. Those who have been degraded from their caste are called Pariahs. The people generally are sober and inoffensive; but their superstition leads them to practise several revolting customs. Their religion is polytheism, the three principal deities being Brahma, Vishnu, and Siva. They believe in the transmigration of souls, or that after death their souls will animate other bodies, either of men or inferior animals. Since the subversion of the Mogul empire, the greater part of the country has been in the possession of the British, or under their protection. The immediate dominions of the East India Company are divided into three presidencies, Bengal, Madras, and Bombay.

miles. Population, 25 millions,

The Japan Islands are not fertile naturally, but they have been rendered exceedingly productive by the industry of the inhabitants, who have introduced every vegetable which can contribute to their own comfort or the ornament of the country. Gold, silver, and copper, are found in great abundance; iron is more rare. In most of their manufactures the inhabitants of Japan rival the Chinese, to whom they bear a considerable resemblance : they excel particularly in the art of varnishing. They are an intelligent, enterprising people, and are said to be better educated than any other nation in Asia. But they are extremely jealous of foreigners, the Dutch being the only European nation with whom they hold intercourse. They have two sovereigns; the one temporal, whose capital is Jeddo, and the other spiritual, who resides at Miaco. There are also two systems of religion, Boodhism, and a kind of polytheism.

EAST INDIAN ISLANDS.

SUM'TRA: Chief towns, Bencoo'len and A'choen. JAVA: Chief town, Bata'via. Bon Neo: Chief town, Bor'neo. Cell'enes: Chief town, Macast'ar. Motuc'cas and Ban'das, or Spice Islands: Chief town, Amboy'na. Phil'IPPINES: principal, Lu'zon and Mindando: Chief town, Manièla.

The East Indian Islands lie between 19° N, and 11° S. lat.; and between 95° and 132° E. long.; stretching from

west to east nearly 2500 miles. Extent estimated at 700,000 square miles. Population, 20 millions.

The East Indian Islands are generally fertile in soil, and havariant in vegetation. Their productions are very valuable. Sumatra yields pepper; Java, rice, sugar, and teak timber; the Moluceas, cloves; the Bandsa, numera and mace; in Borneo are found gold and diamonds; and the small island of Banca abounds in tin. Java and the Spice Islands belong to the Dutch, who have also settlements in Sumatra and Borneo; the Philippine Islands belong to Spain.

EGYPT.

BOUNDARIES.—North, the Mediterranean Sea; West, Barca and the Desert; South, Nubia; East, the Red Sea and the Isthmus of Suez.

Provinces.—Lower Egypt; Middle Egypt; Upper Egypt or Said.

LAKE.—In the north-west, Mareo'tis.

RIVER.—The Nile flows northward, and, separating into two branches, falls into the Mediterranean.

Tows.—On the Nile, Carno; north-west, on the coast, Alexan'dria; at the mouth of the western branch of the Nile, Roserta; at the mouth of the castern branch, Daniseta; at the head of the western arm of the Red Sea, Suice; southward, on the coast, Cossier; on the Nile, Siout, and Girgoh; southward, on the borders of Nulia, Assoulan or Sydne.

Egypt extends from 24° to 31° 30′ N. lat.; and from 25° to 35° E. long. Length, from north to south, 500 miles; greatest breadth of the Delta of the Nile, 150 miles. Extent, 150,000 square miles. Population, 2,500,000.

The climate of Egypt is very hot. The soil is exceedingly fertile, particularly in the Delta, or that part of Lower Egypt which is enclosed by the branches of the Nile and the Mediterranean. Rain is almost unknown in Egypt; bence site country depends for its fertility on the annual immdations of the river, which begins to overflow in June, and aubtides to its usual level about the end of October. The principal productions of Egypt are rice and other kinds of grain, tobacco, angar-cane, indique, cotton, and fruit; the lotus and papyrus are also among the celebrated plants of Egypt. The most noted animals are the hippopotamus, the crocodile, the ichneumon, and the libit. Egypt is interesting from being the country in which the Israelites were held in bondage. It is also famous for its remains of antiquity, particularly its pyramids, temples, and catacombs. Egyptis governed by a pasha nominally subject to the Grand Seignior. The religion is Mchammadan.

BARBARY.

BOUNDARIES.—North, the Mediterranean; West, the Atlantic; South, the Great Desert; East, Egypt.

Divisions.—1. Trip'oli, including Bar'ca; 2. Tu'-nis; 3. Algiers'; 4. Moroc'co.

Towns.—I. On the coast, Tarvonz; eastward, Deriva; 9. On a spacious bay, Trivers; southward, Keirwa; 3. On the coast, Alorens'; eastward, Constantino, and Bring; westward, Trem'eccu, and Oran; 4. In the interior; Monocoo; northward, Meyluinez, and Fes; on the west coast, Mogladore, and Sales'; on the straits, Tan'gier, and Cevita.

