8. The title of every newspaper must be exposed

to view.

9. A newspaper, or packet of newspapers, which contains any enclosure except supplements, is charged as a letter, unless the enclosure be such as might be sent at the book rate of postage, and the entire packet be sufficiently prepaid as a book packet, in which case it is allowed to pass.

10. A newspaper which has any letter, or any communication of the nature of a letter, written in it or upon its cover, is charged as an unpaid or insuffi-

ciently paid letter.

II. No packet of newspapers may be above 14 lbs. in weight, 2 feet in length, 1 foot in width, or 1 in depth.

#### Inland Book Post.

1. The postage is one halfpenny for every 2 oz. or part of 2 oz. If unpaid it is charged double; and if posted partially prepaid, with double the deficiency.

2. A book-packet may contain any number of separate books or other publications, photographs (when not on glass, or in cases containing glass or any like substance), drawings, prints, or maps, and any quantity of paper, or any other substance in ordinary use for writing or printing upon; and the books or other publications, prints, maps, &c., may be either printed, written, engraved, lithographed, or plain, or any mixture of these. Further, all legitimate binding, mounting, or covering of a book, &c., or of a portion thereof, is allowed, whether such binding, &c., be loose or attached; as also rollers in the case of prints or maps, markers (whether of paper or otherwise) in the case of books, pens or pencils in the case of pocket-books, &c., and, in short, whatever is necessary for the safe transmission of such articles, or usually appertains thereto; but the binding, rollers, &c., must not be sent as a separate packet.

Circulars-i.e., letters which, from internal evidence, appear to be intended for transmission in identical terms to several persons, and the whole or greater part of which is produced by means of ordinary type, engraving, lithography, or any other mechanical

process-may also be sent by book post.

3. But a book-packet may not contain any letter, or communication of the nature of a letter† (whether separate or otherwise), unless it be a circular letter; nor any enclosure sealed or in any way closed against inspection; nor any other enclosure not allowed by Rule 2. If this Rule be infringed, the entire packet is charged as a letter. ‡

4. A book-packet may be posted either without a cover (in which case it must not be fastened, whether by means of gum, wafer, sealing wax, postage stamp, or otherwise), or in a cover entirely open at both ends, so as to admit of the contents being easily withdrawn for examination; § otherwise it is treated as a letter. It may, however, be tied at the ends with string.

5. No Book-packet may be above 5 lbs. in weight, nor above 1 ft. 6 in. in length, 9 in. in width, or 6 in. in depth, unless it be sent to or from one of the Govern-

ment Offices.

6. When, owing to a great and unusual influx of letters, books, &c., the transmission or delivery of the letters would be delayed if the whole mail were dealt with without distinction, book-packets may be kept back till the next despatch, or delivery.

#### Inland Post Cards.

1. Official Post Cards impressed with a halfpenny stamp-double or reply Post Cards impressed with a halfpenny stamp on each portion of them-and private Cards embossed at the Office of Inland Revenue with halfpeony stamps—may be transmitted between places in the United Kingdom with letters printed or written upon the back. Adhesive stamps are not accepted

in payment of the postage.

2. The front (or stamped) side is for the address only, in addition to the printed words "Post Card " and "The address only to be written on this side." There must be nothing else written, printed, or otherwise impressed on it, nor must there be any writing or printing across the stamp. On the reverse side any communication, whether of the nature of a letter or otherwise, may be written or printed. Nothing whatever may be attached; nor may the card be folded, cut, or otherwise altered. It any one of theso rules be infringed, the card will be charged 1d. on delivery.

3. When, owing to a great and unusual influx of letters, books, &c., the transmission or delivery of the letters would be delayed if the whole mail were dealt with without distinction, Post Cards (unless paid for and posted as late letters) may be kept back

until the next despatch or delivery.

The conditions on which private cards are embossed with a halfpenny stamp can be ascertained at tho Office of Inland Revenue.

It will be seen from the foregoing rules, that there is no legal way of sending a letter, other than a circular letter, through the post for a postage of a halfpenny, except by means of a post card.

It must not be supposed that, because a post card, which is open to inspection, may have a letter written or printed upon it, any card whatever, and even any piece of paper, if only it be open to inspection, may be sent through the post with a letter written or printed upon it for a postage of a halfpenny.

It is well, therefore, to explain for the guidance of

the public-

1. That the letter-rate of postage must be prepaid for any communication of the nature of a letter, whether it be placed in a closed envelope or in an open cover, unless a post card be used for the purpose, or unless the letter be a "circular letter."

2. That cards having merely a halfpenny adhesive stamp affixed to them must not bear any communication of the nature of a letter, unless it be a

"circular letter."

<sup>\*</sup> In order that no failure may occur in the delivery of newspapers through the covers becoming detached, it is recommended that the addresses be written on exposed parts of the newspapers themselves as well as on the † Entries merely stating who sends the book, &c., or

to whom it is given, are not regarded as a letter. ‡ It is the duty of Postmasters, whenever they have ground for suspecting an infringement of any of the above conditions, and occasionally even when there is no ground for suspicion, to open and examine bookpackets posted at, or passing through, their office.

In order to secure the return of book-packets which cannot be delivered, the names and addresses of the senders should be printed or written outside; thus "From of

Large numbers of letters, not being circular letters, are from time to time found in halfpenny wrappers, contrary to the express provisions of the book post; and, as the officers of the department are instructed to surcharge all such letters with additional postage, it will save not only trouble to the Post Office but annoyance to the public, if care be taken always to pay letter postage for letters other than circular letters, unless they be written or printed on post cards.

#### INLAND PARCELS POST.

Dimensions.—The dimensions allowed for an Inland Postal Parcel will be—Maximum length, 3 feet 6 inches; maximum length and girth combined, 6 feet.

Examples.—A parcel measuring 3 feet 6 inches in its longest dimension may measure as much as 2 feet 6 inches in girth, i.e., around its thickest part; or—a shorter parcel may be thicker; e.g. if measuring no more than 3 feet in length, it may measure as much as 3 feet in girth, i.e. around its thickest part. Parcels must not be posted in a letter-box, but must be taken in to a Post Office and handed over the counter.

Despatch.—Parcels are accepted, at Head Office, for despatch to London until 9 a.m., 3 p.m., 5 p.m., and 8 p.m.; for all England, at 3 p.m. and 8 p.m.; for York and Hull, 5 p.m.; for all Ireland, 8 p.m.; for Ireland (South and West), 1 p.m.; for Scotland generally, 30 minutes before closing of letter box.

Delivery.—Parcels for the city (including Hillhead and Partick) are delivered at 7.30 a.m., 9.15 a.m. (Central Districts only), 11.15 a.m., 2.15 p.m., 5.15

p.m., and 7.30 p.m.

Posting of Parcels.—If a parcel be posted in a letter box it is not forwarded by Parcels Post, but is treated as a letter, or as a book packet, if it can pass under Book Post regulations. The address of a parcel must be clearly written, either on the outer wrapper or on a separate address label securely fastened to the parcel; and the necessary stamp or stamps, to prepay the postage, must in all cases be placed (as in the case of letters) close above the address. The words "Parcel Post" should be clearly written on the left-hand top corner of the parcel.

Certificates of Posting.—At the Chief Post Office, and at district branch and receiving offices, forms of certificates lie on the public counters, and anyone bringing a parcel to post, if he desire a certificate, may fill up one of these forms with the name and address of the person to whom the parcel is directed, when it will be the duty of the officer in attendance to stamp the form with the office stamp. This certificate, it must be clearly understood, does not indicate that any liability attaches to the Postmaster-General in the event of loss or damage. A list of parcels, when more than one parcel is brought by the same person, may be prepared beforehand or at the

counter by the person posting the parcels, and presented to be similarly stamped with the office stamp. This will obviate the necessity in such cases of filling up a separate form in respect to each parcel.

Parcels addressed to the Channel Islands (Jersey, Guernsey, Alderney, Sark, and the adjacent inhabited islets) are received from the public under the same general conditions with regard to weight and size, and at the same rates of postage, as parcels for all other portions of the United Kingdom; but as the Channel Islands, in relation to the customs laws of the United Kingdom, are subject to the same restrictions as foreign countries, such parcels are liable to customs examination at the port of arrival, and the sender is required to make a declaration of contents upon a special form provided for the purpose at the office where the parcel may be posted. Goods intended to be warehoused in the Channel Islands, or on which it is intended to claim "drawback" of duty on subsequent exportation from the Channel Islands, are not accepted for transmission by Parcels Post.

Parcels for the Isle of Man are treated in all respects in the same way as parcels for places in the United Kingdom generally. They are liable to examination by the officers of customs; but the sender is not (as in the case of the Channel Islands) called upon to furnish a declaration of contents.

Re-direction.—On receipt of a properly-signed authority, a parcel may be re-directed under the

following regulations:-

If the re-direction be from one place to another within the same delivery, the parcel, not having been delivered, and being re-directed by an officer of the department, is liable to no charge for re-direction; but if re-directed by any person other than an officer of the department, or to an address in another delivery, it is liable to additional postage at the full prepaid rate for each re-direction. If it has not been delivered and is re-directed by an officer of the department, prepayment for re-direction is not compulsory, but a parcel which has been delivered as addressed is not accepted for re-transmission unless the postage for re-direction be prepaid.

A request for the re-direction of letters is not held to include the re-direction of parcels, for which it is necessary to hand in a separate instruction.

Returned Parcels.—In order to facilitate the return of parcels which cannot be delivered, it is most desirable that the name and address of the sender should

appear on the outside of every parcel.

If a parcel which cannot be delivered bears on the cover the name and address of the sender, a printed notice is sent to him by post, informing him that the parcel (if not claimed in the meantime by the addressee) will be given up to him or to any person whom he may direct to call for it, or will be returned to him by post.

If the parcel is called for by the sender or his agent, or if it is returned to him by post, it is liable to a charge of 1d. for each day or part of a day after the expiration of two clear days following that on

which the notice has been sent.

If the sender elects to have the parcel sent back to him by post, he must return the printed notice, with stamps sufficient to cover new postage at the full rate, and also to cover any other charges to which the parcel may be liable, including the charge of 1d. a day described above. The parcel is then forwarded to him prepaid by stamps affixed thereon.

If no reply is received within six days after the date of the notice, or if the Postmaster has reason to believe that application is made for the parcel by a person who is neither the sender nor the addressee nor duly authorized by either, or if the sender fails to pay the charges due on the parcel, the parcel is sent to the Returned Letter Office.

If a parcel which cannot be delivered does not bear on the cover the name and address of the sender, it is sent to the Returned Letter Office, where it is

opened and examined.

If upon such examination the name and address of the sender are ascertained, a printed notice such as is described above is sent to him, and the parcel is treated in the same manner as a parcel upon the cover of which the name and address of the sender

appears.

If the name and address of the sender cannot be ascertained from the examination of the parcel, the name of the addressee of such parcel and the Post Office at which it was posted are entered on a list, which is exhibited in a conspicuous position at the Returned Letter Office of the District for inspection by the public.

