CROWE & RODGERS'
PHOTOGRAPHIC PORTRAIT ROOMS,
33 MURRAY PLACE,
STIRLING,
Opposite the Railway Station.

FROM the fact that this Establishment has been carried on for the last fourteen years, and the uniform success that has attended their efforts, Sitters may have every confidence in securing a Portrait that cannot be surpassed either in artistic effect or finish.

Messrs. C. & R. beg to call the attention of the public to their "PHOTO-CRAYON" PORTRAIT. This is an entirely New Style of Picture, and one which they have great confidence in recommending, not only for its artistic qualities, but also for its *permanency*. It is an enlarged bust from *carte* size, the face being about 4 inches, is finished off with Crayon Etching, and particularly well suited for a Drawing-room.

THE ADVANTAGE OF TEETH.

Digestion is one of the most important functions of the human body. So it is of paramount importance that the food, before it is introduced into the stomach, should be properly masticated. Teeth, and especially front teeth, natural or artificial, are necessary to distinct articulation, as well as mastication. Properly fitted Artificial Teeth cannot be too much over-estimated as a substitute—a lasting, painless substitute—for natural teeth, as long as we consider them as one of the many parts that compose the human system, the well-being of each of which is necessary to the health and comfort of the others, and through them to longevity.