Barbary extends from 28° to 37° N. lat.; and from 10° W. to 25° 20′ E. long. Length, from east to west, 2000 miles; average breadth, from north to south, 150 miles.

The climate of Barbary, though bot, is in general healthy; and the soil, where there is sufficient moisture, is remarkably fertile. Some of the productions of Barbary are grain of various kinds, cotton, tobacco, sugar-cane, and olives. This country is hande for its horses and camels: among the wild animals are the lion, the patther, the hypna, the jackal, and the antelope. It is also inferted with scrpents, scorpions, and locusts. Mount Atha yields silver, copper, lead, and antimony. The most celebrated place

in the north of Africa in ancient times was Carthage, the unins of which are about twelve miles from Tunia. The present inhabitants of Barbary are remarkable for their cruelty and bigotry. Algiers, long noted for its piracles, was bombarded by the British in 1816, and has since been taken by the French. The government in the other Barbary States is despotic, and the religion Mohammeda,

South from Barbary lie Da'rah, Taf'ilet, Segelmis'ss, Be'lid-ul-gerid or the Land of Dates, and Fez'zan. In

the last is the town of Mour'zouk.

WESTERN AFRICA.

DIVISIONS—Senegam'hia, including the countries of the Foul laha and Mandingon; Upper Guin'ea, comprehending Sier'ra Leoine, Liberira, the Grain Coust, Foory Coust, Gold Coust, Slave Coust; the kingdoms of Ashantee, Paho'mey, Benin', and Bier'je'ra; Lower Guinea, containing Loan'go, Con'go, Ango'la, and Bengue'la.

RIVERS.—The Sen'egal, Gam'bia, and Ri'o Gran'de, in Senegambia; the Ni'ger or Quor'ra, in Upper Guinea; the Zaire or Con'go, and the Coan'za, in Lower Guinea; all fall into the Atlantic.

Towns.—In Sierra Leone, Free'town; in Liberia, Monrovia; on the Gold Coast, Cape Coast Castle; in the Ashantee country, Coomas'sie; in Congo, St Sal'-vador; in Angola, St Paul or Loan'da.

The climate of Western Africa is the hottest in the world. Wherever the country is well watered, it is very fertile, producing ecoca-trees, mangoes, palms, banasinds, citrons, oranges, pomogranates, various kinds of grain, and beautiful flowers. The most remarkable tree is the *backob*, the trunk of which is bollowed by the natives into chambers. The principal animals are the clephant, hippopotamus, rhinocreso, lion, panther, hyens, jackal, giraffe, zebra, antelope, deer, monkey, various species of parquets, and the boa-constrictor and other

serpents. The chief exports from Western Africa are agold, ivory, and palm-oil. Sigren Lone and Cape Coast Castle are British colonies. Liberia is an American settlement of liberated slaves. The naive governments are all despotic. In some parts Mohammedanism is professed; but the prevailing religion, especially in the south, is a kind of idolatry called feitchism, according to which, worthly is paid to a serpent, a tree, a shark's tooth, a bird's feather, or any other object which the votary may imagine to be his feitch.

SOUTHERN AFRICA.

Divisions.—Cape Colony; and the countries of the Hot'tentots, Caf'fres, and Boshua'nas.

Rivers.—The Or'ange and the Ol'iphant fall into the

Atlantic; the Great Fish River falls into the Indian

Ocean.

Towns.—In Cape Colony, Cape Town, and Graham Town; in the country of the Caffres, Port Natal'; in the country of the Boshuanas, Lat'takoo, and Kurree-chanee'.

The climate of Southern Africa is mild and healthy, and much of the soil is fertile. The chief productions are corn, fruits, and wine. Among the wild animals are the lephant, hippopotamus, zebrs, giraffe, ostrich, porcupine, and various kinds of serpeats. The Hottentoits are a dirty, sluggish race; the Caffres are fierce, but brave and independent; the Bothunana are an industrious people, engaged in pasture and agriculture. All the native tribes are idolaters. Cape Colony belonged originally to the Dutch, but has been in the possession of the British since the year 1806. Its population amounts to 180, 461.

EASTERN AFRICA.

Divisions.—Mocaran'ga or Monomota'pa, including Sa'bia and Sof'ala; Mozambique'; Zanguebar'; A'jan; A'del.

RIVER.—The Zambe'zi or Cua'ma, separates Mocaranga from Mozambique, and falls into the Indian Ocean-

Towns.—On the coast, Sof ala, Mozambique', Quiil'oa, Zanzibar', Momba'za, Bra'va, Magadoz'a; near the Straits of Babelmandeb, Zei'la.