Personal applications for parcels entered on such lists are entertained for three months from the date of entry, after which the parcels are finally disposed of.

Prohibited Articles.—The regulations under which certain articles are prohibited from transmission by the Letter Post will—with a few exceptions—apply equally to the Parcels Post. For instance, Gunpowder, Lucifer Matches, anything liable to sudden combustion, bladders containing liquid, and Live Animals, will be excluded from the Parcels Post. But Glass Bottles, Fish, Game, Meat, and all other articles not above mentioned, now excluded from the Letter Post, will be accepted to go by Parcels Post conditionally upon their being packed and guarded in so secure a manner as to afford complete protection to the contents of the mails and to the officers of the Post Office.

Packing of Parcels. - The public will greatly assist the work of the Post Office, and help towards the safe delivery of parcels, by taking care that they are in all cases strongly and securely packed, especially those with fragile or perishable contents. It must be borne in mind, although, of course, every care will be taken by the officers, that such a parcel must be several times handled before it reaches its destination, and will probably have to be packed with many others of a different kind and shape, or more weighty and bulky. It should not, therefore, be made up in paper of poor quality or loosely tied round with twine. Cardboard boxes and unprotected band-boxes are especially liable to damage. Parcels containing Scissors, Needles, Knives and Forks, or other Sharp Instruments, will not be accepted unless packed so as to prevent them from doing injury. Liquids, or semi-liquids, will not be accepted unless in bottles or cans securely stoppered, and bottles will be accepted only when so packed as to be secure from breakage. Powders must be so packed that they cannot escape. Parcels, the contents of which emit a strong odour, such as Fish, Game, Camphor, Pepper, Coffee, &c., must be packed with particular care, in order to guard against their causing damage to the Parcels Mails.

Addresses.—It is very desirable that parcels should be fully addressed, and that the name of the sender

should also appear, in case it may be found that the parcel cannot be delivered.

Sunday.—As parcels are not delivered on Sunday, fish, game, and other perishable articles should be posted in time for a delivery on Saturday.

Not to be given back to the Sender.—The rule forbidding that a letter should be handed back to the

sender applies equally to a parcel.

Bankrupts' Parcels.—The Post Office rales which apply to bankrupts' letters apply equally to bankrupts' parcels.

#### EXCEPTIONAL RATES OF POSTAGE.

Addresses to the Queen and Petitions to Parliament.

1. Petitions and addresses to the Queen, forwarded direct or through a member of either House of Parliament, are exempt from postage. Petitions to members of either House so addressed are also exempt, provided they do not exceed 2 lbs. in weight, and, if in covers, are in open covers. There must be no inclosure; any inclosure, unless it bear the proper number of postage stamps, will be charged as a letter.

2. Their is no restriction as to the size of these

petitions or addresses.

#### Parliamentary Proceedings.

1. Printed Votes or Preceedings of the Imperial Parliament, in open covers, having the words "Parliamentary Proceedings" written or printed thereon, may be sent within the United Kingdom and to the Colonies and those Foreign States to which there is a Book Post, at the book rate of postage; the prepayment, as regards inland packets, being optional. The limits as to size and weight are not applicable to Parliamentary Proceedings.

# REGULATIONS AS TO PREPAYMENT, REGISTRATION, &c.

Modes of prepayment.

The prepayment of Inland letters, newspapers, and book packets can only be effected by means of postage stamps—except that at the Chief Office, Glasgow, inland letters and book packets may be prepaid in money, provided the amount paid be never less than £5, and the letters and book packets be tied in bundles representing a postage of 5s. each, with the addresses arranged in the same direction. The prepayment, however, cannot be made partly in money and partly with stamps.

#### Registration.

 The fee for registering a letter, newspaper, book-packet, or other article, passing through the post between any two places in the United Kingdom is twopence.

No article addressed to initials or to a fictitious name can be registered, unless it be addressed to

the care of a person or firm.

3. Every article presented for registration must be enclosed in a strong cover, securely fastened. If the article contains money it must, in order to gain the benefit of the guarantee described at par. 9, be enclosed in a registered letter envelope sold by the Post Office, and if coins are sent, they must on no account be put in loose, but must be packed and enclosed in such a way as to move ahout as little as possible.

 Registered articles must be prepaid as regards both postage and registration fee; except official letters for Government Offices in London, Dublin, or Edinburgh, which may be registered on prepayment, in stamps, of the registration fee

5. Every article to be registered must be given to an agent of the Post Office, and a receipt obtained for it, and it should on no account be dropped into a letter-hox. If, contrary to this rule, an article marked "Registered" be dropped into the letter box it will, if directed to any place in the United Kingdom, be liable to a registration fee of 8d., instead of the ordinary fee of 2d.

6. At all Post Offices the latest time for posting registered articles on payment of the ordinary fee is shown on the notice exhibited in the Post Office window. Usually this time is fixed at half an hour before the closing of the Letter Box; but at the Head Office articles bearing a late fee of fourpence, in addition to the ordinary registration fee, may be registered at any time within the half hour, until the letter-box is closed, except for the English Limited Mail, for which they must be posted before 4.45 p.m., and on payment of a late fee of 4d. until 5.15 p.m.

7. When several letters are sent by the same person for registration they should be accompanied with a list (in duplicate) of the addresses; one list to be retained at the Post Office, and the other, when signed, to be returned by the bearer. This practice (which is adopted by many bankers) saves time both

to the public and the Department.

8. The registration of articles makes their transmission much more secure, inasmuch as they can be traced through their whole course; thus the loss of a registered article is a rare occurrence. Nevertheless, large sums of money or other articles of great value should not be sent through the post, even if registered; as the machinery of the Department is not arranged with a view to such transmissions. If sent unregistered valuable articles are exposed to risk, and offer a temptation which ought not to be afforded.

Inland letters or packets which contain coin, watches, or jewellery, if posted without registration, are treated as registered, and charged on delivery with a registration fee of eightpence in addition to the ordinary postage; and any such letters or packets which cannot be registered in time to be forwarded by the Mail for which they are posted, are

detained for the next despatch.

9. By law the Postmaster General is not responsible for the safe delivery of registered articles, but henceforth he will be prepared to make good the contents of a registered article lost while passing through the Post to the extent of £2 in certain cases, provided that the sender duly observed all the conditions of registration required; that the article was securely enclosed in a reasonably strong cover; and, if it contained money, that it was enclosed in one of the registered letter envelopes sold by the Post Office for the purpose; that application was made to the secretary of the Post Office immediately the loss was discovered. (When the complaint is that the contents of a letter or packet have been abstracted, the envelope must accompany the application, otherwise the question will not be entertained). That the Postmaster General, whose decision shall be final, is satisfied that the loss occurred while the article was in the custody of the British Post Office, and was not caused by any fault on the part of the sender. [The word "loss" here does not include

damage to an article which in fact reaches its destination, or destruction by fire or shipwreck, or by the dishonesty or negligence of any person not in

the employment of the Post Office. 7

[N.B.—The several postal administrations of the countries belonging to the Postal Union undertake to pay an indemnity of fifty francs in the event of its being proved to their satisfaction that a registered letter itself has been lost whilst in their custody, but no question of compensation is entertained by them for, or in respect of, the loss of the enclosure of any such letter.

10. No town postman is allowed to take a letter to be registered; but rural postmen will take letters for registration on their outward and inward walks,

whenever it is practicable for them to do so.

#### Re-direction.

1. Every inland re-directed letter, post-card, or other postal packet, is liable to an additional postage (at the prepaid rate) for each re-direction, unless both the original and the second address be within the delivery of the same Post Office, or Sub-Office, or rural walk, and the re-direction be made by an Officer of the Post Office.

Exception.-No charge for re-direction is made

on Government letters. (See also par. 6.)

An inland registered letter, when re-directed to any place within the United Kingdom, is only liable to the same additional charge as an ordinary letter.

3. If an inland registered letter, when re-directed, instead of being taken back to the Post Office to be dealt with as a registered letter, is dropped into the letter box as an ordinary letter (the word "registered" not having been erased, or having been erased in pencil only), it becomes liable to the same treatment as any other letter which is marked "registered" and found in the letter box, and must be surcharged with a registration fee of eightpence, minus the value of any stamps already affixed for the registration.

4. Notices of removal, and applications for letters to be re directed must, in all cases, be duly signed by the persons to whom the letters are addressed, and in provincial towns they must be sent to the local Postmaster. Printed forms of notice can be obtained at the Head Office on application.

5. A Postmaster is not bound to re-direct letters for a person temporarily leaving his home, and not having a private bag or box, unless the house be

left uninhabited.

6. Letters addressed to non-commissioned officers, schoolmasters in the army, schoolmistresses in the army, private soldiers, and seamen in the navy, redirected from one part of the United Kingdom to another, or from the United Kingdom to a place abroad (when the removal is on service), provided the original postage is prepaid and the letters do not exceed half an ounce in weight, will be delivered to them without any charge for re-direction.

#### Delivery.

1. Postmen are prohibited from distributing any letters, newspapers, &c., except such as have passed through a Post Office. Nor are they allowed to receive any payment beyond the postage for the delivery or collection of any letter, &c.; nor to deviate from the route laid down for them. prohibition from receiving payment in addition to the postage does not, however, extend to Christmas boxes.

2. No person living within an official delivery, nnless he rent a private box, can claim to have his letters delivered at the office window if a delivery by postman or a despatch by messenger is about to take place; but letters which arrive by a mail after which there is no immediate delivery by postman, may be obtained by any person on application at the office window, so long as the office is open for delivery.

3. When letters directed to a Post Office for persons who reside within a free delivery from such office, but who have no private box, arrive by a mail for which there is a delivery from house to house, a Postmaster may refuse to deliver them at the window, and may send them out by the postmen, except such as are addressed to the military in barracks.

4. Any person can have a private box who is willing to pay the appointed fee. The fee goes to the revenue, and is at the rate of £3 per annum, payable in advance. Special arrangements are made for locked bags to and from the renters of private boxes

and the Post Office.

A RETURNED LETTER OFFICE is established in Glasgow, and all undeliverable letters addressed to Glasgow and its sub-offices are disposed of there.

On reaching the Returned Letter Office a letter originating in the United Kingdom is at once opened, and if found to contain the writer's address is returned to him. If it does not contain either the writer's address or an article of value the letter is destroyed. Any letter or packet which on being opened is found to contain value is, for its safety, recorded and returned registered and, unless registered at the time of posting, the registration fee of 2d. is charged on the sender. Letters bearing the sender's name and address impressed or printed on the envelopes are returned unopened.

After being retained for periods varying from one week to two months, foreign and colonial letters are, with few exceptions, returned unopened to the coun-

tries from which they were received.

At Post Offices, which are not Money Order Offices, sub-postmasters are required to keep ½d. and 1d. stamps, post cards, and registered letter envelopes only; but they are bound, on application, to procure postage stamps of other values, embossed postage envelopes, and newspaper wrappers.