Some parts of Eastern Africa are salubrious and ferfulcation and others unhealthy and barren. Gold is found in great abundance in many places, and forms the principal article of commerce. Ivory and ambergris are also exported. The Portuguese were the first Europeans who visited this coast, on which they still retain a few settlements. The Arabs have several colonies toward the north. The natives are in a very uncivilized state.

ABYSSINIA.

BOUNDARIES.—North, Nubia; West, Nubia and Nigritia; South, the Mountains of the Moon and Adel; East, the Red Sea.

LAKE .- Near the centre of the country, Dem'boa or Za'na.

RIVERS.—Flowing into the Nile, the Bahr-el-Azerk or Blue River, and the Tacazze.

Towns.—North from Lake Dembea, Gon'dar, north-east, Ax'um, and Adon'a; on the Red Sea, Mas'suah; south-east from Lake Dembea, Anko'ber.

Abyssinia is a mountainous region, and the climate is therefore more temperate than in some other countries in the same latitude. Many of the valleys are fertile, producing various kinds of grain, the sycamore-fig, the tamarind, the date, the coffee-tree, and a great variety of fragrant flowers. Besides the usual domestic animals, there are the elephant, rhinoceros, lion, panther, leopard, giraffe, hyena, gazelle, monkey, crocodile, hippopotamus, and numerous species of birds. The country is much infested with insects, particularly the zebub and the locust. The inhabitants are deprayed in their manners, and disgusting in their habits. Abyssinia is now divided into a number of petty states, the chief being those of Tigre in the north, and Shoa in the south; while a large portion has been conquered by a barbarous race called the Gallas. The religion is Christianity, but very much corrupted,

NUBIA.

Boundaries.—North, Egypt; West, the Desert and Darfur; South, Abyssinia; East, the Red Sea.

Divisions .- Nu'bia Proper; Dongo'la; Sennaar'.

RIVER.—The Nile, formed by the junction of the Bahr-el-Abiad or White River, and the Bahr-el-Azrek or Blue River.

Towns.—On the Blue River, Sennaar; at its confluence with the White River, Khartoum; northward, on the Nile, Shen'dy; farther down the river, Dongo'la, and Derr; on the Red Sea, Swa'kin.

The climate of Nubia is very hot, and the sell is barren, exery on the banks of the Nile. The most important production is shours, which is the principal article of food. The animals of this country are similar to those found in Abysainis. Nubia contains many interesting remains of antiquity, particularly exervated temples. The inhabitants are brave, but rude and lawless. The greater part of the country is subject to the Pasha of Egypt. The religion is partly Mohammedanism and partly idolarry.

CENTRAL AFRICA.

Divisions.—The Saha'ra or Great Desert; Nigritia or Ne'groland, comprehending Bambar'ra, Timbuc'too, Hous'sa, Bor'nou, Dar'fur, and several other states.

LAKE.-In Nigritia, Lake Tchad.

RIVERS.—The Ni'ger or Quor'ra, rises in the west of Nigritia, and flows first eastward, and then southward through Upper Guinea, into the Atlantic; the Shar'y flows into Lake Tchad.

Towns.—On the Niger, Se'go, Jem'neh, Timbuc'to, and Bous'sa where Mungo Park perished; on a tributary of the Niger, Sack'stoo; on the Tchadda, a tributary of the Niger, Fun'dah; near Lake Tchad, Kou'ka; in Darfur, Cob'be.

The Sahara or Great Desert, which is nearly 3000 miles long and 1000 miles broad, consists of moving sand and gravel, interspersed with green spots or islands called oases. The only vegetable productions found in it are acacias, brambles, and other thorny shrubs. The animals which frequent it are lions, panthers, gazelles, ostriches, and serpents. The usual mode of traversing the Great Desert is by caravans or large bodies of camels and horses. These are often subjected to the greatest distress, and sometimes even perish from fatigue, want of water, and the simoom or blast of the desert.

Nigritia is in general extremely fertile, yielding abundance of grain, cotton, and indigo. A considerable inland trade is carried on by boats on the Niger, and by caravans, The various tribes of inhabitants differ considerably in condition and character: but they are generally uncivilized and ferocious. Some of them profess the Mohammedan religion; others are pagans,

The soil of the plains, which lie between the Andes and the ocean, is sandy and barren; but many of the upper valleys are very fruitle. Peru is celebrated for its mines of gold, silver, and mercury; which, however, like those of Mexico, have been greatly reduced in value by civil commotions. The government has been a republic since 1625. The religion is Roman Carbiol.

BOLIVIA OR UPPER PERU.

BOUNDARIES.—North, Peru and Brazil; West, Peru and the Pacific Ocean; South, Chili and La Plata; East, Paraguay and Brazil.

Towns.—Near the middle of the country, Cruquisa'ca; south-west, Poto'si, noted for its silver mines; northward, Cochabam'ba; near Lake Titicaca, La Paz.