Impressed Bill Stamps of the respective values of 1d., 2d., 3d, 6d, 9d., and 1s., are for sale at the Chief Office, Branches, &c.

Dog and Gun Licenses are issued at all Money Order Offices.

Every rural messenger is authorized to sell penny postage stamps and registered letter envelopes, or (if he have no stamps in his possession) he must receive the postage in money, and on his arrival at the Post Office affix stamps carefully to the letters.

Payment of postage cannot be made by means of postage stamps which have been to'n, cut, or otherwise rendered imperfect; or of embossed or impressed stamps cut out from the envelopes, cards, or wrappers on which such stamps were embossed or impressed (even although the stamps have not been before used or sent by post). Applications for allowance on spoilt postage stamps, embossed envelopes, post cards, or newspaper wrappers, which have not passed through the post, should be made to the Distributor of Stamps, Inland Revenue. Such applications, however, can only be entertained if the stamps or other articles have been spoilt or become useless within the period of six months preceding the date of application. In the case of envelopes, cards, or wrappers, the applications must be accompanied by these articles intact; as no allowance can be granted on the embossed or impressed stamps if cut therefrom.

Postage Stamps purchased from the Public.

All postmasters in the United Kingdom at whose offices money order business is transacted, are per-

mitted, though not compelled, to purchase postage stamps from the public (provided the stamps be not soiled or otherwise damaged), at a charge of  $2\frac{1}{2}$  per cent.; the charge, however, never being less than one halfpenny. Under this arrangement the payments are as follows:—

In order to prevent the temptation to steal stamps attached to letters, which might be afforded by facilities for selling them, single stamps cannot be purchased. They must in all cases be presented in strips of not less than two.

In consequence of representations made to the Post Office by various firms, that there is reason to believe that their postage stamps were purloined by persons in their employ, the Department has recommended that the initials of firms, &c., be perforated through the stamps by means of a machine deviced for the purpose, and Postmasters have been instructed not to purchase such stamps. The perforation of the stamps on post cards, newspaper wrappers, and embossed envelopes with initials is also not objected to.

Paper taken by the public to the Inland Revenue Office can be impressed with postage stamps under conditions which may be learnt on application at that office.

#### Articles not allowed to be sent by Post.

- 1. It is forbidden to forward by post any indecent or obscene print, painting, photograph, lithograph, engraving, book or card, or any other indecent or obscene article, or any letter, newspaper, publication, packet, or card having thereon any words, marks, or designs of an indecent, obscene, libellous, or grossly offensive character. Anything posted contrary to this prohibition will be stopped and sent to the Returned Letter Office.
- 2. Postmasters are instructed not to receive any letter which there is good reason to believe contains anything likely to injure the contents of the mail bag, or to do bodily harm to any officer of the Post Office

The following are examples of the articles referred to:-

A glass bottle, or glass in any form; leeches, game, fish, meat, fruit, vegetable, or anything of a greasy or oily nature; bladders or other vessels contaioing liquids; gunpowder, lucifer matches, or anything which is explosive or liable to sudden combustion; razors, scissors, forks, or other sharp instruments are also forbidden, except when sent in packets of samples to the foreign countries mentioned in Rule 7, page 13.

# MISCELLANEOUS REGULATIONS AND SUGGESTIONS.

1. The Post Office is not, by law, responsible for any loss or inconvenience which may arise from the non-delivery, mis-sending, or mis-delivery of any letter, book, or other postal packet (even if the packet be registered). Nor is it responsible for

any injury which a packet may sustain in its transmission.

2. Postal packets which are likely to suffer from great pressure should be placed in strong covers. No fragile article should be sent by post at all.

3. No information can be given respecting letters which pass through a Post Office except to the persons to whom they are addressed; and in no other way is official information of a private character allowed to be made public. A Postmaster, may, however, give an address if he has no reason to believe that the person whose address it is would disapprove of his doing so.

4. Provision having been made, by means of the Post Office Guide, and the Glasgow Local Guide, to supply full and authentic information on all postal matters, the public should abstaio, as much as possible, from applying for such information to the officers of the department. For any error in a reply to a verbal application the Department does not

hold itself responsible.

5. Postmasters are not allowed to return any letter or other packet to the writer or sender, or to any one else, or to delay forwarding it to its destination, according to the address, even though a request to

such effect be written thereon.

6. Postmasters are not bound to give change, nor are they authorized to demand change; and when money is paid at a Post Office, whether as change or otherwise, no question as to its right amount, goodness, or weight can be entertained after it has been removed from the counter.

7. Postmasters are not bound to weigh any letters or other packets for the public, but they may do so

if their duty be not thereby impeded.

8. If a letter be forwarded under cover to any Postmaster, with a request that he will re-post it at his office, the letter, on being re-posted, will be endorsed with the words "posted at -, under

cover to the Postmaster of -

Every address should be legible and complete. When a letter is sent to a Post Town the last word in the address should be the name of that town, except when the town is but little known, or when there are two Post Towns of the same name, or when the name of the town is identical with or very like the name of some foreign town or country. In such cases the name of the County should be added. Thus, the last part of the address of a letter to Newport in Monmouthshire should be-

#### "Newport,

Monmouthshire."

10. When a letter is sent to a place where there is only a Sub-office, the name of the Head Office should be given. Letters posted in one part of the United Kingdom and intended for another (as, for example, letters posted in Scotland and intended for England) should have the name of the Country to which they are sent added to the address, unless the letters be intended for either London, Glasgow, Edinburgh, Dublin, or other very large towns, when such addition is unnecessary.

11. The number, too, of the house should appear; its omission being a cause of delay in the sorting; and tending to retard the general delivery. In the case of letters for places abroad, the name of the country as well as the town should be given in full, and should be the last word in the address. Attention to this latter precaution will often assist in deciphering the name of a town, and prevent the letter from being mis-sent when there are towns of the same name in different countries. For example: a letter intended for London in Western Canada, but simply addressed "London, W.C.," would be forwarded to the Western Central District of the Metropolis in England.

Letters for well-known firms and persons in Glasgow are sometimes addressed "Glasgow" only: but this practice often causes delay in their delivery. Letters for strangers or for person whose address is not known at the Chief Office, simply addressed "Glasgow" (and not "Post Office," or "Poste Restante, Glasgow,") are not delivered from the Poste Restante, but are sent to the Returned Letter Office.

13. A letter addressed to a Post Office to be called for is retained one month; and if not called for by the end of that time, is sent to the Returned Letter Office to be sent back to the writer. But if the letter be addressed to a Post Office at a seaport town for a person on board a ship expected to arrive at that port, it is kept two months.

14. Letters or parcels addressed to initials or to fictitious names at Provincial Post Offices are not taken in, but are at once sent to the Returned Letter Office.

15. All letters addressed to club houses, hotels, and other places where letters are received to be called for, should be returned to the Post Office as soon as it has become evident that they will not be called for.

16. Every letter should contain the full address of the writer, in order to ensure its return if undelivered.

17. To facilitate the delivery of letters, a letterbox should be affixed to every house-door.

18. Much trouble is saved to the office if circulars, before being posted, are tied in bundles with all the addresses in one direction. Correspondence posted early in the day not only obtains in many cases the advantage of an earlier delivery, but frequently avoids the risk of delay from irregularity in the working of the trains.

19. Any person who, on receiving a surcharged letter, has reason to think that it has been wrongly taxed, should take it, before it has been opened, to the Post Office to be weighed, and if it then appear that it does not turn the scale, should bave its exact weight certified in writing. This will in most cases be sufficient evidence that the letter has been erroneously charged; though sometimes, owing to the paper being damp when it is posted, a packet weighs more then than when it is delivered; and it is the weight at the time of posting that determines the charge.

20. When complaint is made of a letter or other postal packet being lost, mi-sent, or delayed, information, as precise as possible, regarding all the facts of the case should be furnished, together with any documents that may throw light upon the matter. The day and hour at which the letter, &c., was posted, as well as the office at which and the person by whom this was done, should always be stated; and when possible, the cover or wrapper in an entire state should be sent, in order that the place of delay may be ascertained by an examination of the stamps.

21. Neither money nor any other article of considerable value ought ever to be sent through the post, except by means of a money order or in a registered letter. Any person who sends money or jewellery in an unregistered letter, not only runs a risk of losing his property, but exposes to temptation every one through whose hands his letter passes.

22. Whenever Bank Notes are sent by post, even in registered letters, they should be cut in halves, and the second halves should not be posted till it has been ascertained that the first halves has been received; and further, in order to afford the means of identification, a memorandum should always be made of the number of each bank note.

23. Except where the Surveyor may deem a longer interval necessary, late letters,\* &c., are received till within five minutes of the despatch of the mail; although no office is kept open merely for

this purpose after 10 o'clock at night.

24. No late letters, &c. (except Government letters) are forwarded by the mail preparing for despatch unless prepaid, and that by stamps, including both the ordinary postage and the late letter fee. The late fee payable upon Post Cards is the same as upon letters. In the case of letters directed to any department of Government, it is sufficient to prepay the fee.

25. Letter boxes for the receipt of late letters bearing the extra stamp of \( \frac{1}{2} \)d. are affixed to all Mail trains in which travelling post offices or sorting car-

riages are run.

26. Sunday.—During the time the office is open on Sunday the public are allowed to purchase postage stamps and to have letters registered (viz.) from nine to ten in the morning; but no Money Order, Savings Bank, Insurance, or Annuity business is transacted on Sunday.

27. At no provincial town in England or Ireland is there more than one delivery on Sunday, Christmas Day, or Good Friday; nor in Scotland on Sun-

day or the Sacramental Fast Days.

Penalties for sending Letters otherwise than through the Post.

29. Any person conveying (otherwise than by the Post) a letter not exempted from the exclusive privilege of the postmaster-general incurs, by law, a penalty of £5 for every letter, and £100 for every week the practice is continued. The sender also is liable to a penalty of £5 for every letter.

30. Exceptions.—The exclusive privilege of the postmaster-general is confined strictly to letters, and does not therefore extend to newspapers, books, or money; any of which may be legally conveyed by other means. The following kinds of letters also

need not be sent through the post :-

1st. Letters sent by a private friend, to be delivered by such friend to the person to whom they

shall be directed.

2nd. Letters sent by a messenger on purpose, concerning the private affairs of the sender or receiver thereof; commissions or returns thereof, and affidavits and writs, process or proceedings or returns thereof, issuing out of a court of justice.

3rd. Letters sent out of the United Kingdom by

a private vessel (not being a packet boat).

4th. Letters of merchants, owners of vessels of merchandise, or of the cargo or loading therein, sent by such vessels of merchandise, or by any person employed by such owners for the carriage of such letters, according to their respective directions, and delivered to the respective persons to whom they shall be directed, without paying or receiving reward or profit for the same in anywise.

5th. Letters concerning goods or merchandise sent by common carriers, to be delivered with the goods which such letters concern, without hire or other advantage for receiving or delivering such letters.

31. No person, however, is authorized to make a collection of such excepted letters for the purpose of sending them in the manner above described.

32. The following persons are expressly forbidden a to carry a letter, or to receive or collect or deliver a letter, even though they shall not receive hire or reward for the same:—

1st. Common known carriers, their servants or agents, except a letter concerning goods in their carts or waggons, or on their pack horses; and owners,

drivers, or guards of stage coaches.

2nd. Owners, masters, or commanders of ships, vessels, steam-boats, or boats called or being passage or packet hoats, sailing or passing coastwise, or otherwise between places within Great Britain or Ireland, or between, to, or from ports within Her Majesty's dominions or territories out of the United Kingdom, or their servants or agents, except in respect of letters of merchants, owners of ships, or goods on board.

3rd. Passengers or other persons on board any such ships, vessels, steam-boats, passage or packet boat.

4th. The owners of or sailors or others on board a ship or boat passing on a river or navigable canal within the United Kingdom or other Her Majesty's dominions.

10. The addresses of letters for Russia should be very plainly written; the name of the town, and of the province in which it is situated, should also be

added in English, French, or German.

#### Foreign and Colonial Newspapers.

1. The rates of postage, which must be prepaid, to foreign countries and the colonies on newspapers registered for transmission abroad will be found in the

Table of Foreign and Colonial Postage.

2. The conditions of registration for transmission abroad are the same as those for inland transmission; excepting that for foreign transmission a newspaper may be published at intervals of thirty-one days. Moreover, prices current and market reports (but not private price lists or trade catalogues) may be registered as newspapers for foreign transmission, provided that they be published at intervals not exceeding thirty-one days.

3. All publications registered for transmission abroad must be posted within eight days from the day of publication, including that day; and any newspaper posted more than eight days after the date of publication, as well as any unregistered publication, must be prepaid at the book rates of postage.

4. The collected numbers issued during the month of a weekly or fortnightly publication are not allowed

to pass as a monthly publication.

5. Newspaper, whether posted in covers or without covers, must not be fastened so as to prevent easy withdrawal for examination.

6. Every newspaper must be so folded as to admit

of the title being readily inspected.

7. No newspaper, whether posted singly or in a packet, may contain any enclosure except the supple-

ment or supplements belonging to it.

8. 9. No packet of newspapers may exceed two feet in length or one foot in width or depth. The limit of weight, which is not the same to all countries, is stated in the heading of the Table of Colonial and Foreign Postage.

Foreign and Colonial Book Post.

1. Articles which may be sent to places abroad under the Book Post Regulations consist of two

classes, as follows:-

1st. Commercial Papers, under which are comprised all papers or documents written or drawn wholly or partly by hand (except letters or communications in the nature of letters, or other papers or documents having the character of an actual and personal correspondence), documents of legal procedure, Deeds drawn up by public functionaries, copies of, or extracts from Deeds under private seal (and whether written or printed on stamped or unstamped paper), Way Bills, Bills of Lading, Invoices, and other documents

of a mercantile character, documents of Insurance and other public Companies, all kinds of manuscript Music, the manuscript of Books and other literary works, and other papers of a similar description.

2nd. Printed Papers, including periodical works, books (stitched or bound), pamphlets, sheets of music (printed), visiting cards, address cards, proofs of printing (with or without the manuscript relating thereto), engravings, photographs (when not on glass or in frames containing glass), drawings, plans, maps, catalogues, prospectuses, annonncements, and notices of various kinds, whether printed, engraved, or lithographed, and in general all impressions or copies obtained upon paper, parchment, or card-board by means of printing, lithographing, or any other mechanical process easy to recognise, except the copying press, and anything usually attached or appurtenant to any of the before-mentioned articles in the way of binding, mounting, or otherwise, and anything convenient for their safe transmission by post which, shall be contained in the same packet; also printed, engraved, or lithographed circulars, notwithstanding that such circulars may be letters or communications in the nature of a letter.

The two classes are subject to the same rates of postage, except that when addressed to countries in the Postal Union, the initial rate for commercial papers is higher than that for printed papers. If there be any mixture of the two in the same packet the whole packet is treated as commercial papers.

2. A book packet may be posted either without a cover (in which case it must not be fastened, whether by means of gum, wafer, sealing wax, postage stamp, or otherwise), or in a cover open at both ends, so as to admit of the contents being easily withdrawn for examination; otherwise it is treated as a letter. For the greater security of the contents, however, it may be tied at the ends with string, postmasters being authorized to cut the string in such cases, although, if they do so, they must again tie up the packet.

3. Dimensions.—The limit of size for a packet addressed to any place abroad is 24 inches in length and 12 inches in width or depth. For imit of weight see heading of the Table of Foreign and

Colonial Postage.

4. Rates of Postage.—The rates of Postage, which must be prepaid on packets to places abroad, are given in the Table of Foreign and Colonial Postage.

The following information respecting books and photographs for the United States has been received from the Post Office at Washington:—"The only books absolutely free from Customs duty, under the United States laws, are those which have been printed more than twenty years; and pamphlets, periodicals, and other like publications, for the personal use of the individual to whom they are addressed. Nevertheless any book valued at not more than one dollar is also considered as exempt from Customs duty; and so are photographs, when sent in limited numbers, for the private use of the person to whom they are addressed, or for distribution to relatives or friends."

1. There is a Pattern and Sample Post to foreign countries and the colonies generally; but it is restricted to bond fide trade patterns or samples of merchandise. Goods sent for sale, or in execution of an order (however small the quantity may be), or any articles sent

#### UNITED EVANGELISTIC ASSOCIATION.

This association was formed in 1874, for the purpose of uniting the churches in evangelistic work among the masses. In addition to ordinary evangelistic services, open air preaching, &c, a hall was built in James Morrison Street, at a cost of about £16,000, where a free breakfast is given every Sabbath morning to upwards of 1500 people, gathered from the very poorest; and at 2 o'clock p.m., about 1000 poor children receive a Bible lesson and a dinner. Two Day Refuges have been carried on for some years. where children, who are entirely or worse than neglected at home, receive three meals a day, and are otherwise helped in their education. There are also two Homes at Saltcoats, in which neglected or abandoned children are entirely supported. In connection with the children's Sabbath dinner a committee meets every Thursday at 7:30 p.m., in the new hall, James Morrison street, to inquire into the cases of poor children sent from any quarter. Income of the association, for all purposes, from voluntary contributions, about £5000 per annum.

The gospel has been preached to tens of thousands of the working classes and non-church goers, and visitation of the low lodging-houses and tract distribution has been carried on by voluntary workers. No one is called on for subscriptions. The work is carried on in dependence upon God, and during the last fourteen years He has sent, in answer to prayer, upwards of £120,000. About £50,000 of this has been expended in purchasing ground and on the buildings of the City Home and the National Homes, Bridge of Weir, which are vested in Trustees.

There is no committee, but a balance sheet, properly audited by a chartered accountant, is submitted at the annual public meeting, and printed and circulated. Donations are acknowledged to friends sending their addresses, and also every second Monday in N. B. Daily Mail. Last year 1045 children were dealt with in the Homes, 250 of whom were sent to Canada, about 200 were disposed of in this country, and there are at present 650 in the Homes. In the same time £15,000, or about £40 a day, were sent in towards their support. A larger sum will be needed this year, as the numbers are increasing and additional buildings are required. RAILWAY BENEVOLENT INSTITUTION, FOR THE RELIEF OF RAILWAY OFFICERS AND SERVANTS, THEIR ORPHANS, WIDOWS, AND CHILDREN, WHEN IN DISTRESSED CIRCUMSTANCES.

INSTITUTED MAY, 1856.

The Scottish Branch is under the special patronage of Her Most Gracious Majesty the Queen, and in December, 1884, Her Majesty sent a donation of Fifty Pounds to the fund in Scotland. Scotch branch office, St. Enoch Station, Glasgow. Committee of management in Scotland-Chairman, W. J. Wainwright, Esq., Glasgow & South-Western Railway; Archd. Gibson, Esq., Caledonian Railway, Geo. K. Ellis, Esq., Highland Railway, Geo. Cunningham, Esq., North British Railway, Irvine Kempt, Esq., Caledonian Railway, John Mathieson, Esq., Glasgow & Sonth-Western Railway, William Moffatt, Esq., Great North of Scotland Railway, John Morton, Esq., Glasgow & South-Western Railway, D. M'Dougall, Esq., North British Railway, Jas. M'Laren, Esq., North British Railway, Thomas Robertson, Esq., Highland Railway, J. S. Stuart, Esq., Great North of Scotland Railway, James Thompson, Esq., Caledonian Railway, John Walker, Esq., North British Railway; bankers, National Bank of Scotland (St. Enoch Square branch).

This institution affords a channel for those who sympathize with railway servants through which to help them in the time of need, and the extent of its sphere of usefulness depends in a great measure upon public support. It has been established to provide for the necessitous members, orphans, children, and widows of the railway officers and servants in the United Kingdom. Its object is to clothe, maintain, and educate orphan children, and to grant relief by annuities and money allowances to members who, from old age, disease, or accident, may be unable any longer to obtain a livelihood, and to the widows of those who may be left in distressed circumstances. Railway officers subscribe 10s. 6d. per annum, railway servants 8s. per annum, to constitute them members, or they may subscribe 2s. per annum to the orphanage only. One moiety of the funds contributed by the public is apportioned between an officers' department and a servants' department in proportion to the amount the members severally subscribe; the other moiety of the donations is applicable to a special benevolent fund for relieving distress amongst officers or servants, whether members of the institution or not. and the widows and orphans of men killed in the performance of their duty. The sum set apart for the orphans of officers is appropriated to their maintenance and education in private establishments selected by their friends and approved by the board of management. Should the funds be insufficient to provide pensions or school benefits for all qualified applicants, there is an election by ballot, and the election of annuitants and orphans is vested in the subscribers, who have also the privilege of recommending cases for gratuities out of the special benevolent fund. In dispensing relief the rules of the institution provide that "the most necessitous must at all times be first relieved."

Donations and subscriptions.—A donation of £105 in one sum, or in payments of not less than £10 10s. each, constitutes the donor a patron or patroness for life, with the privilege of fifteen votes. A donation of £52 10s. in one sum, or in payments of not less than £10 10s. each, constitutes the donor a vice-president for life, with the privilege of six votes. A donation of

£10 10s. constitutes the donor a life subscriber, with the privilege of one vote. A yearly payment of £1 1s. (or in quarterly or half-yearly instalments) constitutes a subscriber, with the privilege of two votes. An annual subscription of 10s. 6d. constitutes a subscriber, with one vote. Any three donors or subscribers may also recommend applicants qualified for relief from the special benevolent fund.

Appeal.—The Scotch committee of management respectfully and earnestly appeals for aid to the shareholders of railways individually, as specially interested in those upon whom devolve the executive duties in their railway establishments, and to the benevolent of all classes, who are either directly or indirectly benefited by the services of a numerous, well-disciplined, and laborious class of public servants. Donations and subscriptions will be gratefully received and duly acknowledged by the secretary for Scotland, Joseph Tatlow, St. Enoch Station, Glasgow.