Bolivia extends from 10° to 25° 40' S. lat.; and from 58° to 70° W. long. Extent estimated at 320,000 square miles. Population, 1,300,000.

This country resembles the more elevated parts of Peru in climate, soil, and productions. The government is a republic, and the religion Roman Catholic.

CHILI.

BOUNDARDS.—North, Bolivia; West, the Pacific; South, Patagonia; East, La Plata.

ISLANDS.—On the south, Chiloe; on the west, Ju'an Fernan'dez, or Robinson Crusoe's Island.

Towns.—In the interior, Santia'go; north-west, on the coast, Valparaëso; southward, Conception; still farther south, Valdi'via.

Chili extends from 25° 20′ to 44° S. lat.; and from 68° 40′ to 74° W. long. Length, from north to south, 1300 miles; breadth, from the Andes to the Pacific Ocean, 120 miles. Extent, 130,000 square miles. Population, 1,400,000. The climate of Chili is mild and healthy; and the soil

is, in many places, every fertile. The country abounds in pasture and corn; and there are valuable mines of gold, silver, and copper. The government is a republic.

LA PLATA

BOUNDARIES.—North, Bolivia; West, Chili; South, Patagonia; East, the Atlantic, Banda Oriental, and Paraguay.

Towns.—On the Rio de la Plata, Bue'nos Ay'res, north-west, Cordo'va; westward, at the foot of the Andes, Mendo'za.

La Plata, or the Argentine Republic, extends from 22° to 41° S. lat.; and from 54° to 72° W. long. Extent,

726,000 square miles. Population, 1,000,000.

The territory of Le Plata consists chiefly of vast plains called pampas, covered with luxuriant herbage. Wild horses, oxen, and dogs, are very numerous. The principal exports are hides, provisions, furs, and wool. The religion is Roman Catholic, and the government a republic.

PARAGUAY.

BOUNDARIES.—North, Brazil; West, Bolivia and La Plata; South, La Plata; East, Brazil.

RIVERS.—The Para'na, on the east and south; and the Par'aquay, on the west.

CAPITAL .- ASSUMP'TION, on the Paraguay.

Paraguay extends from 19° to 27° 30' S. lat.; and from 54° to 58° 30' W. long. Extent, 80,000 square miles. Population, 250,000.

This country was long ruled by a person named Dr Francia, who prohibited all intercourse with the neighbouring states.

BANDA ORIENTAL OR URUGUAY.

Boundaries.—North, Brazil; West, La Plata; South, the Rio de la Plata; East, the Atlantic and Brazil.

RIVER .- The Ur'uguay, on the west.

Capital.—On the estuary of the La Plata, Mon'te Vid'eo.

Banda Oriental was erected into an independent republic in 1829. Extent, 80,000 square miles. Population, 180,000.

PATAGONIA.

PATAGONIA is bounded on the north by La Plata and Chill; on the west, by the Pacific Occan; on the south, by the Straits of Magellan; on the east, by the Atlantic. It is a barren and mountainous country, inhabited by sawages, who are said to be of great stature. South from it lies in Haind of Tierra del Puego, and eastward lie the Falkland Islands. Extent, estimated at 400,000 square miles. Population, 500,000.

AUSTRALASIA.

AUSTRAULA.—On the east coast, New South Walez; LOWES, SVINNEY, and Melbourne: Western Australia; LOWES, Perth: South Australia; town, Adelaide; North Australia; town, Victoria. Van Diebergh LAND; chief town, Hobart Town. New Zea Land; towns, Australia; town Helbington, and Netson. New Guinga. New Bult'ann. New less land. Sol'oson Iblands. New Helb'ridge. New Calendynia. Non'- Solk Jiakan.

Australia, formerly called New Holland, extends from 100 39' to 39° 12' S. lat, ; and from 113° to 153° 30' E. long, Length, from east to west, 2400 miles; breadth, from north to south, 1960 miles. It is the largest island in the world, being about four-fifths of the extent of Europe, or 3,000,000 square miles, and possesses great variety of climate, soil, and productions .- Van Diemen's Land, which lies to the south of Australia, is 210 miles long and 150 broad. It is a fine island, with a healthy climate and a fertile soil; and of late years there has been a considerable influx of settlers. The British population of Australia and Van Diemen's Land is above 200,000, and is rapidly increasing .- New Zealand consists of two large islands, separated by a narrow strait. The soil is fertile; and the inhabitants are brave and intelligent. The other islands of Australasia are rude and mountainous, inhabited by barbarous tribes,

POLYNESIA.

The Friendry of Towas Islands. The First Islands. Navidatorist Islands. Cook's of Heri'dry Islands. Avidatorist Islands. The Sootery Islands, the principal of which is Otabe's too Table's. Low or Coratines. The Marg'quess. The Sand'word Islands, the principal of which is Otabe's the Principal of Which is Otabe's the principal of which is Otabe's the new Captain Cook was killed, in an affray with the natives, in 1779. The Carolines. The Pellew Islands. The Ladronis' or Ma'nan Islands.