The aim of the Society is to provide warm clothing for the poor fever patients when about to be dismissed from the comforts of the hospitals to their own homes. In too many cases their original clothing is scanty and utterly insufficient to protect even a vigorous person from the cold. But for the aid of the society they would, when divested of the warm suits provided for use within the hospital, be sent out in tattered garments, as well as with enfecbled bodies, almost certainly to the permanent injury of their health. The utmost care is taken that the articles are given to the needy and deserving only. There is no convalescent home for poor fever patients.

Spiritualists claim to know that the so-called "dead" are alive and able, under certain conditions, to communicate with earth-dwellers. That the practice of spirit-communion and the exercise of "spiritual gifts" (viz. mediumship) has been common iu all ages, and is possible now; such communion, proving human immortality, provides a basis of fact for belief in a future life, and an incentive to right living here.

Our object is to present and teach the spiritual philosophy and encourage investigation into the phenomena, that the knowledge of spiritual existence may bless humanity and the cultivation and exercise of spiritual gifts lead to a growth in spirituality in this world to prepare us for the next.

The New Business in 1884 Exceeded	-	-	-	17,600,000

Over £16,800,000 have been paid to policyholders in twenty-five years.

Il profits divided among policyholders. Policies indisputable after three years from their date. THIS Society has for some years done the largest business of any office in the world, and has introduced a new form of Life Assurance, known as the TONTINE SAVINGS' FUND POLICY. In this plan the profits are divided at stated periods, viz., TEN, FIFTEEN, or TWENTY YEARS,

hich must be determined upon at time of entry. When the Assured's TONTINE period has arrived e becomes entitled to his share of the Accumulated Profits, and he is then given one of the following

First.—To take the cash value of his Policy.

Second.—To take a paid up non-participating Policy for an equivalent of its cash value. Third.—A yearly increasing annuity and the original sum at death to his heirs.

The following Table gives the results, as estimated, of a 20-year Policy taken out on the Tontine avings' Fund plan of Assurance :-

#### SUM ASSURED, £1000.

ESTIMATED RESULTS AT THE END OF 20 YEARS.

1	Age.	Annual Premium.	Total Premiums Paid.	Cash Value of Policy.	Equivalent Value in Paid up Policy.	Annuity for Life and £1000 at Death.			
The second second	25 35 45	£19 17 6 26 7 6 37 19 2	£397 10 0 527 10 0 759 3 4	£533 0 0 769. 0 0 1190 0 0	<b>£</b> 1290 0 0 1460 0 0 1810 0 0	£8 14 8 22 1 8 67 13, 5			

Thus, one aged 25, after 20 payments of £19 17s. 6d., may choose any of the three ways, viz., cash 533, and give up his Policy; a paid-up Policy for £1290; or an annuity of £8 14s. 8d., increasing early, and the £1000 at death to his heirs.

Or, if the Policies are taken out upon the higher scale of Premium in the Tontine Class, the dvantages are still more apparent, as may be seen by the following Table:-

#### THIS SOCIETY DIFFERS IN ITS PRINCIPLES FROM OTHER OFFICES.

INSTEAD of charging rates higher than are necessary, and afterwards returning the excess in the shape of periodical Bonuses, it gives from the first as large an assurance as the Premiums will with safety bear—reserving the Whole Surplus for those who live long enough to secure the Common Fund from loss.

A Policy for £1200 to £1250 may thus at most ages be had for the Premium usually charged for £1000 only; while, by RESERVING the Surplus, large Additions may be looked for on the Policies of those who participate. At last Investigation Policies for £1000 sharing a first time were increased to sums ranging from £1170 to £1300. In some cases Policies which shared at the whole four divisions have now been doubled.

Its Terms are thus specially adapted to the case of Provisions in Family Settlements, or therwise, where it is of importance to secure, for the smallest present outlay, a competent provision of definite amount in the case of early death.

#### Annual Premium for £100 at Death (with Profits).

- \* A person of 30 may thus secure £1000 at Death by a yearly payment, during life, of £20 15s., which would generally secure elsewhere about £800 only.
- † At age 40, the Premium ceasing at age 60, is for £1000 £33 14s. 2d.—being about the same as most Offices require to be paid during the whole term of life.

#### The New Business has, for several years, exceeded a Million annually.

The Expenses of Management (under 9 per cent. on Premiums, or 6 per cent. on Total Income) are greatly under those of any Institution doing a large amount of New Business.

The FUNDS have increased in the last ten years by 22 MILLIONS.

The PREMIUM INCOME has doubled in Ten Years.

The FUNDS now exceed FIVE MILLIONS.

Only two Offices in the Kingdom (both much older) have as large a Fund.

Full Statements of Principles will be found in the Annual Reports, which may be had o pplication.

#### GENERAL REVISION OF RATES, 1885.

N entering on the Forty-Sixth Year of the Association, the Directors have caused a careful revision to be made of the Rates of Premium and Conditions of Assurance (1) the most exact da'a available at the present time, and New Conditions have been introduced into the Contract of Assurance, conferring liberal and advantageous Privileges on the Assured. It will be found that, in point of Economy, the New Rates compare favourably with those of any other Office; and the attention of the public is particularly directed to the Low Rates of Premium for Fixed Benefits, by which the largest Amount of The Immediate Assurance may be effected at the lowest Present Outlay. Combined with the Extended Non-Forfeiture System of the Association, these Assurances present a very secure and highly advantageous method of Provision in the shape of FAMILY TRUST POLICIES, issued under the 'MARRIED WOMEN'S POLICIES OF ASSURANCE (SCOTLAND) ACT, 1880,' free from the control of Creditors.

#### IMMEDIATE PARTICIPATION IN PROFITS.

The Profits are ascertained and divided every Five Years-Nine-Tenths (Ninety Per Cent.) being appropriated to the Assured, and each Policy-holder having an equitable share allotted to him. however recent his Assurance. At the Seven previous Periodical Investigations, REVERSIONARY BONUS Additions, at rates which have never been less than

#### ONE POUND TEN SHILLINGS PER CENT. PER ANNUM,

were made to the Sums Assured by all Participating Policies effected for the Whole Term of Life. Thus a Policy for £1000 opened in 1840 now amounts to £1650.

# THE EIGHTH DIVISION OF PROFITS WILL TAKE PLACE AT CHRISTMAS NEXT. Policies effected during 1885 will then be entitled to ONE WHOLE YEAR'S BONUS ADDITION.

Policies are World-wide and Indisputable after Five Years. Claims are payable immediately after Proof of Death.

Loans are granted, in connection with Life Assurance, on LIFE INTERESTS, REVERSIONS, PERSONAL,

and other approved securities. LIBERAL CONDITIONS as to FOREIGN RESIDENCE.

\*\* The New Prospectus, containing the Revised Tables of Premiums and full information as to the Extended Conditions of Assurance, and also Forms of Proposal, may be had at any of the Offices or Agencies of the Association.

DONDS are granted whereby the Company undertakes to make good loss by reason of the fraud or dishonesty of persons receiving or holding money, or securities for money, or intrusted with property of any kind (such as Receivers in Chancery or Bankruptcy, Managers, Secretaries, Collectors, Clerks, and Travellers).

The guarantees of Companies are now universally accepted in preference to private security. They have for some years been tested by Her Majesty's Government, the largest Railways, and other Public Bodies, and found to be immeasurably superior in every way to those of private sureties. A Company's guarantee relieves the employed from the necessity of placing himself under any obligation to his friends, and can be obtained, as a matter of course, by any one having a good character, while it gives to the employer absolute security and the greatest facility for recovering any loss he may incur.

The Premiums vary according to the nature of the situation and the duties to be performed. Length of service, position, and means are all matters taken into consideration in affixing the

Premium to be paid.

#### GOVERNMENT BONDS.

Bonds of this Company are granted to and accepted by the various departments of Her Majesty's Government at Home and in the Colonies, and by the Law Courts in England and Ireland, for Receivers, Liquidators, and as Security for Costs.

The Pall Mall Gazette, in returning to the consideration of prevailing defects in the regulations of Life Assurance Companies, says of the Scottish Life Prospectus:—
"This prospectus has just been sent to us, and the claims it urges in favour of the Company are, broadly speaking, that it carries out nearly every one of the improvements, and remedies most of the defects to which we drew attention."

# WESTERN INFIRMARY

GLASGOW.

(For list of Managers, Medical Officers, and other particulars, see page 124 in the Appendix).

#### STATEMENT AND APPEAL.

- I. The Western Infirmary was opened in the beginning of November, 1874, with 200 beds. but by the munificence of the late Mr. John Freeland of Nice, the accommodation was increased to 400 beds at a cost of £40,000. The new addition was opened in 1881, and was at once made available to the public.
- II. During the year (ending 31st October, 1884) 22,039 out, and 3459 in-door patients were treated, showing a total increase of 3028 as compared with the preceding twelve months.

The Freeland addition to the Infirmary being now fully occupied, it is estimated that the cost for maintenance during the current year will be from £19,000 to £20,000; and as the ordinary income from all sources last year was under £14,000, the necessity for new and increased support will readily be seen. The liberal spirit, however, in which all classes of the community have hitherto supported the Institution gives the Managers confidence in believing that the appeal which they now make will meet with a prompt and generous response.

III. The Managers take the liberty of drawing attention to the subjoined Form of Bequest, in the hope that from this source they may be enabled gradually to accumulate a special fund from the investment of which, in so far as it is not required for contingencies, a considerable supplementary revenue may in time be derived.

#### FORM OF BEQUEST TO THE WESTERN INFIRMARY.

do hereby leave to the WESTERN INFIRMARY OF GLASGOW, free of legacy duty and charges, a Legacy of \* pounds disterling, which I authorise and direct my Executors to pay to the Treasurer or Secretary thereof for the time being, upon his receipt, which shall be a sufficient discharge. Funds are required and earnestly solicited for the upkeep of the Infirmary; all Annual Contributions and Donations sent to the Subscribers will be thankfully received and duly acknowledged.

SPECIALITY BAKERS' PLANT, INCLUDING PATENT SIMPLEX DOUGHER, SIMPLEX BRAKE, SIMPLEX STIRRER, DOUGH DIVIDING MACHINE, BISCUIT MACHINES, TRAVELLING AND REEL OVENS, &c.

### SIMPLEX DOUGHING MACHINE.

(PATENT).

THIS Machine by its peculiar construction combines all the properties of a perfect bread dougher, and possesses the following important advantages over every other machine in the market:—

The dough is thoroughly mixed and kneaded without being felled, requires no after-treading, and readily acquires in moulding a superior skin.

The Machine empties itself without requiring to be reversed.

The friction is about one half, and the power required to drive about thirty per cent. less than in other machines. One of the Simplex Machines with only 4 in. belt and 9 ft. drive is doughing 3 batches—6½ sacks of 280 lbs.—in 8 minutes.

The Machine is simple, very strong, and not liable to get out of repair. The casing is of best steel plate.

The price is extremely moderate.

These Machines are made in three standard sizes, 5 and  $2\frac{1}{2}$  sacks for power, and one sack (280 lbs.) for power or hand. They have recently been fitted into some of the finest Bakeries in Glasgow and neighbourhood.

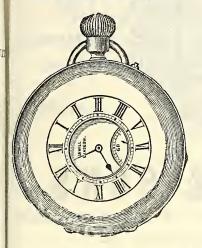

Full particulars, together with estimates for every description of Bakers' Plant,

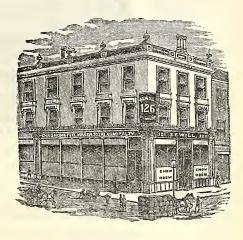

including Gas and Steam Engines, to be had from

#### RECENT PUBLICATIONS.

A NEW HIGH-CLASS ATLAS, Constructed and Engraved by John BARTHOLOMEW, F.R.G.S., from the best and latest authorities, embracing the most recent Discoveries and Changes in Boundaries, and finely Printed in Colours, entitled "THI INTERNATIONAL ATLAS AND GEOGRAPHY, Modern, Historical, Classical, and Physical, consisting of 130 Maps, with Illustrated and Descriptive Letterpress, by JAMES BRYCE, LL.D., WILLIAM F. COLLIER, LL.D., and LEONHARD SCHMITZ, LL.D., and Indices containing upwards of 50,000 names. Imperial Folio, Half-bound Morocco extra. Gill Edges, £3 3s.

"A very handsome and convenient atlas, containing 130 singularly clear maps, with careful indices, and an excellent preliminary sketch of physical geography, by Dr. James Bryce. The maps include large and good maps of the great colories, and the different divisions of the United States; maps of India, as divided by Presidencies; a separate map of Burmab, and another of Japan; and, in sbort, just those additional maps for which one is always searching. The atlas also contains fourteen maps of classical geography and sixteen of historical geography, of which one, illustrating the rise of the British Empire in India, is quite new to us."-Spectator.

"Although maps of several parts of the world quickly become obsolete, it is not often that an entirely new atlas appears, probably on account of the great expense involved in its preparation. When, therefore a work of this kind is undertaken, it may be expected to justify its existence by fulness of information and excellence of workmanship. The atlas before us may be said to withstand the test here indicated. The International Atlas' seems likely to achieve considerable success."-Times.

" For all purposes of ready reference, as well as for study, the work will be found exceedingly useful. As a test of the careful revision by which the work has been brought down to date, the map of Turkey in Europe may be examined; and it will be seen that all recent political alterations and settlements o boundary are plainly shown, so that Torkey is here seen as she now exists." - Daily Telegraph.

#### IMPORTANT GEOGRAPHICAL WORK OF REFERENCE.

the late Dr. James Bryce, M.A., F.R.S.E., and the late Keith Johnston, F.R.G.S., entitled THE LIBRARY GAZETTEER OF THE WORLD, forming a Cyclopædia of Geography Descriptive, Physical, Political, and Historical. New Edition, thoroughly Revised and greatly Enlarged, with Woodcut Illustrations. In Royal Svo., Cloth, 15s. Extract from Keith Johnston's Preface :-

"The present edition may be said to be altogether a new work, the number of places described has been more than doubled. I have spared no pains to ensure accuracy by allowing no statement or measurement has to pass without verification or comparison of authorities in its support. In this I have had throughout the able assistance of Mr. Turner, of the Royal Geographical Society. Many of the longer articles in have been written by students or travellers who have special knowledge of particular subjects or countries, and amongst the names of contributors will be found Dr. Carpenter, Dr. Brown, Dr. George Smith, Mr. Ravenstein, and Dr. James Bryce, author of the 'Holy Roman Empire.'"

#### THE LIBRARY DICTIONARY of the ENGLISH LANGUAGE.

. £0 10 "This 'Library Dictionary' is the best work of the kind which we as yet possess." - Morning Post.

"Its definitions of words common and uncommon are full and precise, and to the body of the work are added very compact vocabularies of foreign words and phrases, Scottish words, abbreviations, and much else that is welcome and not often to be met with."—Examiner.

"It is the cheapest of the complete dictionaries of the day."—Educational Reporter.

# GLASGOW ROYAL INFIRMARY

THIS Institution has now been in existence for nearly a Centur. It has accommodation for 550 Patients, and the Wards generally full.

Though managed on the strictest economic principles, the Onnary Expenditure of last year was nearly £25,000; while the Ordinary Income, including about £4000 of Interest on Legacinvested, was under £19,000.

For a number of years the Ordinary Expenditure has been, an average, about £5000 in excess of the Ordinary Income. The has, consequently, been a serious drain upon Invested Fundand this cannot long continue, as a considerable portion is beyon the control of the Directors, and partly held in Trust, liable Repayment.

They, therefore, earnestly appeal to the Public for increase Liberality, in order that the same state of efficiency may maintained, without the necessity of curtailing the accommodation.

The most recent improvements in the Nursing System, and in the Domestic Arrangements, have been introduced: and the Directors have reason to believe that there is no similar Institution the Kingdom, in which Patients are so well provided for at little expense.

# RAIN AND GENERAL GRINDING MILLS; AND COFFEE ROASTING WORKS.

DAVID MINTO & SONS,

GRÆME STREET.

HE COFFEE PLANT, "Coffea Arabica" of Linnaus, is an evergreen, and, as may be inferred from its scientific ame, is a native of Arabia. It produces a pulpy berry about the size of a small cherry, inclosing two seeds, thich, separated from their pulpy envelope, form the well-known Coffee beaus of commerce. It may be remarked a singular fact, in reference to Coffee, that while all of the vegetable kingdom that have been taken under the care of man have been improved, it alone asserts its independence; for although cultivation may greatly inlarge the crop, it as certainly at the same time deteriorates the flavour, and the produce of the wild plant ill maintains the highest figure in the market. It is well known that Coffee would be of no real value ere it not properly roasted—a process which, as it requires much skill, is only to be acquired by experience, low man became acquainted with the fact that the tasteless seeds of a berry, when roasted, ground, and infused, would form a grateful beverage, will most probably remain a secret to the end of time. That the evelopment of its useful properties depends wholly upon the roasting, is evident. About two hundred ears ago Coffee was first introduced into England, since which its consumption has steadily increased, and eservedly so, when its medical properties are considered, it having been found useful in headaches arising rom a particular state of the stomach, and much benefit having been derived from its exhibition in cases f asthma.

A French scientific gentleman, who has directed his attention to this subject, says:—' I have found that loffee is better roasted, and more of the aroma retained, when a double cylinder is nsed—the air between he interior and exterior cylinders acting as a non-conductor of heat. It is done more uniformly, while he essential oil on which the aroma depends is less liable to be dispersed than when exposed to the fierce eat of a fire in a single cylinder."

In the double rotatory globular method of roasting as practised at Messrs. Minto's Works, Græme Street, Hasgow, the above principle is acted upon, inasmuch as the globe (which has superseded the cylinder since he application of steam-power to this branch) revolves in a medium of heated air, which, experience has hown, best prevents the dispersion of the essential oil, or aroma.

# **EJECTOR-CONDENSER."**

The "EJECTOR-CONDENSER" produces a full vacuum without an Air Pump, in all kinds Steam Engines and Steam Pumps, and when applied to existing Non-Condensing Engines, give a saving of 25 to 50 per cent. of fuel, or an equivalent increase of power; and for Windi Engines this is the only safe Condenser in use. The vacuum is constant, whether the engines at rest or in motion, and many are working with great success. These apparatus, from th saving in fuel alone, very soon pay their own cost.

THE FIXED DOUBLE NOZZLE AUTOMATIC INJECTORS feed Water of high temperat into Steam Boilers. These Injectors and the WATER LIFTERS are the most simple and efficiapparatus in use for raising and forcing water. Full information and prices on application.

THOMAS WATSON, Resident Secretary.

# THE SCOTTISH EQUITABLE LIFE ASSURANCE SOCIETY.

ESTABLISHED 1831.

THE SCOTTISH EQUITABLE is a purely Mutual Office.

There are no Shareholders to absorb any portion of the Profits, which are therefore wholly divided among the holders of

Participating Policies.

The leading features of the Society are Unquestionable Security, Liberal Conditions of Insurance, and Early Participation in Profits. It has now been in existence for 53 years. For many years past it has taken a leading part in improving and simplifying the contract of life insurance, and, as a natural consequence of this, it has made rapid progress in public favour.

#### New Business.

The amount of New Business for the year ended on 1st March 1884 was the largest ever transacted by the Society, and this is the fourth year in succession in which the Directors have been able to make the same gratifying statement. The New Business of the last five years was as follows:

Year ending   Ist March.	Number of Policies issued.	New Sums Assured.	New Premiums.
1380	950	£484,740	£18,113

#### Quinquennial Division of Profits.

At the Thirteenth Division of Profits of the Society, made as a 1st March 1883, the profits realized in the preceding five years were £278,684. The available surplus enabled the Directors to declare New Bonus Additions amounting in all to £425,157, being at the rate of £1, 5s. per cent upon the sum assured and former bonuses, under every participating Policy, for each year it had been in force since the previous division of profits at 1st March 1878. The Bonus varied, therefore, according to the duration of the policy, being at the rate of £2, 11s. 1d. per cent upon the original sums assured under policies issued in the first year of the Society, upon which 52 years' premiums have been paid; £2, 6: 6d. per cent upon policies of 47 years' standing, and so on.

All the policies issued in the first five years of the Society, which are still in force, and on which no previous bonuses have been surrendered, are now DOUBLED IN AMOUNT.

The Vested Bonuses may at any time be surrendered, in whole or in part, for their present value, or applied to reduce the future premiums (for Life or for a period of five years), as the Policyholders may desire.

In 1878 the Bonus was at the rate of £1, 2s. 6d. per cent per annum, as against £1, 5s. in 1883, and the Directors have every reason to believe that they will be able to declare in 1888 a Bonus at a still higher rate.

#### New Non-Forfeiture Regulations.

The fundamental idea of the new regulations, as fully explained at last Annual Meeting of the Society, is, that when a policy has acquired a Surrender Value, this shall in no case be forfeited, but shall be applied in one way or another for the benefit of the persons entitled to the policy.

All ordinary policies now being issued are endorsed to the effect that if a policy which has acquired a sufficient Surrender Value (usually after three years), becomes forfeited through non-payment of the premium within the thirty days of grace, it may be revived within two months, whatever the state of health of the life assured, on payment of the premium,

with a fine of  $2\frac{1}{2}$  per cent during the first month after forfeiture, and 5 per cent during the second. If then the Directors have heard nothing from the assured, or any other person interested in the policy, they will advance the premium and fine, which will constitute a debt on the policy carrying interest at 5 per cent. The holder of the policy may pay off this debt at any time; but if he does not do so, the Directors will, if the value of the policy is sufficient, continue to advance each subsequent premium as it falls due, adding it to the debt, and accumulating the whole at compound interest until the Surrender Value is wholly exhausted.