The Polynesian Islands are, in general, fertile and beautiful, and enjoy a temperate climate. The principal productions are the coosa and bread-fruit trees. When first visited by Europeans, the inhabitants were wholly uncivilized; but a very remarkable and salutary change has been wrought, especially in the Society and Sandwich Islands, by the introduction of Christiantics.

OUTLINE OF

SACRED GEOGRAPHY.

PALESTINE, OR THE HOLY LAND.

Boundaries.—North, Syria; East, Syria and Arabia; South, Arabia; West, Mediterranean Sea.

Palestine extends from 31° to 33° 35′ N. lat.; and from 34° 30′ to 36° 25′ E. long. Greatest length nearly 200 miles; greatest breadth about 100 miles. Population in the time of David, upwards of 5 millions.

NAMES .- Land of Ca'naan; Pal'estine; Land of

Promise; Land of the He'brews; Land of Is'rael; Land of Ju'dah; Land of Jeho'vah; Holy Land.

OBIGINAL INBABILANES—On both sides of the Jor-dan, the Admoties; in the hill country to the west of the Dead Sea, the Hill titles or Children of Heth; north-wands, the Lövinstes; between the Jordan and the Mediterranean Sea, the Canaanites; between the Sea of Galilee, and the Mediterranean, the Per'sizates; on the eastern coast of the Sea of Gaillee, the Gir'gashites or Gregosenes'; at the foot of Lebonno and Hermon, the Hi'eties; in the north-west, on the coast, the Siddinians; in the south-west, on the coast, the Philistians.

Theres—On the east of the Jordan, 1. Reu'bers, 2 Gap; 3. Half Tribe of Manasism. Between the Dead Sea and the Mediterranean, 4. Ju'dam; 5. Sin'ton; 6. Dan, 0. n the west of the Jordan, 7. Bers', Jamin; 8. E'fhraim; 9. Half Tribe of Manasism; 9. Fight of Manasism; 0. Landers side of the sea of Gallilee, 11. Zer'ulun; 12. Naph'all. North-west, on the Mediterranean; 13. Assirtanean, 13. Assirtanea

PROVINCES—In the north, Galiller; comprehending the tribes of Asher, Naphatii, Zebulun, and Issachar; subdivided into Upper Galilee or Gatilee of the Gentilee, and Louer Galilee. In the middle, Sama-Rai, comprehending Ephraim and the Half Tribe of Manasseh. In the south, Juda'A; comprehending Beylamin, Dan, Simeon, and the greater part of Judah. In the south-east, Indust'A; comprehending the south of Judah and part of Arabia. In the east, Prant'A; comprehending Reuben, Gad, the Half Tribe of Manasch, and part of Syria; subdivided into Abildene, Trackonitis, Aurantifis, Ituréa, Batanéa, Gaulonitis, Decapolis, and Peréa.

Rivers.—The Jordan, or River of Dan, rises at the foot of Andi-Libranus, flows through the Waters of Merom and the S-a of Galilee, and falls into the Dead Sea; the Arinon, forming the southern boundary of the tribe of Reuben, falls into the Dead Sea; the Labbok, a tributary of the Jordan, flows through the tribe of Gal; the Chértifu flows through the east of Benjamin

into the Jordan; the KTahon, in Issachur and Zebulun, falls into the Bay of Acre; the Ka'nah separates the tribe of Ephraim from the Half Tribe of Manasseh; the Ga'ah separates Ephraim from Dan; the Ba'ah separates Ephraim from Dan; the Ba'bcoh flows through the north-west of Judah; the Sa'reh flows through Dan into the Mediterranen; the Ba'bcoh flows through the south of Simeon; the River of Bayph from the south-west boundary of the Holy Land; the KTa'bcoh, from the neighbourhood of Jerusalem, falls into the Dead Sea.

Lakes.—Eastward from the tribe of Judah, the Lake of Sodom, or Dead Soa; between Zebulun and the Half Tribe of Manassch, the Soa of Galilee, Auch of Gennes'areth, or Soa of Tibérina; northward, between Naphtali and the Half Tribe of Manassch, the Waters of Merom; in the south of Gad, the Soa of

Ja'zer.

MOUNTAINS .- Forming the northern boundary of Canaan, Leb'anon, divided into two ranges, Lib'anus on the west, and Anti-Lib'anus on the east; in the Half Tribe of Manasseh, Her'mon or Sir'ion, and Ba'shan; in the tribe of Gad, Gil'ead; in the tribe of Reuben, the mountains of Ab'arim, the most remarkable of which are the Heights of Ba'al, Pis'gah, Pe'or, and Ne'bo: on the seacoast, in the north-west of the Half Tribe of Manasseh, Car'mel: in the south of the tribe of Zebulun, Ta'bor; southward, in Issachar, Her'mon and Gil'boa; in the tribe of Ephraim, Mount E'phraim, E'bal, Ger'izim, and Ga'ash; in the tribe of Benjamin, the Rock of Rim'mon; within the walls of Jerusalem, Mori'ah and Zi'on; eastward from the city. the Mount of Ol'ives ; between Jerusalem and Jericho, Quaranta'nia: in the north-east of Judah, near the Dead Sea, Hach'ilah.

Valleys, Plairs, &c.—The Valle of Siddlin; in the tribe of Reuben, north-east from the Dead Sea, the Plains of Mood and the Plain of Shiftim; in Idumes, south from the Dead Sea, the Valley of Salt; in the tribe of Judah, west from the Dead Sea, the Wilderness of Ma'on, the Wilderness of Ziph, the Wilderness of Engoist, the Wilderness of Polouis, and the Vallew of Ber'achah; south from Bethlehem, the Forest of Ha'reth; near Hebron, the Plain of Mam're; in the north-west of Judah, the Valley of Zeph'athah; north-wards, the Valley of E'lah; on the borders of Judah and Benjamin, the Valley of Reph'aim; north-west, the Valley of A'jalon; on the south of Jerusalem, the Valley of Hin'nom: on the east, the Valley of Sha'veh; along the west coast of the Dead Sea, and the course of the Jordan, the Wilderness of Jude'a: in the east of the tribe of Benjamin, the Valley of A'chor; northwards, near Shiloh, the Valley of Bo'chim: in the east of the tribe of Ephraim, the Plain of Mo'reh; on the eastern side of the Jordan, in the north of Gad, the Wood of E'phraim; along the coast of the Mediterranean, the Plain of Sharon; in the tribes of Issachar and Zebulun, along the banks of the river Kishon, the Plain of Jez'reel or Megid'do.

Towns .- 1. REUBEN .- In the east of the tribe. Hesh'bon; southward, Med'eba; farther southward, Jahaz: in the south of the tribe. Bezer or Bozra. a city of refuge.

2. GAD .- About the middle of the tribe, Ra'moth-Gil'ead, a city of refuge; north-west, on the Jordan, Suc'coth; on the Jabbok, Penu'el; northward, Ma-

hana'im : north-west, Ja'besh-Gil'ead

3. Half Tribe of MANASSEH .- Near the middle of the tribe, Go'lan, a city of refuge; in the north-east, Ed'rei; in the south, De'bir or Lo'debar; northward, Miz'peh; north west, Gad'ara; on the Sea of Galilee, Ger'gesa; near the northern shore of the lake. Bethsai'da or Julias; in the north of the tribe, Geshur; north-west, near the sources of the Jordan, La'ish or Dan, and Cesare'a-Philip'pi. 4. JUDAH .- In the middle of the tribe, He'bron, a

city of refuge; northward, Beth'lehem; north-west, A'phek : southward, Adullam : south-east, Makke'dah; northward, Beth'shemesh; still farther north, Kir'jath-jea'rim; southward, La'chish; north-east, Lib'nah : southward, Kei'lah : south-east from Bethlehem, Tek'oah; in the south of the tribe, Ka'desh. Bar'nea.

5. Simeon.—In the south-east of the tribe, Beer'-sheba; north-west, Gérar; south-east, Hormah; north-west, near the coast, Ga'za; northward, As'kelon; eastward, near the borders of Judah, Zik'laq.

6. Dax.—In the south-west of the tribe, Ash'dod or Azo'tus; eastward, on the borders of Judah, Zo'rah; near the middle of the tribe, Gath; south-east, Tim'-nath; north-west, Ek'ron; in the north-east, A'jadon; south-west, Em'maus; north-west, Arimathe'a; north-nath' arimathe'a; north-nath'.

ward, Lyd'da; on the coast, Jop'pa.

7. Benjamin-On the borders of Judah, Jenu-Salen; eastward, Bethphage; a little to the northeast, Bethany; northward, An'atholi; north-west, Gib'eah; south-west, Mit'peh; northward, Gib'eon; north-east, Remah; in the east of the tribe, Jericho; eastward, Gil'gal; north-west, A'i; farther northwest, orthe borders of Ephraim, Bethel.

8. EPHRAIM.—In the north of the tribe, on the borders of Manasseh, Sama'ria; southward, She'chem, a city of refuse: farther south, She'loh; in the south of

the tribe, Gezer: north-west, Antip'atris.

Half Tribe of Manassen.—On the coast, Cesaré'a;
 in the south of the tribe, Tir'sah; northward, The'bes;
 north-west, Do'than; eastward, Oph'rah; north-east, E'non.