Policies issued before 1st August 1884 may also be placed under the

above regulations on written application by the Policyholder.

#### Conditions of Insurance.

The Conditions of the Society's Policies are unusually liberal. The Policies (with few exceptions) become after five years, Indisputable, Whole World, and free from all conditions except payment of the ordinary premium, age having been proved.

## The Latest Advance in Life Insurance.

### Non-Forfeiting Limited-Tontine Policies.

These Policies combine the Non-Forfeiture features, originated by the New York Life in 1860, with the Privileges and Profits of its popular "Tontine Investment Policy."

The popularity attained by this Company's Non-Forfeiture Policies, and the gratifying results, as well as popularity of its Tontine Investment Policies, have led the New York Life to combine the essential features of both in its Non-Forfeiting Limited Tontine Policy. This Policy, which provides against loss in case of default in payment of premium after three years, by the guarantee of a paid-up Policy, is now confidently offered by this Company.

#### PROMINENT FEATURES.

- 1. Term Insurance at low rates, with surplus accumulations at compound interest.
- 2. The privilege of continuing your insurance at original rates after your Tontine Period expires.
- 3. The entire Cash Value of your Policy in Ten, Fifteen, or Twenty Years, on the basis of full legal reserve.
- 4. A grace of one month in payment of premiums (subject to a fine), during which time your indemnity will be unimpaired.
- 5. Protection against loss, in case of default in payment of premium after three years, by the guarantee of a paid-up Policy—as upon ordinary policies.

#### Prospectus, containing full information, can be obtained on application.

Note. -Estimates have been prepared to illustrate the practical working of Policies on this plan, and may be obtained for any age on application.

#### Annual Bonus Policies.

Besides combining the Tontine System with all the ordinary plans of Insurance, the Company issues Policies on the following plans, with Annual Bonuses:—

#### ORDINARY LIFE.

On this plan the Premiums are continued during the life-time of the Assured, and the amount is payable at death.

#### LIMITED PAYMENT LIFE by 10, 15, or 20 YEARS' PAYMENTS.

On these plans the Premiums cease in 10, 15, or 20 years (according to plan originally chosen), the amounts being payable at death.

These Policies continue to participate in Bonuses after all the Premiums have been paid on them.

#### ENDOWMENT by 10, 15, or 20 YEARS' PAYMENTS.

On these plans the amounts are payable in 10, 15, or 20 years (according to plan originally chosen) to Assured, or in case of previous death to their representatives.

#### Annuities.

This Company grants Annuities upon more favourable rates than British Companies, the higher rate of interest obtained by their investments in first-class American securities enabling them to do so.

### Extract from the 25th Annual Report

OF THE

Superintendent of the Insurance Department of the State of New York, March 20th, 1884.

Speaking of the Companies reporting to him, says:-

Of the Companies operating in New York, all of them have submitted to rigid investigation. All are believed to be honourably conducted and free from the speculative and litigious management that has done so much in the past to bring the business of Life Insurance into disrepute. To the writer who has been, by reason of his connection with the Department during the past fourteen years, a participant in the investigations of all the companies incorporated under the Laws of this State, and who has had frequent occasion to criticise them, it is a positive pleasure to state that at no time has there been so little necessity for criticism as now.

The legitimate correspondence of this Office is sufficiently large to make the individual responsible for it feel concerned about the replies that are required to be made; but when, in addition, he is called upon to assume the burden of assuring frightened policy-holders that their abundantly able Company is secure, he has a right to demand relief from the task, especially when the Department certificate of authority, with its seal of State is used as a guaranty of the calumniator.

#### ADVANTAGES OFFERED

103 BATH STREET, GLASGOW

EXTRACT FROM "THE MERCANTILE AGE AND TEXTILE TIMES,"
London, Glasgow, and Manchester, 3rd November, 1884.

It surely must be regarded with a degree of astonishment that an art so admirably calculated to advance the truest interests of mankind should have been discovered at so late a period; for up to the middle of the fifteenth century we hear little or nothing of the embryotic art of printing. We think that we have before stated that the first book printed was the one on the game of chess, which was completed on the last day of March, 1474. In an interesting note, well known to all hunters after scarce books, Caxton explains to his readers that the work is printed, "not wreton with penne and inke, as other bokes ben, to thende that every man may have them att ones, ffor all the bokes of this story, named the Recule of the historyes of Troyes, thus emprynted as ye here see, were begone in oon day and also finished in oon day." Notice the "finished in one day." That was considered a wonderful thing then; but what would Caxton say now were he to come to the upper world of light and literature? The beautiful type, the splendid machines, the number of books, would absolutely dumbfounder him.

The art of printing in its present proportions, however, would not surprise him so much as the attendant invention of lithography. The books he printed, when they were to have illuminated borders, or be otherwise illustrated, had to undergo a long process of handwork with, in many cases, very unsatisfactory results; the books now illustrated can be produced as easily as though they were not; and the finest pictures by masterhands can be reproduced on paper by mechanical processes, in such perfection as to rival the original. It is a wonderful, great, and educational invention, and has done much to foster in the minds of the multitude a taste for beauty.

This is, indeed, more marvellous when we consider that the lithographic art has developed to its present proportions within seventy-five years, for it is about that time since Sennefelder—a celebrated musician connected with the theatre of Munich—introduced his system of litho writing in script and ornamental work. He discovered that the art of taking impressions from writings or drawings, transferred to stone, depended on the readiness with which calcareous stone imbibes water; its great disposition to adhere to resinous or oleaginous substance, and the disposition those substances have to combine, and to repel water, or any other substance moistened with water.

Shortly after the invention of the lithographic art came that of chromo-type, employing blocks for various coloured inks, the earliest and simplest of which was the printing of the red-letter days in almanaes, or the rubric in the Church of England prayer book. This has now developed to such great perfection, both as to the artistic drawing of the design, engraving of the block, and perfect registration, impression and hot pressing of the sheet, that we are compelled to rank it among the fine arts of the period.

As Mr Barlow is one of the largest block printers in this country, we are pleased to include his establishment in our series of British industries, in which we have tried to show the present nis establishment in our series of British industries, in which we have tried to show the present position, rather than the past history, of our national trade. Mr Barlow commenced business in 1846 as a pyrotechnist, and gradually added other branches—flag, banner and tent manufacturer; and so late as fifteen or sixteen years ago he added to his other large industries letterpress, lithographic, and block printing—an idea of the magnitude of which may be gained by the following facts: The printing works consist of a six storeyed spacious building crowded with the most modern plant of printing presses and type that it has been our pleasure to inspect. On the ground floor there are ten large machines—from a small Minerva to a double super-royal, which are worked by a 14-in.r. horizontal engine. The second floor is used as a composing room, where there is an unusual variety of type suitable for general work, especially theatrical and where there is an unusual variety of type suitable for general work, especially theatrical and circus bills and posters. Whilst we mention these specialities, we would not ignore the other founts of type which are suitable for general jobbing, especially law stationery, &c. Following our cicerone we ascended to the third floor, which is the lithographic section, in which are the usual presses and inkmills, the latter being driven by a seperate horizontal engine; for Mr Barlow grinds his own colours. Amongst the machines in this department there is one very excellent quod-crown, by George Mann of Leeds, having all the latest improvements. The fourth storey is the block store-room. When we mention the astounding fact that there are at least 6000 engraved blocks in this room, all double-demy size, we shall be excused from describing them in minutiae. Ascending again, we were ushered on to the sixth storey, where Mr Barlow's designers and engravers were busily at work.

We may mention that the whole building is heated by the waste steam from the large boiler, situate in the basement, where the engineers' and mechanics' shops are.

Retracing our steps, we come to the front building, which we will briefly describe. On the basement there are innumerable store-rooms for decorative lamps—for there are thousands of variegated glass lamps always in stock—tents, marquees, and tent-fittings, there being always in stock upwards of 120 marquees and tents ready for hire; flag and banner poles, at least a thousand of which can be had on hire at any time; and a stock of printed posters, etc., of which we will speak anon.

The ground floor, on which are the public and private offices of the warehouse, contains many stock and manufacturing departments, of which we will merely describe a few. In the silk-banner manufacturing room, in which are nine sewing-machines, we saw many beautiful banners in the course of completion. The general wholesale and retail shop, where you may, at a moment's notice, obtain flags of all nations—flags used in the code of international signals, house and decorative flags, and ecclesiastical banners. In fact, Mr Barlow's heraldic bunting floats in all breezes; and has not only made for him an ubiquitous name, but also an enviable reputation as a flag and banner manufacturer.

We now wend our way through a series of stock-rooms, containing literally hundreds of tons of stock. When we say that the building has a frontage of forty feet and measures 113 feet longitudinally, being six storeys in the rear and six in the front, it will be understood that the magnitude of the stock is positively beyond description. We found 1030 kinds of posters—not ordinary double-demy posters, as some would imagine; but each poster containing from three to thirty sheets of double-demy-sized paper, printed in five colours.

We drove down to Mr Barlow's fire-work factory, at Teuchar Hill, Govan, which covers about six acres, and is licensed by Act of Parliament. On the occasion of our visit, Her Majesty's Chief Inspector of explosives was taking a walk through the factory. After we had had explained to us the modus operandi of producing Bombay lights, Roman candles, Signal rockets, golden fountains, and various other wonderful productions, including shells, whose report is equal to a twelve-pounder, and had carefully gone through the warehouse, packing-room, rocket-room, filling and charging shops, we concluded that it would be wise for us to keep as far away from describing, in minutiae, this wonderful and secret industry, as we did from the large magazine. Mr Barlow having frequently to furnish these goods on very short notice, is prepared to dispatch goods at five hours' notice, and, if necessary, attendants for grand pyrotechnic displays at prices ranging from £5 to £1000. It would be a breach of confidence, had we the power to do so, to describe how these fire-works are produced. Mr Barlow has devoted his life to this industry, and is, to-day, the universally acknowledged pyrotechnic artiste. Certainly, we were taken altogether by surprise when we saw the magnitude of his premises, and got to know the ramification of his trade. The numerous testimonials from the large corporate bodies, noblemen, and others, that can be seen on application, say far more than we can as to the great success Mr Barlow has achieved.

# FLAGS AND FLAG MAKING

Note.—Illustrated Catalogue sent Post Free on receipt of Post Card giving address where to be sent

The study of heraldry has in modern times fallen into discredit with the multitude, but it still has its practical uses, and a knowledge of the laws and principles of the art, or rather, science, has valid pretentions to be included in our curriculum of polite accomplishments. A precise acquaintance with all its details is not now required except from those whose professional duties have to deal with matters pertaining to mediæval art, but the education of a gentleman can scarcely be regarded as complete unless he is able to distinguish the armorial bearings of his own country and its sovereign, as shown in the various flags, coins, and emblems in common use. Heraldry, too, is a part of history, throwing light upon events which would be otherwise obscure. It is not, however, our purpose to deal with heraldry except so far as its principles are involved in the emblazonment of banners, pennons, standards, ensigns, pendants, flags, colours, and signals. It may be supposed that the single word "flags" should be sufficient to include the whole category; but heraldry is nothing unless it be precise, and it would be an unpardonable error to call the royal "standards" by any other designation, to confound the national "flag" with the "colours" of a regiment, or to transpose the names of "ensigns," "jacks," "house flags," and "signals." The generic name of "bunting" is applied to ship flags indiscrimately, but it is a term unknown to

heraldry, and relates only to the material on which the ensignia are displayed.

Although banners and flags usually borrow their emblazonments from coats of arms, there can be little doubt that the use of the former pre-

ceded that of the latter
The Fourth Book of
Moses supplies the
proof in support of the
theory. We are there
told that the Lord
spoke to Moses and
Aaron and ordered
that "every man of
the children of Israel

shall pitch by his own standard, with the ensign of their father's house." In the Bible Society's French version the phrases are rendered thus:—"Les enfants d'Israel camperont chacun sous sa bannière, avec les enseignes des maisons de

leurs pères." A student in heraldry would no doubt prefer the latter rendering of the text, and it is certainly the more grammatical, but the two versions are sufficiently close to illustrate the use of standards, ensigns, or

banners at a very early period. There is no occasion to trace through every age a custom which soon became universal, and we may at once proceed to notice the uses of flags, their varieties, and there manufacture, as we find them in the present day, with special reference to those of

our own country. THE ROYAL STANDARD OF ENGLAND, is composed of the arms of ENGLAND, 8COTLAND, and IRELAND, and is displayed indifferently on sea and land, offering a contrast in this respect to the royal standards of other countries, notably that of Russia and Germany, whose Emperors have separate standards afloat and ashore. The members of the ROYAL FAMILY OF ENGLAND take the royal standard with their father's badge in the centre, and a label across showing the relationship. In this also our practice differs from that of other nations, where each member of the royal family and every grand duke has his own standard.

The history of the UNION JACK is in some respects peculiar. It is really the national flag, and is the essential part of every ensign. It contains the ancient charge of the red cross of St. George, though not in its ancient simplicity, for it has been so amalgamated with the crosses of ST. ANDREW and ST. PATRICK that the integrity of each is somewhat com-

promised.

Experts in heraldry assure us that in effecting this compromise the principles of the science have been violated, but the authorities who sanctioned the successive alterations are certainly as worthy of confidence as the critics Prior to 1707 the Jack was charged with the single cross of St. George, but the Union with Scotland necessitated a change, which was effected by Act of Parliament, and thence forward the jack was technically described as "Azure, the saltire of ST. ANDREW, surmounted by the cross of ST. GEORGE, the latter fimbriated, argent." On the Union of Ireland at the beginning of the present century, the addition of the cross of ST. PATRICK became desirable, but there was a difficulty in the way, the crosses of ST. ANDREW and ST. PATRICK being identical in shape. How this was got over may be seen from the technical description of the flag as it now stands, which runs thus:—"Azure the crosses saltire of ST. PATRICK and ST. ANDREW, quarterly, per saltire, counterchanged, argent and gules, the latter fimbriated; of the second, surmounted by the cross of ST. GEORGE, of the third, fimbriated as the saltire." The three crosses are thus to be seen. although to the unobservant there appear to be only two.

The Duke of Edinburgh, as the Master of the Trinity House, hoists a flag composed of the St. George's Cross, quartered by four barges of the reign of Henry VIII., and in the centre a shield with the same emblem.

The flags most in use in the United Kingdom are UNION JACKS, AND WHITE, BLUE, AND RED ENSIGNS. The white is reserved for the sole use of the navy, the blue for the naval reserve, while the red is the common property of the nation, and may be used by any one. Yachts Clubs may have their own designs for flags, the Royal Yacht Squadron having an exclusive right to use the white ensign, while the blue is only allowed by special warrant. Clubs not having any special privilege must be content with the red. The Admiralty, the Customs, and other departments of the Government have distinguishing badges on their ensigns. That of the telegraphic branch of the Post-Office is peculiar, consisting as it does of a representation of Father Time with his hourglass smashed by lightning. Different fare also alloted to the several light-houses. Different flags

The Governor-General of India has for his standard the UNION JACK, with this motto in the centre—"Heaven's Light our Guide," surrounded by the sun and surmounted by a crown. Colonial flags consist of the Union Jack with the seal of the Governor in the

centre. These flags are forty-eight in numbers and seem of themselves to show the enormous scope of the empire. The flag of the Dominion of Canada has, in its centre, quarterings of the seals of the states of Ontario, Quebce, NovaScotia and New Brunswick. The flag of Gibraltar has acastle and keys, that of Hong Kong junks and shipping, that of West Austrilia the Black Swan, that of Victoria the stars of the Southern Cross, that of Granada a sugar press, and that of the Leeward Islands of the West Indies a number of pines, the design of Sir Benjamin Pine. It has been jocularly said that a large pine in the centre is himself, and the three smaller ones to the right his family.

THE CODE OF INTERNATIONAL SIGNAM FLAGS was adopted about thirty years ago chiefly through the exertions of the late Si William Mitchell, the proprietor of the Shipping Gazette. It was for his services in this matter that he received the honour of knighthood. Previous to that time the codd in most general use was known as Marryatt's The new code requires the use of nineteen flags which give by their various combination 76,000 messages. In the Royal Navy, however a special code is still in use, for which forty five flags are required. In rapid signalling a halliard is rove for each flag. A totally differen system of signals is employed in the army the flags being made of muslin, and the only colour blue and white, disposed on the principal of the Morse alphabet. The is yet another system employed for distant signalling, musketry practice, and judging distances wherein the three colours, blue, white, and red, are used.

What are known as "HOUSE FLAGS" are adopted by all the large shipping firms and navigation companies, so that the ownership of a vessel may be distinguished at a glance. These house flags bear fanciful devices, which are often anything but artistic, and certainly are amendably to none of the laws of heraldry. But they are not designed for ornament, and the more outre they are the better they serve

the purpose.

Having thus briefly reviewed the flags in most common use in the United Kingdom, it. will be interesting to note a few of the pecularities of foreign flags and standards. Saint George is the emblematical saint of Ruissia, but his encounter with the dragon is represented | " in a different way from that in which it is conventionally displayed in England. standard of the Czar, in addition to the double-headed eagle, contains in the centre St. George and the dragon, as well as the badges of eight different states. That of the Emperor of Austria is similar, with the badges of eleven states. The Emperor of Germany displays a double-headed black eagle, with an iron cross bearing the modern motto, "Gott-mit uns, 1870." The double-headed eagle represents the Eastern and Western Empire. The Polish eagle is white. The origin of all these eagles is traced back to A.D. 10, when

Warus, commander-in-chief of the legions in Germany, was surprised and his army cut to pieces. The Romans lost two of their standrds, a black eagle and a white one. The lack was taken by the Germans, and the white by the Samaritans. It is also supposed hat a third standard was lost to the Sclavi. The double heads must have been a subsequent nvention. The Royal Standard of Spain has he peculiarity of being coloured purple. In the centre of the different states are quartered on a shield surrounded by the coller of the Golden Fleece. The flags of Norway and weden bear a resemblance to that of our own United Kingdom. The Standard of the Sultan of Turkey is crimson, embroidered with his signature, and is never used except for the purpose of signifying his presence. of the United States has now thirty-seven stars, one for each state, and thirteen stripes, the number remaining the same as at the time of the Declaration of Independence. The flags of the South American Republic are simple in design, but eccentric in emblems: thus Mexico is known by its eagle and cactus, Brazil by its tobacco and coffee plant, Peru by its llama and born of plenty, Bolivia by its mountain, sun, and stars, and Chili by its single star. The standard of Theebau, King of Burmah, is characteristic of the man, the design being a peacock displayed. The Persian standard has for its device a lion and a sword in the full blaze of the sun. Siam displays its typical white elephant. China is represented by a five-toed dragon gazing at the sun. The Japanese standard is a yellow circle upon a damask ground, and the ensign is a crimson circle on a white ground.

We venture to think that from this slight sketch of flag history, which, if space permitted might be greatly extended, our readers will be impressed with the importance of the subject in its commercial bearing, very few having any idea of the extent of the manufacture and of the varied nature of the demand for flags. Reliable information on these points being a desideratum, we shall now give some particulars respecting a recent visit paid by us to a flag factory.

FLAGS are invariably made of bunting, a woollen fabric, which, from the nature of its texture, its great toughness and durability, is peculiarly fitted to withstand the hard usage to which it is subjected in the "battle and the breeze." It comes from the Yorkshire Mills in pieces of 40 yards, and in widths varying from 4½ to 36 inches. Government lags are made from a bunting of special strength as also of width and make. Silk is also used, but only in flags for royalty or for festive

occasions, and then only of special quality made by the Spittalfields weavers.

In consequence of the great strain the flag has to undergo whilst flying in all weathers, attention has to be paid to the quality of the heading, that is, the strip of flax material to which the flag is sewn nearest the mast or staff and through which the flag-line is rove, as well as to the line itself, which is made of a special kind of flax thread of tested strength and make. Flags are either sewn or printed, but the latter process is only adaptable for flags of small size which admit of being printed in the piece, or where a sufficiently large number of the same description are ordered to warrant the cost of cutting the blocks for printing.

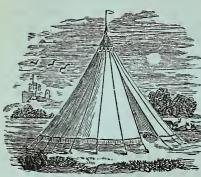

In regard to SEWN FLAGS, the very fact of sewing together the pieces which compose the flag adds materially to the strength of the whole, for the same reason that a spliced rope is nowhere so strong as in the splice itself. Very experienced cuttersout are required for the first part of this process, and the sewing of the flags and headings afford ample employment to a large number of hands, and also necessitating the extensive use of sewing-machines, while much of the work is given from the cutting-room to outdoor hands to make-up.

The PAINTING of DESIGNS on flags of silk or bunting is a distinct branch of itself, the art of laying colour on a material of such loose texture being a secret known only to a few. The artistic nature of the designs, many of which the firm are frequently called upon to furnish, make it requisite that a skilful artist and corps of assistants should be retained on the premises, their abilities being also called into action in the painting of flags of elaborated device. The printing works are carried on at some distance from the factory, and here again artistic assistants are required in the preparation of drawings, cutting of blocks, &c.

Of course the largest trade is done in Ensigns, Jacks, and Signals, and the fact that every ship to be properly equipped, should carry the two former, as well as a complete set of the latter, and her owners' house flag, will show our readers at once that a very regular demand exists for these description of flags throughout the year, and the stock kept is commensurate with the demand. The signals are in six sizes, viz., three for ships and three for yachts. There are about fifteen different sizes of jacks and ensigns, from one yard upwards, to suit vessels of every tonnage.

The manufacture of flags, of which we have given such an outline as is likely to interest our readers, is certainly one of national importance, and must always be so regarded.