ISSACHAR.—In the south of the tribe Jes'real;
 Aphele; north-east, Shu'nem; northward,
 Nain. Westward from Jezzeel, Megid'do; north-east,
 En'dor; south-east, Beth'shan or Scythopolis, all belonging to the Half Tribe of Manasset

11. ZEBULUN.—Near the middle of the tribe, Naz'areth: northward, Ca'na: on the Sea of Galilee, Tibe'-

rias.

12. Naphtali.—About the middle of the tribe, Ke'desh-Naph'tali, a city of refuge; northward, A'belbeth-ma' achah; southward, Har'osheh; north-west, Ha'zor; on the Sea of Galilee, Caper'naum, Chora'zin, and Bethsai'da.

13. Ashen.—In the south-west of the tribe, on the coast, Ac'cho or Ptolema'is; northward, Tyre; northward, Zar'ephath or Sarep'ta; northward, Si'don.

USE OF THE GLOBES.

The terrestrial globe represents the natural figure of the earth, with the circles supposed to be drawn upon its surface. The celestial globe represents the heavens, with the stars in their relative positions. Each of the globes revolves upon an axis, and is surrounded by two circular rings, cutting each other at right angles, the one called the universal or brazen meridian, and the other the horizon. On the brazen meridian are marked the degrees of latitude; and on the horizon the points of the compass, the months of the year, and the signs of the zodiac. Round the north pole is placed the hourcircle, on which are marked the hours of the day. The quadrant of altitude is a thin slip of brass, which can be applied to any part of the globe to measure distances : it is numbered from 0 to 90° in one direction, and from 0 to 18° in the other.

PROBLEMS ON THE TERRESTRIAL GLOBE.

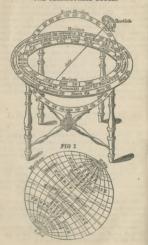

I. To find the latitude and longitude of a place.— Bring the place to that side of the brazen meridian which is numbered towards the pole; the degree above the place is the latitude; the degree on the equator cut by the meridian is the longitude.

EXERCISES.—What is the latitude of London, Paris, Madrid, Rome, Lisbon, Edinburgh, Dublin, Vienna, Constantinople, Rio Janeiro, Cape Horn? What is the longitude of St Petersburg, Calcutta, Naples, Pekin, New York, Lima?

II. To find a place, the latitude and longitude being given.—Bring the given longitude on the equator to the meridian, and under the given latitude on the brazen meridian will be found the place required.

Ex.—What places are situated in 31° 26' E. Long. and 30° 6 S. Lat.? in 18° 28' E. Long. and 33° 56' S. Lat.? in 59° 45' W. Long. and 13° 12' N. Lat.?

THE TERRESTRIAL GLOBE.

III. To find the distance between any two places.— Lay the graduated edge of the quadrant of altitude over the two places, with the zero or cipher (0) over one of them, the figure over the other will show their distance in degrees; multiply the number of degrees by 69, to find the distance in English miles; or by 60, to find it in geographical or nautical miles.

Ex.—What is the distance between Quebec and Rio Janeiro? Rome and London? Calcutta and the Cape of Good

Hope? The Cape of Good Hope and London?

IV. To rectify the globe for the latitude of any place.
—Elevate the north or south pole above the horizon as many degrees as are equal to the latitude of the place.

Ex .- Rectify the globe for Edinburgh, London, Paris,

Lisbon, Buenos Ayres, Madras, Pekin.

V. The hour of the day at one place being given, to fall what hour it is at any other place.—Bring the place at which the time is given to the brazen merdian, and set the index of the hour-circle to the given hour; then turn the globe till the other place comes under the merdian, and the index will show the hour at that place: if the place at which the hour is required be to the east of that where the hour is given, the hour will be later in the day; if to the west, it will be earlier.

Ex.—When it is noon at Edinburgh, what is the time at Lima, Mecca, and Canton? When it is 6 o'clock A. M. at London, what o'clock is it at Sydney, Cape Comorin, and

Cape Horn?

VI. To find the sun's place in the ecliptic, his declination, or distance from the opactor, and the places to which he will be vertical on any given day.—Find the day of the month on the wooden herizon, opposite to which are the sign and degree in which the sun is for that day; then find the same sign and degree in the ecliptic on the globe; that is the sun's place; bring the place thus found to the brazen meridian, and the degree araked over it is the declination; turn the globe on its axis, and all the places which pass under the degree of declination will have the sun vertical at noon on that day. Ex...-What is the sun's place on the 1st January, the 20th March, the 24th December, the 21st June, and the 23d September? What is the sun's declination, and to what places will be be vertical, on the 7th of May, the 10th of February, the 4th June, and the 14th December.

VII. The day and hour at one place being given, to find at what other place the sun is then vertical.—Find the sun's declination: bring the given place to the meridian, and set the index of the hour-circle to the given hour; then turn the globe till the index points to 12 noon, and the place under the degree of declination is the place required.

Ex.—Where is the sun vertical on the 8th of April, when it is 6 in the morning at Dublin? Where is the sun vertical on the 19th of September, when it is 4 o'clock in the morning

at Amsterdam

VIII. To find the hour of the rising and setting of the sun, the point of the compass on which he rises and sets, and the length of the day and night at any given time and place—Rectify the globe for the latitude, bring the sun's place in the ecliptic to the meridian, and set the index to 12 noon; then turn the globe on its axis east ward, till the sun's place cut the edge of the horizon, and opposite to it will be found the point of the compass on which he rises; the index will show the hour of rising; turn the globe wearvard till the sun's place cut the edge of the horizon, and you will have the hour and the point at which he sets: the hour of rising doubled gives the length of the sight; the hour of setting doubled gives the length of the sight; the hour of setting doubled gives the length of the sight;

Ex.—At what time does the sun rise and set at Dublin, Archangel, Gibraltar, and the Cape of Good Hope, on the 15th June ? And what is the length of the day and night at those places? At what points of the compass does the sun rise and set at Gibraliar on the 17th July, at St Petersburg on the 19th October, and at Edithburgh on the 9th June ?

IX. The day and the hour at any particular place being given, to find all those places where the sun is then rising and setting, where it is noon, and where it is midnight.—Find the place to which the sun is vertical, and bring it to the brazen meridian; devate the pole according to the latitude; then to all those places round the western edge of the horizon, the sun will be rising; to to those on the eastern edge, setting; to those under the upper half of the brazen meridian, it will be noon; and to those under the lower half, midnight.

Ex.—To what places is the sun rising, to what places is he setting, and where is it noon and midnight, when at Edinburgh it is 7 in the morning, on the 14th of March? Where is it noon on the 30th June, when at London it is 9 in the evening? Where is it midnight on the 6th February, when it is noon

at St Petersburg?

PROBLEMS ON THE CELESTIAL GLOBE.*

I. To find the right ascension and the declination of the sun or a star.—Bring the sun's place or the star to the brazen meridian; the degree of the equator under

Ex.—What is the sun's right ascension on the 5th July and the 13th October? What is the right ascension of α Lyras, of Aldebaran in Taurus, and of Rigel in Orion's Foot? What is the declination of the sun on the 11th April? What is the declination of Castor in Gemini, and of Regulus in Leo?

II. To find the time at which a star rises, comes to the meridian, or sets, at a given place, on a given day.

—Elevate the pole according to the latitude of the place; bring the sun's place on the given day to the brazen meridian; and see the index of the hour-circle to 12 o'clock; then bring the star successively to the eastern side of the horizon, the meridian, and the western side of the horizon, and the index will show the times at which the star rises, passes the meridian, and sets.

Ex.—At what time does Regulus, in Leo, rise, come to the meridian, and set, at Edinburgh, on the 4th of February? At what time does Alphecca, in Corona Borealis, rise, come to the meridian, and set, at Madrid, on the 7th of May?

III. To represent the face of the heavens at any pine time and place, so as to show all the stars then visible.—Place the globe due north and south; elevate the pole according to the latitude of the place; bring the sun'place on the given day to the brazen meridian, and set the index of the hour-circle to 12 o'clock; then, if before noon, turn the globe eastward till the given hour is under the meridian; if after noon, turn it westward; but surface for the globe will represent the face of the

Ex.—Represent the face of the heavens as it will appear at Edinburgh, for 2 and 6 in the morning on the 18th January; and at 8 and 11 evening on the 12th March.

CONSTRUCTION OF MAPS.

1. Draw lines round the Map, to contain the numbers expressing the latitude and longitude. 2. Draw a meridian through the middle of the map, and divide it into as many parts as there are to be degrees of latitude. 3. Subdivide a line equal to one of these degrees into any number of small spaces, to measure minutes. 4. In the subjoined Table, find the length of a degree of longitude on the parallel of latitude which is to pass through the top of the map. 5. To the right and left of the meridian drawn through the middle of the map, divide the line along the top into degrees of the length found in the Table. 6. Find the length of a degree of longitude on the parallel which is to pass through the bottom of the map. 7. On each side of the central meridian, divide the line along the bottom of the map into degrees of the length found in the Table. 8. Draw meridians from the degrees marked along the bottom to those marked along the top. 9. Produce the central meridian, and any two of the others at an equal distance on each side of it, till they meet in a point. 10. From this point as a centre, describe lines from one side of the map to the other, passing through the degrees marked on the central meridian. 11. Number the degrees along the sides and the top and bottom, and subdivide them into such parts as the scale of the map will admit. 12. From an accurate map, or a table of latitudes and longitudes. lay down the capes, towns, and other prominent places, in their proper situations : and then trace the boundaries, rivers, mountains, &c.
